FRANCE, ISLE OF, see *Mauritius*.

FRANCHE COMTÉ, in upper Burgundy, E. France, was conquered by Julius Cæsar, about 45 B.C.; by the Burgundians, early in the fifth century, A.D.; and by the Franks about 534. It was made a county for Hugh the Black in 915, and received its name from having been taken from Renaud III. (1127-48), and restored to him. By marriage with the count's daughter, Beatrice, the emperor Frederick I. acquired the county, 1156. Their descendant, Mary of Burgundy, by marriage with the archduke Maximilian, conveyed it to the house of Austria, 1477. It was conquered by the French, 1668; restored by the treaty of Aix la Chapelle, 2 May, 1668; again conquered; and finally annexed to France by treaty, 1678.

FRANCHISE. A privilege or exemption from ordinary jurisdiction, and anciently an asylum or sanctuary where the person was secure. In Spain, churches and monasteries were, until last century, franchises for criminals, as formerly in England; see *Sanctuaries*. In 1429, in England, the ELECTIVE FRANCHISE for counties was restricted to persons having at least 40s. a year in land, and resident; for recent changes, see *Reform*.

FRANCIS' ASSAULT ON QUEEN VICTORIA. John Francis, a youth, fired a pistol at queen Victoria as she was riding down Constitution-hill, in an open barouche, accompanied by prince Albert, 30 May, 1842. The queen was uninjured. Francis was condemned to death, 17 June following, but was transported for life. He was liberated on ticket-of-leave in 1867.

FRANCISCANS. Grey or Minor Friars, an order founded by St. Francis d'Assisi, about 1209. Their rules were chastity, poverty, obedience, and very austere regimen. About 1220 they appeared in England, where, at the time of the dissolution of monasteries by Henry VIII., they had fifty-five abbeys or other houses 536-38.

celebrated in 1876. The city suffered by earthquakes in 1868 and 1872. Mr. William Coleman, an eminent maintainer of public order, died, aged about 69, Dec. 1893. Mrs. Jane L. Stanford's deed of gift, &c., equal to 25,000,000 dol., to the Leland Stanford Jun. University, signed, 9 Dec. 1901. Population, 1890, 298,997; 1900, 360,000; 1910, 400,000. FRANCONIA, or **FRANKENLAND** (on the Maine), formerly a circle of the German empire, part of Thuringia, was conquered by Thierry, king of the Franks, 530, and colonized. Its count or duke, Conrad, was elected king of Germany, 8 Nov. 911; and his descendant was the emperor Conrad III., elected 1138, and another duke. Franconia was made a distinct circle from Thuringia in 1512. At its subdivision in 1806 various German princes obtained a part; but in 1814 the largest share was awarded to Bavaria.

FRANCO-PRUSSIAN WAR originated in the emperor of the French's jealousy of the greatly increased power of Prussia, through the successful issue of the war with Denmark in 1864, and with Austria in 1866. The German Confederation was thereby annulled, and the North German Confederation established under the supremacy of the king of Prussia, to whose territories were further annexed Hanover, Hesse-Cassel, Nassau, Frankfurt, and other provinces. This great augmentation of the power of Prussia was mainly due to the energetic policy of count Bismarck-Schönhausen, prime minister since Sept. 1862.

In a draft treaty, secretly proposed to the Prussian government by the French emperor in 1866: "1. The emperor recognises the acquisitions which Prussia has made in the last war; 2. The king of Prussia promises to facilitate the acquisition of Luxemburg by France; 3. The emperor will not oppose a federal union of the northern and southern states of Germany, excluding Austria; 4. The king of Prussia, in case the emperor should enter or conquer Belgium, will support him in arms against any opposing power; 5. They enter into an alliance offensive and defensive."

[This draft treaty count Bismarck asserted emanated entirely from the French emperor. The scheme had never been seriously entertained by himself.]

In March, 1867, a dispute arose through the French emperor's proposal for purchasing Luxemburg from the king of Holland, which was strongly opposed by Prussia, as that province had formed part of the dissolved Germanic Confederation; and the affair was only settled by a conference of the representatives of the great powers in London, at which the perfect neutrality of Luxemburg was determined, together with the withdrawal of the Prussian garrison and the destruction of the fortifications. 7-11 May, 1867

Prince Leopold of Hohenzollern-Sigmaringen (connected with the Prussian dynasty, and brother of Charles, prince of Roumania), consented to become a candidate for the throne of Spain, 4 July, 1870

This was denounced by the French government. Threatening speeches were made in the French chamber by the duc de Grammont, the foreign minister, and eventually, after some negotiation and the intervention of Great Britain, prince Leopold, with the consent of his sovereign, declined the proffered crown 12 July,

The submission did not satisfy the French government and nation, and the demand for a guarantee against the repetition of such an acceptance irritated the Prussian government, and led to the termination of the negotiations, the king refusing to receive the count Benedetti, the French minister 13 July, 1870

Energetic but fruitless efforts to avert the war were made by earl Granville, the British foreign minister about 15 July, "

War was announced by the French emperor, with the hearty consent of the great majority of the chambers. The left or republican party opposed the war; M. Thiers and a few others only protested against it as premature 15 July, "

[After his surrender on 2 Sept., the emperor told count Bismarck that he did not desire war, but was driven into it by public opinion. He appears to have been greatly deceived as to the numerical strength of his army, and its state of preparation.]

"The greatest national crime that we have had the pain of recording since the days of the first French revolution has been consummated. War is declared—an unjust but premeditated war."—*Times* 16 July, 1870.

(For details of the battles see separate articles.)

FRENCH ARMY, about 300,000:—

- 1st corps, under marshal MacMahon.
- 2nd corps, under general Frossard.
- 3rd corps, under marshal Bazaine.
- 4th corps, under general Ladmirault.
- 5th corps, under general De Failly.
- 6th corps, under marshal Canrobert.
- Imperial guard, under general Bourbaki.
- Commander-in-chief, the emperor; general Le Boeuf, second; succeeded by marshal Bazaine.

PRUSSIAN ARMY, about 640,000:—

- 1. Northern, under general Vogel von Falckenstein, about 220,000, defending the Elbe, Hanover, &c.
- 2. Right, under prince Frederick Charles, about 180,000.
- 3. Centre, under generals Von Bittenfeld and Von Steinmetz, about 80,000.
- 4. The left, under the crown prince of Prussia, about 166,000.
- Commander-in-chief, king William; second, general Helmuth Karl Bernhard von Moltke (born 26 Oct., 1800; died 24 April, 1891).

The North German army, at the beginning of August, consisted, firstly, of 550,000 line, with 1,200 guns and 53,000 cavalry; secondly, of 187,000 reserve, with 234 guns and 18,000 cavalry; and, thirdly, of 205,000 landwehr or militia, with 10,000 cavalry, making a grand total of 944,000 men, with 1,680 mobilised guns and 103,000 horses.

To these must be added, firstly, the Bavarians, 69,000 line, with 192 guns and 14,800 horses—25,000 reserve with 2,400 horses, and 22,000 landwehr; secondly, the Württembergers—22,000 line with 54 guns and 6,200 horses, 6,500 reserve, and 6,000 landwehr; and, thirdly, the Badenese—16,000 line with 54 guns, 4,000 reserve, and 9,600 landwehr.

All the German troops taken together as under arms in Aug. 1870, 1,124,000 men.

Four weeks previously, on the peace footing, they numbered only 360,000.

The French generals appear to have acted greatly upon impulse. The Germans seem to have been invariably guided by a well-matured plan, their tactics mainly consisting in bringing vast masses to bear on the point where they were anxious to prevail. From Saarbrück to Sedan, Moltke appears to have left nothing to chance; and all his arrangements were ably carried out.

The causes of the early ruin of the French army were: "1, the enormous superiority of the Germans in regard to numbers; 2, the absolute unity of their command and concert of operation; 3, their superior mechanism in equipment and supplies; 4, the superior intelligence, steadiness and discipline of the soldiers; 5, superior education of the officers, and the dash and intelligence of the cavalry."—*Quarterly Review*.

FRANKLIN, the English freeholder in the middle ages; see "the Franklin's Tale," in Chaucer's *Canterbury Tales* (written about 1364).

FRANKLIN, SEARCH FOR. Sir John Franklin, with captains Crozier and Fitzjames, in H. M. ships *Erebus* and *Terror* (carrying in all 138 persons), sailed on his third arctic expedition of discovery and survey, from Greenhithe, on 19 May, 1845; see *North-west Passage*. Their last despatches were from the Whalefish islands, dated 12 July, 1845. Their protracted absence caused intense anxiety, and several expeditions were sent from

England and elsewhere in search of them, and coals, provisions, clothing, and other necessities, were deposited in various places in the Arctic seas by our own and by the American government, by lady Franklin, and numerous private persons. The *True Love*, captain Parker, which arrived at Hull, 4 Oct. 1849, from Davis's Straits, brought intelligence (not afterwards confirmed) that the natives had seen Sir John Franklin's ships in the previous March, frozen up by the ice in Prince Regent's inlet. Other accounts were equally illusory. The English government, on 7 March, 1850, offered a reward of 20,000*l.* to any party of any country, that should render efficient assistance to the crews of the missing ships. Sir John's first winter quarters were found at Beechy island by captains Ommanney and Penny.

LADY FRANKLIN'S EQUIPMENTS.

12. *Prince Albert*, capt. Forsyth, sailed from Aberdeen to Barrow Straits 5 June, 1850

15. Mr. Kennedy sailed again in the *Isabel*, on a renewed search to Behring's Straits 1853
16. H.M.S. *Rattlesnake*, commander Trollope, despatched to assist the *Plover*, capt. Maguire (who succeeded capt. Moore), at Point Barrow in April; met with it Aug. "
17. The second AMERICAN expedition, the *Advance*, under Dr. Kane early in June, "
18. The *Phoenix* (with the *Breadalbane* transport), commander Inglefield, accompanied by lieutenant Bellot, sailed in May; he returned, bringing despatches from Sir E. Belcher, &c. Oct. "
- The *Investigator* and Sir E. Belcher's squadron were safe; but no traces of Franklin's party had been met with. Lieutenant Bellot was unfortunately drowned in August while voluntarily conveying despatches for Sir E. Belcher. Capt. McClure had left the *Herold* (10) at Cape Lisburne, 31 July, 1850. On 8 Oct. the ship was frozen in, and so continued for nine months. On 26 Oct. 1850, while on an excursion party, the captain discovered an entrance into Barrow's Straits, and thus established the existence of a N.E.—N.W. passage. In Sept. 1851, the ship was again fixed in ice, and so remained till June. Pim and party from capt. Kellett's ship, the *Resolute* (11), fell in with them in April, 1853. The position of the *Enterprise* (4) was still unknown.
- A monument to Bellot's memory was erected at Greenwich. His "Journal" was published in 1854
- Dr. Rae, in the spring of 1853, again proceeded towards the magnetic pole; and in July, 1854, he reported to the Admiralty that he had purchased from a party of Esquimaux a number of articles which had belonged to Sir J. Franklin and his party—namely, Sir John's star or order, part of a watch, silver spoons, and forks with crests, &c. He also reported the statement of the natives, that they had met with a party of white men about four winters previous, and had sold them a seal; and that four months later, in the same season, they had found the bodies of thirty men (some buried), who had evidently perished by starvation; the place appears, from the description, to have been in the neighbourhood of the Great Fish river of Back. Dr. Rae arrived in England on 22 Oct. 1854, with the relics, which were deposited in Greenwich hospital. He and his companions were awarded 10,000*l.* for their discovery. Dr. Rae, aged 30, died 22 July, 1893
19. The *Phoenix*, *North Star*, and *Talbot*, under the command of capt. Inglefield, sailed in May, and returned in Oct. 1854
- Sir E. Belcher (No. 11), after mature deliberation, in April, 1854, determined to abandon his ships, and gave orders to that effect to all the captains under his command; and capt. Kellett gave similar orders to capt. McClure, of the *Investigator*. The vessels had been abandoned 15 May* when the crews of the *Phoenix* and *Talbot* (under capt. Inglefield) arrived (19). On their return to England all the captains were tried by court martial and honourably acquitted 17-19 Oct. "

* Capt. Kellett's ship, the *Resolute*, was found adrift 1000 miles distant from where she was left, by a Mr. George Henry, commanding an American whaler, who brought her to New York. The British government having abandoned their claim on the vessel, it was bought by order of the American congress, thoroughly repaired and equipped, and entrusted to capt. H. J. Hartstene, to be presented to queen Victoria. It arrived at Southampton, 12 Dec. 1856; was visited by her majesty on the 16th; and formally surrendered on the 30th. When the ship was broken up a desk was made of the wood, and presented by queen Victoria to the president of the United States, 29 Nov. 1880.

- Capt. Collinson's fate was long uncertain, and another expedition was in contemplation, when intelligence came, in Feb. 1855, that he had met the *Rattlesnake* (16) at Fort Clarence on 21 Aug. 1854, and had sailed immediately, in hopes of getting up with capt. Maguire in the *Plover* (1), which had sailed two days previously. Capt. Collinson having failed in getting through the ice in 1850 with capt. McClure, returned to Hong-Kong to winter. In 1851 he passed through Prince of Wales's Straits, and remained in the Arctic regions without obtaining any intelligence of Franklin till July, 1854, when, being once more released from the ice, he sailed for Fort Clarence, where he arrived as above mentioned. Captains Collinson and Maguire arrived in England in May, 1855
20. The third AMERICAN expedition in search of Dr. Kane, in the *Advance*, consisted of the *Release* and the steamer *Arctic*, the barque *Eringo*, and another vessel under the command of lieutenant H. J. Hartstene, accompanied by a brother of Dr. Kane as surgeon 31 May, "
- [On 17 May, 1855, Dr. Kane and his party quitted the *Advance*, and journeyed over the ice, 1300 miles, to the Danish settlement; on their way home in a Danish vessel, they fell in with lieutenant Hartstene, 18 Sept.; and arrived with him at New York, 11 Oct. 1855. Dr. Kane visited England in 1856; he died in 1857.]
- The Hudson's Bay Company, under advice of Dr. Rae and Sir G. Back, sent out an overland expedition, June 1855, which returned Sept. following. Some more remains of Franklin's party were discovered, "
21. The 18th British expedition (equipped by lady Franklin and her friends, the government having declined to fit out another)—the *Fox*, screw steamer, under capt. (since Sir) F. L. McClintock, R.N. (see No. 11)—sailed from Aberdeen 1 July, 1857; returned 22 Sept. 1859
- On 6 May, 1859, lieutenant Hobson found at Point Victoria, near Cape Victoria, besides a cairn, a tin case, containing a paper, signed 25 April, 1848, by capt. Fitzjames, which certified that the ships *Erubus* and *Terror*, on 12 Sept. 1846, were beset in lat. 70° 50' N., and long. 98° 23' W.; that Sir John Franklin died 11 June, 1847; and that the ships were deserted 22 April, 1848. Captain McClintock continued the search, and discovered skeletons and other relics. His Journal was published in Dec. 1859; and on 28 May, 1860, gold medals were given to him and to lady Franklin by the Royal Geographical Society.
- Mr. Hall, the Arctic explorer, reported, in Aug. 1865, circumstances that led him to hope that capt. Crozier and others were surviving.
- A national monument by Noble, set up in Waterloo-place, was inaugurated, 15 Nov. 1866. It is inscribed to "FRANKLIN the great navigator and his brave companions who sacrificed their lives in completing the discovery of the north-west passage, A.D. 1847-8."
- Sir John Franklin discovered the north-west passage by sailing down Peel and Victoria Straits, now named Franklin Straits.
- "Franklin search expedition," under lieutenant Schwatka, of U.S. navy, in an overland expedition in summer and autumn of 1879, discovers some human remains of the crews of the ships and other things; he set up memorials, and brought away the remains of lieutenant John Irving, of the *Terror*; and returned to Massachusetts about 23 Sept. 1880
- Remains of lieutenant John Irving buried at Edinburgh, 7 Jan. 1881
- Lady Franklin, aged 83, died 18 July, 1875
- 50th anniversary of the departure of Sir John Franklin's expedition, celebrated by the Royal Geographical society 20 May, 1895

FREDERICKSBURG (Virginia, N. America). On 10 Dec. 1862, general Burnside and the federal army of the Potomac crossed the small deep river Rappahannock. On 11 Dec. Fredericksburg was bombarded by the federals and destroyed. On the 13th commenced a series of desperate unsuccessful attacks on the confederate works, defended by generals Lee, Jackson, Longstreet, and others. General Hooker crossed the river with the reserves, and joined in the conflict, in vain. On 15 and 16 Dec. the federal army recrossed the Rappahannock. The battle was one of the most severe in the war.

FREE CHURCH OF ENGLAND (Evangelical). An Episcopal Church founded in 1844, and enrolled in her majesty's High Court of Chancery in 1863. See *Catechism*, 1899.

This church grew out of the Oxford tractarian movement of 1830. The first church was planted at Bridge town, Devon, by the rev James Shore, M.A., curate of the parish; it was built by the duke of Somerset, and opened in 1844. Two other churches were established in the same year—one at Exeter, and the other at Ilfracombe. But it was not till 1849 that much progress was made, when an impetus was given to the movement by the late bishop of Exeter's (Philpott) prosecution of Mr. Shore, for preaching in his diocese without his licence. The work spread, and the organization was enrolled under a deed poll as an "Episcopal Church." But as "Consecration" could not be obtained a bishop president was elected till 1876, when the secession of the right rev. bishop Cummins from the "Protestant Episcopal Church of America" (the first bishops of which church were consecrated by the archbishop of Canterbury at Lambeth Palace chapel, in 1787), afforded an opportunity, which was embraced, of obtaining episcopal consecration for the bishops of the Free Church of England in the Canterbury line of episcopal succession.

The services of the F. C. E. are conducted on similar lines to those of the evangelical section of the national church, excepting the omission of some words in the offices which the F. C. E. consider express doctrines opposed to the Protestant Reformation.

FREE CHURCH OF SCOTLAND was formed by an act of secession of nearly half the body

from the national church of Scotland, headed by Dr. Thos. Chalmers and other eminent ministers, 18 May, 1843. The difference arose on the question of the right of patrons to nominate to livings; see *Patronage*. The Free Church claims for the parishioners the right of a veto. Much distress was endured the first year by the ministers of the new church, although 366,719l. 14s. 3d. had been subscribed. In 1853 there were 850 congregations; in 1873, 954. A large college was founded in 1846. In 1856 the sustentation fund amounted to 108,638l. from which was paid the sum of 138l. each to 700 ministers.

FREEMASONRY. Writers on masonry, themselves masons, affirm that it has had a being "ever since symmetry began, and harmony displayed her charms." It is traced by some to the building of Solomon's temple; and it is said the architects from the African coast, Mahometans, brought it into Spain, about the 9th century. A modern speculative cosmopolitan freemasonry with some analogies has essential differences from some early secret societies, and is not earlier than the seventeenth century. In 1717, the grand lodge of England was established; that of Ireland in 1730; and that of Scotland in 1736. Freemasons were excommunicated by the pope in 1738; again condemned, 30 Sept. 1865. Freemasons' Hall, Great Queen-street, London, built 1775-6. Partly burnt, 3 May, 1883. The marquis (on becoming a Romanist) resigned 1 Sept. 1874. He was succeeded by the prince of Wales, afterwards Edward VII.; installed in the Royal Albert Hall, 28 April, 1875. The duke of Leinster, grand-master for Ireland for 60 years, died 10 Oct. 1874; succeeded by the duke of Abercorn. FREETHINKERS, professors of natural religion; see *Deists*.

FREE TRADE principles, advocated by Adam Smith in his "Wealth of Nations" (1776), triumphed in England when the corn laws were abolished in 1846, and the commercial treaty with France was adopted in 1860. Richard Cobden, who

was very instrumental in passing these measures, and termed "Apostle of Free Trade," died 2 April, 1865. Since 1830 the exports have been tripled. See *French Treaty*. An agitation for free trade existed in the United States. A reform league was formed at Boston, 20 April, 1869; and the movement became active in New York in Nov., and has since continued. A free-trade budget was brought in by the ministry in Sydney in 1873. A new free-trade league was inaugurated in London in Dec. 1873; and one at Melbourne, Australia, Sept. 1876; free trade union inaugurated, July, 1903; women's free trade union, 17 May, 1904; free food league formed, 13 July, 1904. Free trade warmly advocated in New South Wales, supported in New Zealand; opposed in Canada and in Victoria, Australia, 1877-80 (see *infra*). Much agitation against free-trade in 1880-2 and in 1903 *et seq.* See *Anti-Corn Law League*, *Fair Trade*, and *Preferential Tariffs*. American Free Trade League formed at Detroit, June, 1883. - FRENCH LANGUAGE** is mainly based on the rude Latin of the western nations subjugated by the Romans. German was introduced by the Franks in the 8th century. In the 9th the Gallo-Romanic dialect became divided into the *Langue d'oc* of the south and the *Langue d'oïl* of the north. The dialect of the Isle of France became predominant in the 12th century. The French language as

written by Froissart assimilates more to the modern French, and its development was almost completed when the Académie Française (established by Richelieu in 1634) published a dictionary of the language in 1674. The French language, laws, and customs were introduced into England by William I., 1066. Law pleadings were changed from French to English in the reign of Edward III., 1362. *Stow.* See *Drama.*

The French assembly determined that on 15 March, 1871, this treaty should cease in 12 months from that date. A fresh treaty was signed at Paris 29 Jan. 1873. Free trade was somewhat restricted, but the new French navigation law was relaxed. Negotiations for a new treaty began in London, 26 May, 1881. The fresco paintings by Giotto and others at the Campo Santo, a cemetery at Pisa, executed in the 13th century, are justly celebrated. See *Stereochromy*.

These islands were discovered by Tasman, in 1643; visited by Wallis, who called them Keppel Isles, 1767; and by captain Cook, who named them on account of the then friendly disposition of the natives, 1777. Pop. 1909, 24,117.

Shirley Baker, who had, it is stated, usurped and abused much power, was expelled by sir John B. FRIESLAND: EAST (N. Germany), the ancient Frisia, formerly governed by its own counts.

On the death of its prince Charles Edward, in 1744, it became subject to the king of Prussia; Hanover disputed its possession, but Prussia prevailed. It was annexed to Holland by Bonaparte, in 1806, to the French empire, 1810; and awarded to Hanover in 1815. The English language is said to be mainly derived from the old Frisian dialect.—FRIESLAND, WEST, in Holland, was part of Charlemagne's empire in 800. It passed under the counts of Holland about 936, and was one of the seven provinces which renounced the Spanish yoke in 1580. The term *Chevaux de Frise* (or *Cheval de Frise*, a *Friesland Horse*) is derived from Friesland, where it was invented.

FRIULI (Venetia), made a duchy by Alboin, the Lombard, when he established his kingdom about 570. It was conquered by Charlemagne. Henri, a Frenchman, made duke, was assassinated in 799, which was the fate of duke Berengarius, king of Italy and emperor, in 924. The emperor Conrad gave the duchy to his chancellor Poppo, patriarch of Aquileia, in the 11th century; it was conquered by Venice in 1420; annexed to Austria, 1797; France, 1805; Austria 1814; Italy, 1866.

He returned to England, bringing with him a quantity of black ore, supposed to contain gold, which induced queen Elizabeth to patronise a second voyage. This led to a third fruitless expedition. He was mortally wounded at Brest, Nov. 1594.

FROHSDORF, a village 30 miles south of Vienna on the river Leitha, with a magnificent castle, which from 1844 to 1883 was the head-

FROISSART'S CHRONICLE, a history of the period between 1326 and 1400, treating chiefly of contemporary events in France, England, Scotland and Flanders, which are described in a vivid and interesting manner, with valuable information also on Spain, Italy and Germany. The first part of the *Chronicle*, the period 1326-56, is based on the writings of Jean le Bel, canon of Liège. Froissart (1327-1410), whose life was one of travel and adventure, was educated for and took orders in the church, but his inclination for poetry and gallantry led him to a roving life. He visited England in 1360, where his reputation of being a gay poet and narrator of chivalric deeds had preceded him, and became secretary to queen Philippa of Hainault, wife of Edward III., a post he held for some years; he revisited England in 1395, and spent some time at the court of Richard II. Among his various patrons was Wenceslaus duke of Brabant, whose poems, with certain pieces of his own, Froissart collected under the title of "*Méliador*, or the Knight of the Golden Sun;" this work was discovered in 1894. On the death of his patron, he entered the service of Guy, count of Blois, who presented him with the canonry of Chinay. About 1388 Froissart visited the comte de Foix, of whose court he gives a delightful description. He died at Chinay 1410. The earliest translation of the *Chronicle* is that of sir John Bouchier, lord Berners, 1525; Buchon edited the *Chronicle*, 1824-26; Johnes, 1803-5; and Luce 1869-88.

FUENTES DE ONORO (central Spain). On 2 May, 1811, Massena crossed the Agueda with 40,000 infantry, 5000 horse, and about 30 pieces of artillery, to relieve Almeida. He expected every day to be superseded in his command, and wished to make a last effort for his own military character. Wellington could muster no more than 32,000 men, of which only 1200 were cavalry. He however determined to fight rather than give up the blockade of Almeida. After much fighting, on 3 May, night came on and stopped the conflict. Next day Massena was joined by Bessières with a body of the Imperial guard; and on 5 May, made his grand attack. In all the war there was not a more dangerous hour for England. The fight lasted until

Furs of various kinds are now extensively worn. The chief supplies come from Siberia and N. America, chinchillas (the finest and most delicate of all furs) from S. America, opossum and kangaroo from Australia, and leopard skins from Africa. Europe produces large quantities of common furs, as those of the fox, hare, and rabbit. The principal fur companies are the Hudson Bay co., founded 1670, and the N. America Fur-sealing co., established 1800. In Dec. 1819, soon after the Manchester affray, an act was passed for restraining public meetings and cheap periodical publications; it was popularly called "gagging bill." See *Six Acts*. Statutes coercing popular assemblies, particularly in Ireland, have been also so designated. See *Germany*, 1879. The terms "gagging," and "guillotining" were applied to Mr. Gladstone's resolutions for restricting (by the closure) the discussion on the Irish Home Rule bill, 30 June, 21 Aug. 1893. Mr. W. H. GARDEN CITIES are designed to provide settlements for workpeople and others in healthy and open neighbourhoods where every hygienic safeguard is applied to the aggregation of an industrial population, so controlled that rural conditions may be associated with many of the conveniences of urban life. The earliest attempt to give practical effect to the idea was the foundation, in 1890, of the model village of Port Sunlight, on the Mersey. In 1891 Mr. Cadbury placed in trust an estate at Bournville, near Birmingham, for the benefit of future residents, and his own employés, for the erection of dwellings on the principle of building societies, a proviso being made that a certain area of land should be kept clear around each house in perpetuity. Mr. Ebenezer Howard first introduced the scheme for founding garden cities in 1898. In 1899 the Garden City Association was formed, followed by the Garden City Pioneer Company, Ltd., in 1902, with a nominal capital of 20,000*l*. Mr. Cadbury, Mr. Alfred Harnsworth (now baron Northcliffe), and Mr. H. W. Lever being among the first subscribers. This company was the pioneer of a larger undertaking, the Garden City Company, formed September, 1903, with a capital of 30,000*l*. An estate at Letchworth, of 3,818 acres, was secured at the cost of about 40*l*. per acre, and named Letchworth Garden City. There are two villages on the estate, and roads, water, and drainage works, gas works, and a railway station have been constructed; postal, banking, and other facilities have also been secured, and in November 1908, 1,122 houses were, or were being, erected. Population, January 1909, estimated 6,000. Several large manufacturers have selected sites for the erection of workmen's cottages on the removal of

their works to the Garden City. *L'Association des Cités-Jardins de France*, on similar lines, was founded in France in 1904. Hampstead Garden Suburb Trust, Ltd., to purchase about 240 acres adjoining Hampstead Heath for residential purposes; registered 6 March, 1906.

GARDENERS' CHRONICLE, a weekly paper, first appeared, 2 Jan. 1841.

GARDENING. The Scriptures abound with allusions to gardens, particularly the Song of Solomon and the prophets; and Christ's agony took place in a garden. Xenophon describes the gardens at Sardis; and Epicurus and Plato taught in gardens. Theophrastus's History of Plants was written about 322 B.C. Horace, Virgil, and Ovid derive many images from the garden (50 B.C. to A.D. 50); and Pliny's Tusculan villa is circumstantially described (about A.D. 100). The Romans introduced gardening into Britain, the religious orders maintained it, and its cultivation increased in the 16th century, when many Flemings came here to escape the persecutions of Philip II. Miller's dictionary was published in 1724; the Horticultural Society (*which see*) was established in 1804; Loudon's Encyclopædia of Gardening was first published in 1822, and his Encyclopædia of Plants in 1829; an act for the protection of gardens and ornamental grounds in cities was passed in 1863. See *Botany, Flowers, Fruits*. Gardeners' Royal Benevolent Institution, founded 1838. Schools of practical gardening for women are in successful operation at Swanley, Kent, and elsewhere. Exhibition of Gardening and Forestry at Earl's-court, Kensington, opened by the Duke of York, 13 May, closed, 14 Oct. 1893. School of practical gardening for boys established by the Technical Education board at the Royal Botanic Society, Regent's Park, early 1901.

GARIGLIANO, a river (S. W. Italy). After long waiting and refusing to recede a step, the great captain Gonsalvo de Cordova made a bridge over this river, 27 Dec. 1503, and surprised and totally defeated the French army. Gaëta surrendered a few days after.

GAROTTE, a machine for strangling criminals, used in Spain. After five years' interval, a young woman, her lover, and an accomplice thus executed in Madrid for murder, 11 April, 1888. Many attempts to strangle made by thieves (termed "garotters") in the winter of 1862-3, led to the passing of an act in July, 1863, termed the "Garrotting Act," to punish these acts by flogging. The machine is now abolished.

GARTER, ORDER OF THE. Edward III., when at war with France and eager to draw the best soldiers of Europe into his interest, projected the revival of king Arthur's round table, and proclaimed a solemn tilting. On New Year's day 1343-4, he published letters of protection for the safe coming and returning of such foreign knights as would venture their reputation at the jousts and tournaments about to be held. These took place 23rd April, 1344. A table was erected in Windsor castle of 200 feet diameter, and the knights were entertained at the king's expense. In 1346 Edward gave his garter for the signal of a battle that had been crowned with success (supposed to be Cressy), and being victorious on sea and land, and having David, king of Scotland, a prisoner, he, in memory of these exploits, is said to have instituted this order, 23 April, 1349. See below.

Edward III. gave the garter pre-eminence among the ensigns of the order; it is of blue velvet

bordered with gold, with the inscription in old French—"Honi soit qui mal y pense" (Evil be to him who evil thinks). The knights are installed at Windsor, and styled *Equites aureæ Periscelidis*, knights of the golden garter. *Beaton*.

The order until king Edward VI.'s time was called the order of St. George, the patron saint of England. His figure on horseback, presented as holding a spear, and killing the dragon, was first worn by the knights of the institution. It is suspended by a blue ribbon across the body from the shoulder

GAS, in chemistry, a permanently elastic æri-form fluid; see *Oxygen, Hydrogen, Nitrogen, Chlorine, Argon, Crypton, &c.*

It is stated that Monge and Clouet condensed sulphuric acid before 1800, and Northmore liquefied chlorine 1805

GASTEIN (Salzburg, Austria). The long discussion between Austria and Prussia respecting the disposal of the duchies conquered from Denmark, was closed by a provisional convention signed here by their ministers (Blum for Austria and Bismarck for Prussia) 14 Aug. 1865. This convention was abrogated in 1866.

Austria was to have the temporary government of Holstein, and Prussia that of Sleswig; the establishment of a German fleet was proposed, with Kiel as a Federal harbour, held by Prussia; Lauenburg was absolutely ceded to Prussia, and the king was to pay Austria as a compensation 2,500,000 Danish dollars.

GATESHEAD, a borough in Durham, on the Tyne, opposite Newcastle. At Gateshead-fell, William I. defeated Edgar Atheling and his Scotch auxiliaries in 1068. Gateshead was made a parliamentary borough by the reform act in 1832. Returns one member. Population, 1901, 109,887; 1909 (est.) 131,024.

Between twelve and one o'clock, 5, 6 Oct. 1854, a fire broke out in a worsted manufactory here, which set fire to a bond warehouse containing a great quantity of nitre, sulphur, &c., causing a terrific explosion, felt at nearly twenty miles' distance, and totally destroying many buildings, and burying many persons in the ruins. At the moment of the explosion, large masses of blazing materials flew over the Tyne and set fire to many warehouses in Newcastle. About fifty lives were lost, and very many persons were seriously wounded. The damage was estimated at about a million pounds.
 Collapse of chemical condensers through fire at the Friar Goose chemical works, on the Tyne, near Gateshead; seven men killed, 26 July, 1891. Estimated loss about 10,000l.

At the Theatre Royal, by a panic caused by an alarm of fire, 11 persons, chiefly young, were crushed to death; the exit from the gallery was insufficient, 26 Dec. 1891.

GATLING GUN OR BATTERY. Invented by Mr. R. J. Gatling, an American, in 1862 (he died 26 Feb. 1903). It was intended to discharge at once a number of projectiles smaller than the shells of field guns, and it had as many locks as barrels. Tried at Shoeburyness and rejected as inferior to a field gun firing shrapnel. A powder to be used in the Gatling, invented by M. Pertuiset, was tried in London, Aug. 1870. The Gatling which was employed in Egypt in 1881 is no longer used in the army or navy, the maxim gun having entirely superseded it.

GAUGES (in railways). Much discussion (termed "the battle of the gauges") began among engineers about 1833. Mr. I. M. Brunel approved of the broad gauge, adopted on the Great Western Railway; and Mr. R. Stephenson, Joseph Locke, and others, chose the narrow. A 2 foot gauge was recommended in Feb. 1870, having been successful on the Festiniog railway, Wales; with Robt. Fairlie's "bogie" engine was much

adopted at home and abroad. About 200 miles of the S.W. lines of the Great Western were altered from the broad to the narrow gauge in a few days, June, 1874, and on 20-23 May, 1892, the broad gauge was totally superseded on the Great Western.

GAUGING, measuring the contents of any vessel of capacity, with respect to wine and other liquids, was established by a law, 27 Edw. III. 1352.

GENEALOGY, from the Greek *genea*, birth, descent. The earliest pedigrees are contained in the 5th, 10th, and 11th chapters of Genesis. The first book of Chronicles contains many genealogies. The pedigree of Christ is given in *Matt.* i. and *Luke* iii. Many books on the subject have been published in all European countries; one at Magdeburg, *Theatrum Genealogicum*, by Henningsen, in 1598. Anderson, *Royal Genealogies*, London, 1732. Sims' *Manual for the Genealogist*, &c., 1888, will be found a useful guide. The works of Collins (1756 *et seq.*), Edmondson (1764-84), Nicolas (1825 and 1857), Debrett, and Burke, on the British peerage, are highly esteemed. GENEVA CONVENTION, for the succour of the wounded in time of active warfare. Having been a witness of the horrors of the battle-field of Solferino, 24 June, 1859, M. Henri Dunant, a Swiss, published his experiences, which induced the *Société Gènevoise d'Utilité Publique* in Feb. 1863 to discuss the question whether relief societies might not be formed in time of peace to help the wounded in time of war by means of qualified volunteers. At an international conference held 26 Oct. 1863, fourteen governments, including Great Britain, France, Austria, Prussia, Italy, and Russia, were represented by delegates. The propositions then drawn up were accepted as an international code by a congress which met at Geneva, 8 Aug. 1864, and on 22 Aug. a convention was signed by twelve of the delegates, and it was eventually adopted by all civilised powers except the United States. International conferences were held at Paris in 1867 and at Berlin in 1869 for further developing in a practical manner the objects of the Geneva conference.

The International Society (termed "the Red Cross Society"), established in consequence of these proceedings, was very energetic in relieving the wounded and sick during the Franco-Prussian war in 1870, its flag being recognised as neutral. See *Aid to Sick and Wounded*. Above 13,000 volunteers said to be employed in attending the sick and wounded, Sept.—Dec., 1870. Additional articles applying to naval warfare adopted during the Spanish-American war, 1898. International conference for the revision of the Geneva convention with a view to improving the condition of soldiers wounded in war, appointed to be held 16 May, 1904, postponed *sine die* on account of the Russo-Japanese war, Feb. 1904. GENS-D'ARMES were anciently the king's horse-guards only, but afterwards the king's *gardes-du-corps*; the musqueteers and light horse were reckoned among them. There was also a company of gentlemen (whose number was about 250) bearing this name. Scots guards were about the persons of the kings of France from the time of St. Louis, who reigned in 1226. They were organised as a royal corps by Charles VII. about 1441; the younger sons of Scottish nobles being usually the captains. The name *gens-d'armes* was afterwards given to the police; but becoming obnoxious, was changed to "municipal guard" in 1830.

GENTLEMAN (from *gentilis*, of a *gens*, a race or clan). The Gauls observing that during the

empire of the Romans, the *scutarii* and *gentiles* had the best appointments of all the soldiers, applied to them the terms *écuyers* and *gentilshommes*. This distinction of gentlemen was much in use in England, and was given to the well-descended about 1430. *Sidney*. Gentlemen by blood were those who could show four descents from a gentleman who had been created by the king by letters patent.

GENTLEMEN-AT-ARMS (formerly styled the Band of Gentlemen Pensioners) is the oldest corps in England, with the exception of the Yeomen of the Guard. The band was instituted by Henry VIII. in 1509, and is composed entirely of gentlemen of noble blood, whom he named his pensioners or spears. William IV. commanded that it should be called his majesty's honourable corps of gentlemen-at-arms, 7 March, 1834. The corps is now formed of 1 captain (1,200*l.* a year), 1 lieutenant (500*l.*), 1 standard bearer (310*l.*), 1 clerk of the cheque (120*l.*), and 40 gentlemen (each 70*l.*) Their attendance is only required at drawing rooms, levees, and other state functions.

GENTLEWOMEN'S SELF-HELP INSTITUTION, London, established by the earl of Shaftesbury, duchess of Sutherland, and others, May, 1870.

GEODESY (from *daïo*, I divide), the art of measuring the surface and determining the figure of the earth, &c. Col. A. Clarke's "Geodesy," published 1880. See *Latitude*.

The 7th international Geodetic congress met at Rome 15-24 Oct. 1883. It recommended the international unification of the hour, and longitude with Greenwich. An international conference of 40 delegates met at Washington, 1 Oct., president Adm. Rogers, agree to recommend Greenwich as prime meridian; France and Brazil abstain, 13 Oct. 1884; the terms of a universal day also agreed to, 1 Nov. 1884; at Berlin, 27 Oct. 1886; at Salzburg, 17 Sept. 1888; at Paris, 3 Oct. 1889; at Berlin, 30 Sept. 1895; Stuttgart, 3 Oct. 1898; Copenhagen, 4 Aug. 1903.

The internat. geographical congress at London declare for Greenwich as prime meridian. July, 1895

GEOGRAPHY. The first geographical records are in the Pentateuch, and in the book of Joshua. Homer describes the shield of Achilles as representing the earth surrounded by the sea, and also the countries of Greece, islands of the Archipelago, and site of Troy. *Iliad*. The priests taught that the temple of Apollo at Delphos was the centre of the world. Anaximander of Miletus was the inventor of geographical maps, about 568 B.C. Hipparchus attempted to reduce geography to a mathematical basis, about 135 B.C. Strabo, the great Greek geographer, lived 71-14 B.C. Ptolemy flourished about 139 A.D. The science was brought to Europe by the Moors of Barbary and Spain, about 1240. *Lenglet*. Maps and charts were introduced into England by Bartholomew Columbus to illustrate his brother's theory respecting a western continent, 1489. Geography is now divided into mathematical, physical, and political, and its study has been greatly promoted during the present century by expeditions at the expense of various governments and societies. The *Royal Geographical Society* of London was established in 1830; that of Paris in 1821. The Geographical Society's exhibition opened by the marquis of Lorne, 9 Dec. 1885. The society issued a circular for promoting a more uniform spelling of geographical names, Dec. 1891.

The society instituted courses of lectures, Nov. 1892. Proposal that ladies be admitted as fellows; approved by letter-votes, 30 June; rejected by special meeting (172-158), 3 July, 1893. International Congresses are held. See *Africa, North-East and West Passage, &c.*

GEOLOGY, the science of the earth, is said to have been cultivated in China before the Christian era, and occupied the attention of Aristotle, Theophrastus, Pliny, Avicenna, and the Arabian writers.

In 1574 Mercati wrote concerning the fossils in the pope's museum. Christopher Majori, and others (1577), Steno (1666), Seilla (1670), Quirini (1676), Plot and Lister (1678), Leibnitz (1680) recorded observations, and put forth theories on the various changes in the crust of the earth.

Hooke (1668), in his work on Earthquakes, said that fossils, "as monuments of nature, were more certain tokens of antiquity than coins or medals, and though difficult, it would not be impossible to raise a chronology out of them."

Barnard's "Theory of the Earth" appeared 1699. Whiston's 1696; Hutton's "Theory of the Earth" 1775.

Baillon's geological views (1742) were censured by the Sorbonne in 1751, and recanted in consequence. The principle he renounced was that the present condition of the earth is due to secondary causes, and that these same causes will produce further changes. His more eminent fellow-labourers and successors were Gesner (1758), Michell (1760), Raspe (1762-73), Pallas and Horace B. de Saussure (1793-1800).

Werner (1775) ascribed all rocks to an aqueous origin, and even denied the existence of volcanoes in primitive geological times, and had many followers, Kirwan, De Lappace—James Hutton 1785, supported by Playfair, (1801) warmly opposed Werner's views, and asserted that the principal changes in the earth's crust are due to the energy of fire. The rival parties were hence termed Neptunists and Vulcanists.

Mr. (aft. sir) A. Geikie and other eminent modern geologists, ascribed the origin of the landscape features of the earth chiefly to denudation by the action of water, 1865 *et seq.* Sir A. Geikie's "Founders of Geology" [Jean Etienne Guettard, Desmaret, and others in the 18th century], published 1897.

William Smith, the father of British geology (who had walked over large part of England), drew up a Tabular View of British Strata, in 1779, and published it and his Geological Map of England and Wales, 1812-15; died 25 Aug. 1841. The Rev. Adam Sedgwick, another father, died 27 Jan. 1823, aged 87. Sir Charles Lyell, died 22 Feb. 1875.

The rev. Wm. Buckland, D.D., born 1784; Reader in geology, Oxford, 1818; published "Reliquiæ Diluvianæ," the results of his examination of the fossil bones of large mammals, elephants, tigers, hyenas, &c., discovered in the Kirkdale cave, Pickering, Yorkshire, in 1821. "Geology and Mineralogy," in relation to natural Theology (Bridgewater Treatise), 1836. Dean of Westminster, 1846; died Aug. 1856.

In 1803 the Royal Institution possessed the best geological collection in London, collected by H. Davy, C. Hatchett, and others; the proposal of sir John St. Aubyn, sir Abraham Hume, and the right hon. C. F. Greville, to aid the government in establishing a school of mines there in 1804-7, was declined, 13 Nov. 1807.

1807 the *Geological Society of London* was established. By collecting a great mass of new facts, it greatly tended to check the disposition to theorise, and led to the introduction of views midway between those of Werner and Hutton.

The Geological Society of Dublin, 1832; of Edinburgh, 1834; of France, 1830; of Germany, 1848.

In 1835 Mr. (afterwards Sir Henry) De la Beche suggested the establishment of the present *Museum of Geology*, which began at Craig's-court, and which was removed to its present position in Jermyn-street. To him are also due the valuable geological maps formed on the Ordnance survey. The building was erected by Mr. Pennethorne, and formally opened by the prince consort, 14 May, 1851. Attached to the Museum are the Mining Records office, a lecture theatre, laboratories, &c. Sir H. De la Beche, the first director, died 13 April, 1855; succeeded by Sir Roderick Murchison, who died 22 Oct. 1871; succeeded by Professor (afterwards Sir) A. C. Ramsay, March, 1872, died 9 Dec. 1891; by Archibald Geikie, 1881, kn., 1891. A similar institution founded at Calcutta in 1840.

great many maps have been published, with memoirs. The survey of England, on the scale of an inch to a mile, was completed in Jan. 1884. Some maps have been made on a scale of six inches to a mile. The surveys of Scotland and Ireland are in progress. A few geological maps of England and Wales, 4 miles to the inch, published by government, 1898.

International geological congress originated at the Buffalo meeting of the American association for the advancement of science in 1876.

The strata composing the earth's crust may be divided into two great classes:

I. Those generally attributed to the agency of water;
II. To the action of fire: which may be subdivided as follows:—

Aqueous formations, stratified, rarely crystalline:—
Sedimentary or fossiliferous rocks.
Metamorphic or unfossiliferous.

Igneous formations, unstratified, crystalline:—
Volcanic, as basalt, &c.
Plutonic, as granite, &c.

Fossiliferous, or Sedimentary, rocks are divided into three great series:—

The Palæozoic (most ancient forms of life) or Primary.

The Mesozoic (middle life period), or Secondary.

GEORGE, ST., the tutelary saint of England, and adopted as patron of the order of the garter by Edward III. His day is 23 April. Special celebration in honour of the English soldiers in London and other parts of England, 1900. See *Garter*, and *Knighthood*.

St. George was a tribune in the reign of Diocletian, and being a man of great courage, was a favourite; but complaining to the emperor of his severities towards the Christians, and arguing in their defence, he was put in prison, and beheaded, 23 April, 290.—On that day, in 1192, Richard I. defeated Saladin.

The Order of the Sons of St. George, established at Philadelphia as a society to succour emigrants (see under *Emigration*). It gradually acquired political influence, and many branches were formed in order to counteract the dominant aggressive policy of the Irish party. It works in unison with the "British American association," which was formed to promote naturalization—its organ being the *British American*, a weekly newspaper, Dec. 1887.

GEORGES' CONSPIRACY, in France. General Moreau, general Pichegru, Georges Cadoudal, who was commonly known by the name of Georges, and others, were arrested at Paris, charged with a conspiracy against the life of Bonaparte, and for the restoration of Louis XVIII., Feb. 1804. Pichegru was found strangled in prison, 6 April. Twelve of the conspirators, including Georges, were executed 25 June, and others imprisoned. Moreau was exiled, and went to America. In 1813 he was killed before Dresden (*which see*).

GEORGIA, the ancient Iberia, now a province of S. Russia, near the Caucasus, submitted to Alexander about 331 B.C., but threw off the yoke of his successors. It was subjugated to Rome by Pompey, 65 B.C., but retained its own sovereigns. Christianity was introduced into it in the 3rd century. In the 8th century, after a severe struggle, Georgia was subdued by the Arab caliphs; by the Turkish sultan Alp-Arslan, 1068; and by the Tartar hordes, 1235. From the 14th to the 18th centuries, Georgia was successively held by the Persian and Turkish monarchs. In 1740 Nadir Shah established part of Georgia as a principality, of which the last ruler Heraclius, surrendered his territories to the czar in 1799; and in 1802 Georgia was declared to be a Russian province.—GEORGIA, IN NORTH AMERICA, was settled by gen. Oglethorpe, in 1732. Separating

from the congress of America, it surrendered to the British, Dec. 1778; and its possession was of vast importance to the royalists in the war. Count d'Estaing joined the American general Lincoln, and made a desperate attack on Georgia, which failed, and the French fleet returned home; the colony was given up to the Union by the British in 1783. It seceded from the Union, by ordinance, 18 Jan. 1861, and was conquered by Sherman in 1864-5, and readmitted as a state Jan. 1868. A ridiculous negro insurrection suppressed Aug. 1875. GERM THEORY OF DISEASE supposes "that many diseases are due to the presence and propagation in the animal system of minute organisms [termed *microbes*] having no part or share in its normal economy." *MacLagan*, 1876. See *Animacules* and *Bacteria*. Dr. Cohn, of Breslau, whose work was published in 1872, classifies bacteria as—I. Sphero or micrococci; II. Micro-bacteria, or bacteria proper (rod-shaped); III. Desmo-bacteria, the same but longer; IV. Spiro-bacteria, spiral-shaped or curly. Translation of his work, 1881. See *Cholera*.

The doctrine of *contagium animatum* was held in the middle ages and put forth in the 16th century, but contagious organisms were not discovered till the 19th by professors Pasteur, Tyndall, Dr. Wm. Budd, and others, 1875 *et seq.* At the British Association, 14 Sept. 1870, professor Huxley expressed his concurrence with the "germ theory." See under *Dust* and *Vivisection*, 1882.

Dr. Robert Koch is said to have identified the microscopical germs of cattle disease, of consumption, of cholera, and other diseases, 1879 *et seq.*, discredited in England, May, June, 1885. See *Tuberculosis*.

Dr. E. Klein, Feb. 1885, reported his investigations on the relation of bacteria to cholera. At the Royal Institution, May 27, 1887, he demonstrated the propagation of scarlet fever by microbes in cow's milk.

Numerous specimens of these germs were exhibited at the Royal Institution in illustration of professor Tyndall's discourse on "Living contagia," 16 Jan. 1885.

By taking means to exclude these germs from wounds, &c., sir Joseph Lister (baron 1897) introduced antiseptic surgery with great success, in which carbolic acid is largely used, 1864 *et seq.*; the protection of wounds from air is not now considered necessary.

"Louis Pasteur," by M. Radot, his son-in-law, gives an account of Pasteur's success in mitigating the virulence of some diseases by inoculation. A translation by lady Claud Hamilton was published in Feb. 1885. M. Pasteur's 70th birthday celebrated in Paris, &c. 27 Dec. 1892. He died, 28 Sept. 1895; see *Hydrophobia*.

taj. R. Ross's paper at the Royal Colonial Institute on "Malaria and its treatment," he shows that three great laws had been established by science regarding malaria—(1) that it was caused by numbers of microscopical parasites, which live and propagate themselves in the blood; (2) that these parasites are carried from sick persons to healthy ones by the agency of a genus of mosquitoes called *Anopheles*; (3) that these kinds of mosquitoes breed principally in shallow and terrestrial waters, 10 Nov. 1903.

GERMAN LANGUAGE has two great branches: *hoch* and *platt Deutsch*, high and low

German. The former became the literary language, principally through its use by Luther in his translation of the Bible and in other works, 1522-34. The latter is that spoken by the lower classes. There are many dialects: the satirical epic in low German, "Reineke Fuchs," appeared in 1498; see *Reynard*, and *Drama*.

GERMANY (*Germania, Alemania*), anciently, as now, divided into independent states. The Germans long withstood the attempts of the Romans to subdue them ; and although that people conquered some parts of the country, they were expelled before the close of the 3rd century. In the 5th century the Huns and other tribes prevailed over the greater portion of Germany. In the latter part of the 8th century, Charlemagne subdued the Saxons and other tribes, and was crowned emperor at Rome, 25 Dec. 800. A list of his successors is given in another page. At the extinction of his family, the empire became elective, 911, and was subsequently obtained by members of the house of Hapsburg (from 1437 till 1804). Germany was divided into circles, 1501-12. The confederation of the Rhine was formed 12 July, 1806 ; the Germanic confederation, 8 June, 1815 ; and the North German confederation, 18 Aug. 1866 ; the treaty ratified, 8 Sept. 1866. The present German empire was established in 1871. The emperor is styled "German emperor." (See *that date below*.) See *Franco-Prussian War*, 1870-71. Kennet, in his *Antiquities*, says it was founded by St. Kentigern, alias Mungo, in 560; Dr. Heylin, speaking of the see of St. Asaph, in Wales, says that *that* see was founded by St. Kentigern, a Scot, then bishop of Glasgow, in 583. This prelate became archiepiscopal in 1491, ceased at the Revolution, and is now a post-revolution bishopric. The cathedral, commenced in 1121, has a noble crypt; see *Bishops*.

GLASITES (in Scotland) and **SANDEMANIANS** (in England). In 1727, John Glas, a minister of the church of Scotland, published "The Testimony of the King of Martyrs, concerning his Kingdom (*John xviii. 36*)," in which he opposed national churches, and described the original constitution of the Christian church, its doctrines, ordinances, officers, and discipline, as given in the New Testament. Having been deposed in 1728, he and others established several churches formed upon the primitive models. The publication of a series of letters on Hervey's "Theron and Aspasio," by Robert Sandeman, in 1757, led to the establishment of churches in London and other places in England, and also in North America.

GLASS-PAINTING was known to the ancient Egyptians. It was revived about the 10th century, and is described in the treatise by the monk Theophilus; was practised at Marseilles in a beautiful style, about 1500, and attained great perfection about 1530. Specimens of the 13th century exist in England; C. Winston's work is the best on the subject, 1846, new edition 1868

GLASTONBURY (Somerset), traditionally said to have been the residence of Joseph of Arimathea, and the site of the first Christian church in Britain, about 60. A church was built here by Ina about 708. The town and abbey were burnt, 1184, and an earthquake did great damage in 1274. Richard Whiting, the last abbot, who had 100 monks and 400 domestics, was hanged on Tor-hill in his pontificals for refusing to take the oath of supremacy to Henry VIII., 14 Nov. 1539. The monastery was suppressed 1540. Visit of pan-anglican bishops, 3 Aug. 1897. See *Lake Dwellings*, 1892.

Gladstone and Mr. Hope Scott, aided by dean Ramsay, the duke of Buccleuch, the marquis of Lothian, and other gentlemen, to support the Scottish episcopal church. GLENCOC MASSACRE of the Macdonalds, a Jacobite clan, for not surrendering before 1 Jan. 1692, the time stated in king William's proclamation. Sir John Dalrymple, master (afterwards earl) of Stair, their enemy, obtained a decree "to extirpate that set of thieves," which the king is said to have signed without perusing. Every man under 70 was to be slain. This mandate was treacherously executed by 120 soldiers of a Campbell regiment, hospitably received by the Highlanders, 23 Feb. 1692. About 60 men were slain; and many women and children, turned out naked in a freezing night, perished. This excited great indignation; and an inquiry was set on foot, May, 1695, but no capital punishment followed.

The warrant for the massacre of Glencoe sold. See *Books*, 29 May, 1907.

GLOBE. The globular form of the earth, the five zones, some of the principal circles of the sphere, the opacity of the moon, and the true causes of lunar eclipses, were taught, and an eclipse predicted, by Thales of Miletus, about 640 B.C. Pythagoras demonstrated, from the varying altitudes of the stars by change of place, that the earth must be round; that there might be antipodes on the opposite part of the globe; that Venus was the morning and evening star; that the universe consisted of twelve spheres—the sphere of the earth, the sphere of the water, the sphere of the air, the sphere of fire, the spheres of the moon, the sun; Venus, Mercury, Mars, Jupiter, Saturn, and the spheres of the stars; about 506 B.C.—Aristarchus of Samos maintained that the earth turned on its own axis, and revolved about the sun, which doctrine was held by his contemporaries as so absurd that the philosopher nearly lost his life, 280 B.C.; see *Circumnavigators*.

To determine the figure of the earth, a degree of latitude has been measured in different parts of the world; by Bouguer and La Condamine in Peru, and by Maupertuis and others in Lapland, 1735.

Estimated density 5/6 that of water; weight—6,000,000,000,000,000,000,000 tons.—*Proctor*, 1875.

Experiments made by pendulums to demonstrate the rotation of the earth by Foucault in 1851; and to determine its density by Maskelyne, Bailly, and others; and in 1826, 1828, and 1854, by Mr. (aft. sir) G. B. Airy, the astronomer-royal.

ARTIFICIAL GLOBES. It is said that a celestial globe was brought to Greece from Egypt, 368 B.C., and that Archimedes constructed a planetarium about 212 B.C.

The globe of Gottorp, a concave sphere, eleven feet in diameter, containing a table and seats for twelve persons, and the inside representing the visible surface of the heavens, the stars and constellations, all distinguished according to their respective magnitudes, and being turned by means of curious mechanism, their true position, rising and setting, are shown. The outside is a terrestrial globe. The machine, called the globe of Gottorp, from the original one of that name, which, at the expense of Frederick II. duke of Holstein, was erected at Gottorp, under the direction of Adam Olearius, and was planned after a design found among the papers of the celebrated Tycho Brahe. Frederick IV. of Denmark presented it to Peter the Great in 1713. It was nearly destroyed by fire in 1757; but it was afterwards reconstructed. *Coze*.

The globe at Pembroke-hall, Cambridge, erected by Dr. Long (master, 1733), eighteen feet in diameter.

In 1851 Mr. Abrahams erected in Leicester-square, Mr. Wyld, a globe 60 feet 4 inches in diameter, lit from the centre by day, and by gas at night. It was closed in July, 1861; the models were sold, and the building eventually taken down.

Hicks theatre, Shaftesbury-avenue, re-named the Globe and opened with *His Borrowed Plumes*, 6 July, 1909.

GLOIRE, French steam frigate, see *Navy*, *French*.

GLORY, the nimbus drawn by painters round the heads of saints, angels, and holy men, and the circle of rays on images, adopted from the Cæsars and their flatterers, were used in the 1st century. The doxology, "*Gloria Patri*," is very ancient, and originally without the clause "as it was in the beginning," &c. In the Greek it began with "*doxa*," *glory*.

GLOUCESTER (Roman *Glevum*), submitted to the Romans about 45, and to the Saxons 577. The statutes of Gloucester, passed at a parliament held by Edward I. 1278, relate to actions at law. This city was incorporated by Henry III.; and was fortified by a strong wall, which was demolished after the Restoration, in 1660, by order of Charles II., as a punishment for the successful resistance of the city to Charles I., under col. Massey, Aug., Sept. 1643. The Gloucester and Berkeley canal was completed in April, 1827. Gross bribery took place here at the election for the parliament in 1850.—The **BISHOPRIC** was one of the six erected by Henry VIII. in 1541, and was formerly part of Worcester. It was united to Bristol in 1836, but in 1884 an act was passed to provide for their again becoming separate bishoprics. The bishopric of Bristol reconstituted 7 July, 1897. The church, which belonged to the abbey, and its revenues, were appropriated to the maintenance of the see. The abbey, which was founded by king Wulphere about 700, was burnt in 1102, and again in 1122. In it are the tombs of Robert, duke of Normandy, and Edward II. GLOVES. Woodstock and Worcester leather gloves are of ancient celebrity. In the middle ages, the giving a glove was a ceremony of investiture in bestowing lands and dignities; and two bishops were put in possession of their sees by each receiving a glove, 1002. In England, in the reign of Edward II., the deprivation of gloves was a ceremony of degradation. The Glovers' company of London was incorporated in 1556. Embroidered gloves are presented to judges at maiden assizes. The importation of foreign gloves was not permitted till 1825.

GLUCINUM (from *glukus*, sweet). In 1798 Vauquelin discovered the earth *glucina* (so termed from the sweet taste of its salts). It is found in the beryl and other crystals. From glucina Wöhler and Busay obtained the rare metal glucinum in 1828. *Gmelin*.

It is obtained pure by saponifying olive oil or animal fat with oxide of lead, or litharge. Glycerine is much employed in medicine and the arts, and in the manufacture of nitro-glycerine (*which see*), and other explosives.

GLYOXYLINE (invented by Mr. (aft. sir) F. A. Abel, the chemist of the war department, in 1867), an explosive mixture of gun-cotton, pulp and saltpetre saturated with nitro-glycerine. It was abandoned for compressed gun-cotton.

This house was purchased by Louis XIV. about 1662, for a manufactory of works for adorning palaces (under the direction of Colbert), especially tapestry, designs for which were drawn by Le Brun, about 1666. It was much sung 1745-6. It has been claimed by the French. The controversy on the subject is summed up in Chappell's "Popular Music of the Olden Times" (1859). The melody has been adopted for the German national anthem ("Heil dir im Siegerkranz!"), and also for the Danish. "God save the king," revised version, 1902.

GOLD (mentioned *Gen. ii. 11*), the purest, and most ductile of all the metals, for which reason it has been considered by almost all nations as the most valuable. It is too soft to be used pure, and to harden it it is alloyed with copper or silver: our coin consists of twenty-two carats of pure gold, and two of copper. By 17 & 18 Vict. c. 96 (1854), gold wares are allowed to be manufactured at a lower standard than formerly;—wedding rings excepted, by 18 & 19 Vict. c. 60 (1855). The present stated price is 3*l.* 17*s.* 10½*d.* per oz.; see *Coin of England*, and *Guineas*. In 1816, it was enacted by 56 Geo. III. c. 68, that "gold coins only should be legal tender in all payments of more than 40*s.*," the tender of silver being previously unlimited.

The value of gold compared with silver is said to have been estimated in the time of Herodotus, B.C. 450, about 10 to 1; of Plato, B.C. 38, 12 to 1; A.D. 1876, more than 15 to 1. See *Silver*.

GOLDEN BULLS, ROSE, see *Bulls, Rose*, note.

GOLDEN FLEECE (see *Argonauts*). Philip the Good, duke of Burgundy, in 1429, at his marriage, instituted the military order of "*Toison d'or*" or "golden fleece;" it was said on account of the profit he made by wool. The number of knights was thirty-one. The king of Spain, as duke of Burgundy, afterwards became grand master of the order. The knights wore a scarlet cloak lined with ermine, with a collar opened, and the duke's cipher, in the form of a B, to signify Burgundy, together with flints striking fire, with the motto "*Ante ferit, quam flamma micat*." At the end of the collar hung a golden fleece, with this device, "*Pretium non vile laborum*." The order afterwards became common to all the princes of the house of Austria, as descendants of Mary, daughter of Charles the Bold, last duke of Burgundy, who married Maximilian of Austria in 1477, and now belongs to both Austria and Spain, in conformity with a treaty made 30 April, 1725. The prince of Wales, the duke of York and other royal princes are knights (1895); president Faure, 1898; the duke of Connaught, 16 May, 1902; the shah of Persia, 6 Sept. 1902. GOLDEN LEGEND, "Legenda Aurea."

A name given to a collection of the lives of our Lord, the Old Testament worthies, and many Christian saints, with much Bible narrative, compiled by Giacomo Varragio, or Jacobus de Voragine, a Dominican monk, archbishop of Genoa, 1202-8. The work, which is of a very varied character, has afforded many subjects for poets and painters. A translation of "The Golden Legend," by William Caxton, was printed by him in 1483, and became very popular.

GOLDEN NUMBER, the cycle of nineteen years, or the number that shows the years of the moon's cycle; its invention is ascribed to Meton, of Athens, about 432 B.C. *Pliny*. To find the golden number or year of the lunar cycle, add one to the date, and divide by 19; the quotient is the number of cycles since Christ, and the remainder the golden number. The golden number for 1902, 3; 1903, 4; 1904, 5; 1905, 6; 1906, 7; 1907, 8; 1908, 9; 1909, 10; 1910, 11; 1911, 12.

GORDON'S "NO POPEY" RIOTS, occasioned by the zeal of lord George Gordon, June 2-9, 1780.

On 4 Jan. 1780, he tendered the petition of the Protestant Association to lord North.

On Friday, 2 June, he headed the mob of 40,000 persons who assembled in St. George's Fields, under the name of the Protestant Association, to carry up a petition to parliament for the repeal of the act which granted certain indulgences to the Roman Catholics. The mob proceeded to pillage, burn, and pull down the chapels and houses of the Roman Catholics first, but afterwards of other persons, for nearly six days. The Bank was attempted, the gaols opened (the King's Bench, Newgate, Fleet, and Bridewell prisons). On the 7th, thirty-six fires were seen blazing at one time. At length, by the aid of armed associations of the citizens, the horse and foot guards, and the militia of several counties, then embodied and marched to London, the riot was quelled on the 8th.

210 rioters were killed and 248 wounded, of whom 75 died afterwards in the hospitals, and many were tried, convicted and executed.

The loss of property was estimated at £80,000. Lord George was tried for high treason and acquitted, 5 Feb. 1781. He died a prisoner for libel, 1 Nov. 1793. Alderman Kennett was found guilty of a dereliction of duty, 10 March, 1781.

It was taken by the English admiral Holmes in 1663; seized by the French, 1677; and ceded to them by the treaty of Nimeguen in 1678; taken by the British in 1758, 1779, 1800, and 1804; ceded to France, 1814. Governor Wall was hanged in London, 28 Jan. 1802, for the murder of sergeant Armstrong, committed while governor at Goree in 1782.

GORHAM CASE, see *Trials*, 1849-50.

GORILLA, a powerful ape of W. Africa, about 5 feet 7 inches high. It is a match for the lion, and attacks the elephant with a club. It is considered to be identical with the hairy people called *Gorillai* by the navigator Hanno, in his *Periplus*, about 400 B.C. In 1847 a sketch of a gorilla's cranium was sent to professor Owen by Dr. Savage, then at the Gaboon river, and preserved specimens have been brought to Europe, and a living one died on its voyage to France. In 1851 professor Owen described specimens to the Zoological Society; in 1859 he gave a summary of our knowledge of this creature at the Royal Institution, London; and in 1861 several skins and skulls were

there exhibited by M. Du Chaillu (died 29 April, 1903), who stated that he killed 21 of them in his travels in Central Africa. The gorilla was not known to Cuvier.

A young gorilla landed at Liverpool, 21 June, 1876; went to Berlin; was exhibited at Westminster aquarium, 23 July; died at Berlin, 13 Nov. 1877; another brought to the Crystal palace, England, soon died, Aug. 1879.

An African gorilla landed at Liverpool, Sept. 1881.

Another Sept. 1885.

GOSELLERS, a name given to the followers of Wickliffe, who attacked the errors of popery, about 1377. Wickliffe opposed the authority of the pope, the temporal jurisdiction of bishops, &c., and is called the father of the Reformation.

GOSELS (Saxon *god-spell*, good story). Matthew's and Mark's are conjectured to have been written between A.D. 38 and 65; Luke's 55 or 65; John's, about 97. Irenæus in the 2nd century refers to each of the gospels by name. Dr. Robert Bray was one of the authors of the Society for the Propagation of the Gospel in Foreign Countries, incorporated in 1701. A body termed "Bray's Associates," still exists; its object being to assist in forming and supporting clerical parochial libraries.

GOSPORT (Hampshire), contains the Royal Clarence victualling yard. The great Haslar hospital, near Gosport, was built in 1762.

GOTHARD, see *Gotthard* and *Alps*.

GOTHENBURG SYSTEM (in Sweden and Norway, about 1871). By this alcoholic drinks are dispensed by persons deriving no profit from the sale. It was advocated in England by Mr. Chamberlain, M.P., and much discussed, 1876-7. The bishop of Chester introduced a bill for establishing the system, read first time, 2 March, 1893; rejected by the lords, 6 June, 1893. The system advocated at a meeting at the Duke of Westminster's, 6 July, 1894. Much controversy ensued, 1894-95.

GOTHIC ARCHITECTURE began about the 9th century after Christ, and spread over Europe. Its great feature is the pointed arch; hence it has been suggested to call it the *pointed style*. "Gothic" was originally a term of reproach given to this style by the renaissance architects of the 16th century. Its invention has been claimed for several nations, particularly for the Saracens. The following list is from Godwin's Chronological Table of English Architecture:—

ANGLO-ROMAN—B.C. 55 to about A.D. 250—St. Martin's church, Canterbury.

ANGLO-SAXON—A.D. 800 to 1066—Earl's Barton church, St. Peter's, Lincolnshire.

GOTHIC ANGLO-ROMAN—A.D. 1066 to 1135—Rochester cathedral nave; St. Bartholomew's, Smithfield; St. Cross, Hants, &c.

Revival of Grecian architecture about 1625. Banqueting House, Whitehall, &c.

The revival of Gothic architecture commenced about 1825, mainly through the exertions of A. W. Pugin. The controversy as to its expediency was rife in 1860-1.

GOTHLAND, an isle in the Baltic sea, was conquered by the Teutonic knights, 1397-8; given up to the Danes, 1524; to Sweden, 1645; conquered by the Danes, 1677, and restored to Sweden, 1679. Mariestad almost entirely destroyed by fire, 5 Dec. 1895.

GOTHS, a warlike nation that inhabited the country between the Caspian, Pontus, Euxine, and Baltic seas. They entered Mœsia, took Philippopolis, massacring thousands of its inhabitants; defeated and killed the emperor Decius, 251; but were defeated at Naissus by Claudius, hence surnamed Gothicus, 320,000 being slain, 269. Aurelian ceded Dacia to them in 272; but they long troubled the empire. After the destruction of the Roman western empire by the Heruli, the *Ostrogoths*, under Theoderic, became masters of the greater part of Italy, where they retained their dominion till 553, when they were finally conquered by Narses, Justinian's general. The *Visigoths* settled in Spain, and founded a kingdom, which continued until the country was subdued by the Saracens.

GOTTHARD, ST., near the river Raab, Hungary. Here the Turks, under the grand vizier Kupruli, were totally defeated by the Imperialists and their allies, commanded by Montecuculi, 1 Aug. 1664. Peace followed this great victory. St. Gotthard tunnel, opened 1882. See *Alps*.

GÖTTINGEN (Hanover), a member of the Hanseatic league about 1360. The university "Georgia Augusta," founded by George II. of England in 1734, was opened 1737. It was seized by the French, 1760, and held till 1762. In 1837 several of the most able professors were dismissed for their political opinions. Pop. 1900, 30,234; 1910 (est.), 35,125.

"GOVERNOUR, THE," a moral and educational work, full of anecdotes, by sir Thomas Elyot, first published in 1531; an annotated edition with a glossary by Mr. H. H. S. Croft was published in 1880.

GOWRIE CONSPIRACY. John Ruthven, earl of Gowrie, in 1600, reckoning on the support of the burghs and the kirk, conspired to dethrone James

VI. of Scotland, and seize the government. For this purpose the king was decoyed into Gowrie's house in Perth, on 5 Aug. 1600. The plot was frustrated, and the earl and his brother, Alexander, were slain on the spot. At the time, many persons believed that the young men were rather the victims than the authors of a plot. Their father, William, was treacherously executed in 1584 for his share in the raid of Ruthven, in 1582; and he and his father, Patrick, were among the assassins of Rizzio, 9 March, 1566.

GRAAL, HOLY (Sangreal). The publication of Tennyson's poem "Holy Grail," Dec. 1869, led to much discussion. Tennyson treats it as the cup in which Christ drank at the Last Supper. The mediæval romances treat it as the dish which held the paschal-lamb. The word is probably old French, *gréal*, from the old Latin *gradalis*, a dish.

GRACE, a title assumed by Henry IV. of England, on his accession, in 1399. *Excellent Grace* was assumed by Henry VI. about 1425. Till the time of James I. 1603, the king was addressed by that title, but afterwards by the title of *Majesty* only. "Your Grace" is the manner of addressing an archbishop and a duke in this realm.—The term "*Grace of God*" is said to have been taken by bishops at Ephesus, 431 (probably from 1 Cor. xv. 10), by the Carolingian princes in the 9th century, by popes in the 13th century; and about 1440 it was assumed by kings as signifying their divine right. "*Dei gratia*" was put on his great seal by William II. of England, and on his gold coin by Edward III. The king of Prussia's saying, that he would reign "by the grace of God," gave much offence, 18 Oct. 1861.

GRACE AT MEAT. The ancient Greeks would not partake of any meat until they had first offered part of it, as the firstfruits, to their gods. The short prayer said before, and by some persons after, meat in Christian countries is in conformity with Christ's example, *John vi. 11*, &c.

GRÆCIA MAGNA, colonies planted by the Greeks, 974-748 B.C.; see *Italy*.

GRAFFITI, a term given to the scribbings found on the walls of Pompeii and other Roman ruins; selections were published by Wordsworth in 1837, and by Garrucci in 1856.

GRAHAM'S DIKE (Scotland), a wall built in 209 by Severus Septimus, the Roman emperor, or, as others say, by Antoninus Pius. It reached from the Firth of Forth to the Clyde. Buchanan relates that there were considerable remains of this wall in his time, and vestiges of it are still to be seen.

GRAIN. Henry III. is said to have ordered a grain of wheat gathered from the middle of the ear to be the original standard of weight: 12 grains to be a pennyweight; 12 pennyweights one ounce, and 12 ounces a pound Troy. *Lawson.*

An act for the safe carriage of grain (43 & 44 Vict. c. 43) passed 7 Sept. 1880.

GRAMMARIANS. A society of grammarians was formed at Rome so early as 276 B.C. *Blair.* Apollodorus of Athens, Varro, Cicero Messala, Julius Cæsar, Nicias, Ælius Donatus, Remmius, Palemon, Tyrannion of Pontus, Athenæus, and other distinguished men, were of this class. A Greek grammar was printed at Milan in 1476; Lily's Latin grammar (*Brevis Institutio*), 1513; Lindley Murray's English Grammar, 1795; Cobbett's English Grammar, 1818.—Harris's *Hermes* was published in 1750, Horne Tooke's "*Epea Pteroenta*," or the "*Divisions of Purley*," in 1786, treatises on the philosophy of language and grammar. Cobbett declared Mr. Canning to have been the only purely grammatical orator of his time; and Dr. Parr, speaking of a speech of Mr. Pitt's, said, "We threw our whole grammatical mind upon it, and could not discover one error."

GRANADA, a city, S. Spain, was founded by the Moors in the 8th century, and formed at first part of the kingdom of Cordova. In 1236, Mohammed-al-Hamar made it the capital of his new kingdom of Granada, which was highly prosperous till its subjugation by the "great captain," Gonsalvo de Cordova, 2 Jan. 1492, who is interred in the monastery of St. Geronimo. In 1609 and 1610 the industrious Moors were expelled from Spain by the bigoted Philip III., to the lasting injury of his country. Granada was taken by marshal Soult in 1810, and held till 1812. See *New Granada*. Granada is the seat of an archbishopric. The cathedral, begun in 1529, contains the tombs of Ferdinand and Isabella, and of Philip I. and his consort Juana. The university was founded 1531. Population, 1897, province, 477,768; city, 75,054. In the province of Granada, five towns were destroyed, 690 persons killed, with an immense loss of property, through the earthquakes of 25 Dec. *et seq.* 1884.

GRANARIES were formed by Joseph in Egypt, 1715 B.C. (*Genesis* xli. 48.) There were three hundred and twenty-seven granaries in Rome. *Univ. Hist.* Twelve new granaries were built at Bridewell to hold 6000 quarters of corn, and two store houses for sea-coal to hold 4000 loads, thereby to prevent the sudden dearness of these articles by great increase of inhabitants, 7 James I. 1610. *Stow.*

The Macedonian troops (30,000 foot and 5000 horse) crossed the Granicus in the face of the Persian army (600,000 foot and 20,000 horse). *Justin.* The victors lost fifty-five foot soldiers and sixty horse. The vine was introduced into England in 1552; being first planted at Bloxhall, in Suffolk. In the gardens of Hampton-court palace is a vine, stated to surpass any in Europe; it is 72 feet by 20, and has in one season produced 2272 bunches of grapes, weighing 18 cwt.; the stem is 13 inches in diameter; it was planted in 1769. *Leigh.*

In 1809 sir Humphry Davy investigated into the relations of three forms of carbon, the diamond, graphite, and charcoal. A rude kind of black-lead pencil is mentioned by Gesner in 1505. Interesting results of sir B. C. Brodie's researches on graphite appeared in the International Exhibition of 1862. Now superseded by the zinc-type and other processes.

GRATTAN'S PARLIAMENT, a name popularly given to the Irish parliament, after it had been declared independent, mainly by the exertions of Henry Grattan, by an act passed in England, May, 1782. It came to an end by the passing of the Act of Union, 2 July, 1800. In 1806, Grattan said of his parliament "I have a parental recollection. I sat by her cradle; I followed her hearse." Grattan strongly urged the passing of an act for Catholic emancipation till his death 4 June, 1820.

GRAVITATION, as a supposed innate power, was noticed by the Greeks, and also by Seneca, who speaks of the moon attracting the waters, about 38. Kepler investigated the subject about 1615, and Hooke devised a system of gravitation about 1674. The principles of gravity were demonstrated by Galileo at Florence, about 1633; but the great law on this subject, laid down by Newton in his "Principia," in 1687, is said to have been proved by him in 1670. The fall of an apple from a tree in 1666 is said to have directed his attention to the subject.

Newton says, "I do not anywhere take on me to define the kind or manner of any action, the causes or physical reasons thereof, or attribute forces in a true and physical sense to certain centres, when I speak of them as attracting, or endued with attractive powers." On 15 July, 1867, M. Chasles laid before the Paris Academy of Sciences some letters alleged to be from Newton to Pascal and others tending to show that to Pascal was due the theory of gravitation. The authenticity of these letters was authoritatively denied, and their forgery and his own delusion were acknowledged by M. Chasles before the academy 13 Sept. 1869.

James II., when fleeing from London in 1688, dropped the great seal in the Thames. The great seal of England was stolen from the house of lord chancellor Thurlow, in Great Ormond-street; and carried away, with other property, 24 March, 1784, a day before the dissolution of parliament; it was never recovered, and was replaced the next day. A new seal was brought into use on the union with Ireland, 1 Jan. 1801. A new seal for Ireland was brought into use and the old one defaced, 21 Jan. 1832. GREECE, anciently termed *Hellas*. The name of *Græcia* first occurs in the writings of Aristotle (B.C. 384-322). Greece was so called from an ancient king, *Græcus*, and *Hellas* from another king, *Hellen*, the son of *Deucalion*. From *Hellen's* sons, *Dorus* and *Æolus*, came the *Dorians* and *Æolians*; another son *Xuthus* was father of *Æchæus* and *Ion*, the progenitors of the *Æchæans* and *Ionians*. *Homer* calls the inhabitants indifferently *Myrmidons*, *Hellenes*, and *Æchaïans*. They were also termed *Danaï*, from *Danaus*, king of *Argos*, 1474 B.C. Greece anciently consisted of the peninsula of the *Peloponnesus*, Greece outside of the *Peloponnesus*, *Thessaly*, and the islands. The principal states of Greece were *Athens*, *Sparta*, *Corinth*, *Thebes*, *Acadia*, and afterwards *Macedon* (*all which see*). The limits of Modern Greece are much more confined. Greece became subject to the Turkish empire in the 15th century. The population of the kingdom, established in 1829, 96,810; in 1861, 1,096,810, with the *Ionian isles* (added in 1864), about 1,348,522; in 1870, 1,457,894; in 1896, 2,433,806; 1910 (est.), 3,000,000. The early history is mythic, and the dates *purely conjectural*.

He left a portion of his property in trust to the city and the Mercers' company to endow this college for lectures in divinity, astronomy, music, geometry, civil law, physic, and rhetoric; he died 21 Nov. 1579. The lectures commenced in Gresham's house, near Broad-street, June, 1597 (where the founders of the Royal Society first met in 1645). The buildings were pulled down in 1768, and the Excise office erected on its site, the property having been acquired by the crown for an annuity of 500*l.* The lectures were then read in a room over the Royal Exchange for many years. On the rebuilding of the exchange, the Gresham committee erected the present building in Basinghall-street, which was designed by G. Smith, and opened for lectures, 2 Nov. 1843. It cost above 7000*l.* In 1871 the college acquired a valuable collection of books and pictures, bequeathed by Mrs. Hollier. GRETNA GREEN (Dumfries, S. Scotland, near the border). Here runaway marriages were contracted for many years, as Scots law ruled that an acknowledgment before witnesses made a legal marriage. His first residence was at Megg's hill, on the common or green betwixt Gretna and Springfield, to the last of which villages he removed in 1782. A man named Elliot was afterwards the principal officiating person. The general assembly, in 1826, in vain attempted to suppress this system; but an act of parliament, passed in 1856, made these marriages illegal after that year, unless one of the persons married had lived in Scotland 21 days.

GUEBRES (from the Arabic Kafir, unbeliever), a name given to the descendants of the fire-worshippers of Persia by their Arab conquerors, in the 7th century. They are now represented by the Parsees of Bombay, whither they migrated, see *Parsees*.

GUELPHIC ORDER of knighthood was instituted for Hanover by the prince regent, afterwards George IV., 12 Aug. 1815.

GUELPHS AND Ghibelines, names given to the papal and imperial factions who destroyed the peace of Italy from the 12th to the end of the 15th century (the invasion of Charles VIII. of France in 1495). The origin of the names is ascribed to the contest for the imperial crown between Conrad of Hohenstaufen, duke of Swabia, lord of Wiblingen (hence *Ghibelin*), and Henry, nephew of Welf, or Guef, duke of Bavaria, in 1138. The former was successful; but the popes and several Italian cities took the side of his rival. *Hie Guef* and *Hie Ghibelin* are said to have been used as war-cries in 1140, at a battle before Weinsberg, in Wurtemberg, when Guef of Bavaria was defeated by the emperor Conrad IV., who came to help the rival duke Leopold.* The Ghibelines were almost totally expelled from Italy in 1267, when Conradin, the last of the Hohenstaufens, was beheaded by Charles of Anjou. Guef (of uncertain origin) is the popular name of the present royal family of England; see *Brunswick*.

The **GUELPH EXHIBITION** of pictures and objects of interest connected with the Royal House of Guef, was opened in the New Gallery, Regent street, 31 Dec. 1890; closed, 9 April, 1891. The queen contributed greatly to the exhibition, and gave it its name.

GUIDE-BOOKS for travellers are an English invention. Paterson's "British Itinerary," appeared in 1776; the last edition in 1840; when it was superseded by railway guides. Galignani's "Picture of Paris," 1814. Murray's "Handbook for Travellers on the Continent," the parent of the series, appeared in 1836. The publication of Carl and Fritz Baedeker's foreign guide-books began in 1828 with a handbook for the Rhine in German-French. This was followed by German handbooks for other parts of the continent, which owed much to Murray's handbooks, and included much original matter. The first English editions appeared in 1860. New editions of the red illustrated guide-books, published by Messrs. Ward, Lock, and Co., issued annually.

GUIDES, a corps in the French army, especially charged with the protection of the person of the general, was formed by Bessières, under the direction of Bonaparte, who had been nearly carried off by the enemy, 30 May, 1796. Several squadrons of "guides" were formed in 1848, to guard the ministers. They formed a portion of the imperial guard till Sept. 1870. A regiment of the Indian Army termed the Guides.

GUIENNE, a French province, was part of the dominions of Henry II. in right of his wife Eleanor, 1152. Philip of France seized it in 1293, which led to war. It was alternately held by England and France till 1453, when John Talbot, earl of Shrewsbury, in vain attempted to retake it from the latter.

* It is stated, traditionally, that the emperor condemned all the men to death, but permitted the women to bring out whatever they most valued; on which they carried out their husbands on their shoulders.

GUILDHALL (London) was built in 1411. When it was rebuilt (in 1669), after the great fire of 1666, no part of the ancient building remained, except the interior of the porch and the walls of the hall. The front was erected in 1789; and a new roof built, 1864-5. Beneath the west window are the colossal figures of Gog and Magog, said to represent a Saxon and an ancient Briton; replaced older ones, 1708; renewed, 1837. The hall can contain 7000 persons. Here were entertained the allied sovereigns in 1814, and Napoleon III., 19 April, 1855; and here the city industrial exhibition was held, 6 March, 1866, and the International Botanical banquet, 22 May, 1866. A memorial window, the gift of the cotton workers of Lancashire, to commemorate the munificence of the metropolis towards them in the famine of 1862-4, was uncovered, 15 July, 1868. The prince consort memorial window was unveiled in the presence of prince Arthur, 3 Nov. 1870. A library existed in the Guildhall in 1426, from which books were taken by the protector Somerset in the reign of Edward VI. A new library was founded, 2 June, 1824. This library is open to the public. The new handsome building by Horace Jones was opened by the lord chancellor Selborne, 5 Nov. 1872; see *London*. GUILDS. Associations of men of the same class or trade, formed for mutual aid and protection; in England, of Saxon origin, about the 8th century. In the middle ages there were religious, social, mercantile, and craft guilds. Some of the London livery companies were formed out of the merchant and craft guilds in the 13th century. See *Companies*.

The guild of Corpus Christi, York, had 14,800 members when a return respecting these guilds was ordered to be made, 1388.

Lytton, at Stevenage), consisting of thirteen dwellings, retreats for artists, scholars, and men of letters, which were completed and inaugurated, 29 July, 1865.

The revival of religious guilds began in 1851, with that of St. Alban, which held its 21st anniversary 20 June, 1872.

GUILLotine, an instrument for causing immediate and painless death, named after its supposed inventor, a physician named Joseph Ignatius Guillotin. In 1866 M. Dubois, of Amiens, stated that the idea only was due to Guillotin, who at a meeting of the legislative assembly in 1789 expressed an opinion that capital punishment should be the same for all classes. Accordingly, at the request of the assembly, M. Louis, secretary of the "Académie de Chirurgie," submitted to it on 20 March, 1792, a mode of capital punishment, "sure, quick, and uniform," which he had invented. The first person executed by it was a highway robber named Pelletier, on 25 April; and Dangremont was its first political victim, 21 Aug. following. Guillotin died in 1814. The guillotine at Paris was burnt by the communist insurgents, 7 April, 1871. A similar instrument (called the *Mannaia*) is said to have been used in Italy, at Halifax in England (see *Halifax*), and in Scotland, there called the Maiden and the Widow. See *Gagging*.

Reduced at various times; in 1717 to 21s. In 1810 guineas were sold for 22s. 6d.; in 1816, for 27s. In 1811 an act was passed forbidding their exportation, and their sale at a price above the current value, 21s. GUN, see *Artillery*, *Cannon*, *Fire-arms*.—**GUN-CLUR**, for pigeon-shooting, founded by sir Gilbert East in 1862.

GUN-COTTON, a highly explosive substance, invented by professor Schönbein, of Basel, and made known in 1846. It is purified cotton, steeped in a mixture of equal parts of nitric acid and sulphuric acid, and afterwards dried, retaining the appearance of cotton wool. See *Collodion*. Its nature was known to Braconnot and Pelouze.

The diet of Frankfort voted, 3 Oct. 1846, a recompense of 100,000 florins to professor Schönbein and Dr. Bettger, as the inventors of the cotton powder, provided the authorities of Mayence, after seeing it tried, pronounced it superior to gunpowder as an explosive.

Improvements were made in the manufacture of gun-cotton by an Austrian officer, Baron von Lenk, about 1852, and it was tried by a part of the Austrian army in 1855, but did not obtain favour.

In 1862 details of the manufacture were communicated by the Austrian government to our own government, and Mr. (late sir Frederick) Abel, our war-office chemist, was directed to experiment on the constitution and desirability of gun-cotton. The British Association also appointed a scientific committee to consider its merits. A complete decision was not arrived at.

The first trial of English-made gun-cotton was made in the spring of 1864, at the manufactory at Stowmarket, Suffolk, by Messrs. Prentice.

There was manufactured, by a company, the "patentsafety gun-cotton," according to Mr. Abel's patent (including the pulping, compressing, and wet processes), based on researches commenced in 1866. The cotton was said to be explosive by detonation, and not by ignition. A great explosion took place at Stowmarket; 24 persons were killed (including A. E. H. and W. R. Prentice, managers); about 60 were dreadfully wounded, and nearly the whole town was destroyed as if by a bombardment, 11 Aug. 1871.

The verdict at the inquest attributed the explosion to the culpable "addition of sulphuric acid to the gun-cotton subsequent to its passing the tests required by government," 6 Sept. 1871.

A government commission, appointed in Sept. to consider the manufacture and use of gun-cotton, reported in favour of both, with special regard to compressed gun-cotton, 13 Dec. 1871.

Another report recommended this gun-cotton to be stored wet, with drying apparatus near; and to be kept in sligher boxes, 25 July, 1872.

Mr. E. O. Brown, of the war department, Woolwich, discovers that wet gun-cotton can be exploded by concussion by a detonating fuse, about Nov. 1872.

It is used as an explosive agent in mining, &c.

GUN-CLOTH, made on a similar principle, was patented by Mr. W. A. Dixon, about 1866.

COTTON-GUNPOWDER, patented by Mr. R. Punshon, 1871. A modified form was tried and reported successful, near Faversham, 3 Feb. 1875. See *Irrory*.

GUNPOWDER. The invention of gunpowder is generally ascribed to Bertholdus or Michael Schwartz, a Cordelier monk of Goslar, south of Brunswick, in Germany, about 1320. But many writers maintain that it was known much earlier in various parts of the world. Some say that the Chinese and Hindoos possessed it centuries before. Its composition, moreover, is expressly mentioned by Roger Bacon, in his treatise *De Nullitate Magie*. He died in 1292 or 1294. Various substitutes for gunpowder have been invented, such as the white gunpowder of Mr. Horsley and Dr. Ehrhardt, and gun-paper by Mr. Hochstötten. A new gunpowder by M. Newmayer, of Toya, near Leipsic, was discussed in Nov. 1866. "Pellet gunpowder" was ordered to be used in gun-charges in

the army, March, 1868. An act to amend the law concerning the making, keeping, and carriage of gunpowder, &c. was passed 28 Aug. 1860, and other acts since. See *Birmingham*, 1870. In May, 1872, a company was formed to manufacture Mr. R. Punshon's patent cotton-gunpowder, asserted to be very safe and controllable. The manufacture of the German "brown" or "cocoa" powder was set up at Chilworth in Surrey, 1886. See *Chronoscope*.

The use of gunpowder was denounced by Ariosto, 1516; by Jean Marot, 1532; by Cervantes, 1604; termed "villanous salt-petre" by Shakspeare, about 1598.

ENGLISH WAR GUNPOWDER: 75 parts nitrate of potash (saltpetre); 10 sulphur; 15 carbon. These proportions may be slightly varied.

W. Hunter, after a careful examination of the question, in 1847, thus states the result:—"July and August, 1346, may be safely assumed to be the time when the explosive force of gunpowder was first brought to bear on the military operations of the English nation."

Above 11 tons of gunpowder on board the Lottie Sleigh, in the Mersey, exploded; much damage done in Liverpool and Birkenhead, but no lives lost, 16 Jan. 1864.

About 104,000 lbs. of gunpowder exploded at the Belvedere powder magazines of Messrs. Hall & Co., at Plumstead, near Woolwich; 13 persons perished, and the shock was felt at 50 miles' distance, 1 Oct. 1864. Searching inquiries were made into the circumstances, and new regulations for the keeping and transmission of powder issued in November; see *invent*.

Mr. Gale, a blind gentleman of Plymouth, on 22 June, 1865, patented his method of rendering gunpowder *unflammable* by combining with it finely powdered glass, which can be readily separated by a sieve when the powder is required for use. Successful public experiments were made.

Mr. Gale exhibited his process before Queen Victoria at Windsor, 10 Nov. 1865, and it was severely tested at a martello tower, near Hastings, 20 June, 1866. The attainment of perfect security was still doubtful. Gale's Protected Gunpowder company was formed, Oct. 1865, and wound up, March, 1867.

Great explosion at Messrs. Hall's powder-mills, near Faversham; 11 men killed, much damage done; shock felt at Canterbury, 10 miles off, 28 Dec. 1867. Another explosion about 21 Dec. 1868.

Dixon & Beck's works blown up; 9 lives lost, 25 July, 1868.

Explosion at Hounslow mills, 3 lives lost. 6 Sept. 1872; again one life lost and great destruction of property, 3 May, 1887.

Milner's powder-magazines placed in fire at Woolwich arsenal and found secure, 8, 9 Oct. 1872.

About 5 tons of gunpowder in barrels exploded in the barge *Tilbury*, on the Regent's canal, near the North Bridge-gate, Regent's-park, nearly 5 A.M. 2 Oct. 1874. Three men on the barge killed; shock felt about 30 miles off; destruction extended over about a square mile; some houses thrown down; very many windows blown in; the house of Mr. Alma-Tadema, the artist, much injured.

The powder was sent by Pigou and Wilks to Derbyshire for blasting purposes.

GUNPOWDER PLOT, for springing a mine under the houses of parliament, and destroying the king, lords, and commons there assembled, was discovered on 4 Nov. 1605. It was projected by Robert Catesby early in 1604, and several Roman Catholics of rank were in the plot. Guy Faux was detected in the vaults under the house of lords, hired for the purpose, preparing the train for being fired on the next day. Catesby and Percy (of the family of Northumberland) were killed at Holbeach house, whither they had fled, 8 Nov.; and Guy Faux, sir Everard Digby, Rookwood, Winter, and others, were executed, 30, 31 Jan. 1606. Henry Garnet, a Jesuit, suffered as an accomplice, 3 May following. An anonymous letter sent to lord Montague led to the discovery. It contained the following words, "Though there be no appearance of any stir, yet I say they shall receive a terrible blow this parliament, and yet they shall not see who hurts them." The vault called Guy Faux cellar, in which the conspirators lodged the barrels of gunpowder, remained till 1825, when it was converted into offices. The vaults are searched with much ceremony at the opening of each session of Parliament.

De Almeida and Montgomery, at the Society of Arts, in 1843. As a non-conductor of electricity it is invaluable in constructing submarine telegraphs, an application suggested by Faraday and Werner Siemens independently, 1847. 70,176 cwt. were imported into the United Kingdom in 1890; in 1900, 126,059 cwt.; 1908, 31,928 cwt.

GUY'S HOSPITAL (London). Thomas Guy, a wealthy bookseller, after bestowing large sums on St. Thomas's, determined to found a new hospital. At the age of seventy-six, in 1721, he commenced the present building, and lived to see it nearly completed. GYMNASIUM, a place where the Greeks performed public exercises, and where philosophers, poets, and rhetoricians repeated their compositions. In wrestling and boxing the athletes were often naked (*gymnos*), whence the name. A London gymnastic society, formed in 1826, did not flourish. In 1862, M. Ravenstein set up another gymnastic association. The German Gymnastic Institution, in St. Pancras-road, London, was opened on 29 Jan. 1865, and a large and perfect gymnasium at Liverpool was inaugurated by lord Stanley, 6 Nov. 1865. A London athletic club existed in Nov. 1866. Since then gymnastics have been much cultivated. An international athletic congress opened in Paris, 16 June, 1894.

GYMNOSOPHISTÆ, a set of naked philosophers in India. Alexander (about 324 B.C.) was astonished at the sight of men who seemed to despise bodily pain, and endured tortures without a groan. *Pliny*.

GYPSIES, GIPSIES, or EGYPTIANS (French, *Bohémiens*; Italian, *Zingari*; Spanish, *Gitanos*; German, *Zigeuner*); vagrants, supposed to be descendants of low-caste Hindoos expelled by Timour, about 1399. They appeared in Germany and Italy early in the 15th century, and at Paris in 1427. In England an act was made against their itinerancy, in 1530; and in the reign of Charles I. thirteen persons were executed at one assizes for having associated with gypsies for about a month.

The gypsy settlement at Norwood was broken up, and they were treated as vagrants, May, 1797. There were in Spain alone, previously to 1800, more than 120,000 gypsies, and many communities of them yet exist in England. Notwithstanding their intercourse with other nations, their manners, customs, visage, and appearance are almost wholly unchanged, and their pretended knowledge of futurity gives them power over the superstitious. Esther Faa was crowned queen of the gypsies at Blyth, on 18 Nov. 1860. The Bible has been translated into gypsy dialects. Gypsy parliaments are occasionally held. George Smith, king of the gypsies, Falcoun hall, Edinburgh, protested against the Movable Dwellings bill, 10 Jan. 1891. The Gypsy Lore society, founded in 1888, had 70 members in 1891, and published a journal.

GEORGE BORROW fraternised with the gypsies, and wrote several works describing his adventures, especially "The Zincali" (1841); "The Bible in Spain" (1842); "Lavengro" (1850); and a "Dictionary of the Gypsy

Language" (1874). He was born in 1803, and died in Aug. 1881.

GYROSCOPE (from *gyrere*, to revolve), the name of a rotatory apparatus invented by Fessel of Cologne (1852), and improved by professor Wheatstone and M. Foucault of Paris. It is similar in principle to the rotatory apparatus of Bohnenberger of Tübingen (born 1765, died 1831).—The gyroscope, by exhibiting the combined effects of the centrifugal and centripetal forces, and of the cessation of either, illustrates the great law of gravitation.

Tested when fitted to submarines and ships during . . . 1908
The gyroscope applied to a car designed to run on a single track, by Mr. Louis Brennan. A successful demonstration was carried out at the Brennan factory (New Brompton) with a car 40 ft. in length, 22 tons in weight, and a capacity of 10-15 tons. The 2 gyroscopes weighed 1½ tons each; diameter, 3 ft. 6 in., and made 3,000 revolutions per minute . . . 20 Nov. 1909

HABEAS CORPUS. The subjects' *Writ of Right*, passed "for the better securing the liberty of the subject," 31 Charles II. c. 2, 27 May, 1679. If any person be imprisoned by the order of any court, or of the queen herself, he may have a writ of habeas corpus, to bring him before the court of queen's bench or common pleas, which shall determine whether his committal be just. This act (founded on the old common law) is next in importance to *Magna Charta*. The *Habeas Corpus* act can be suspended by parliament for a specified time when the emergency is extreme. In such a case the nation parts with a portion of its liberty to secure its own permanent welfare, and suspected persons may then be arrested without cause or purpose being assigned. *Blackstone*.

The constitution of the United States provides that "the privilege of habeas corpus shall not be suspended, unless when, in cases of rebellion or invasion, the public safety may require it;" but does not specify the department of the government having the power of suspension. A series of contests on this subject between the legal and military authorities began in Maryland, May, 1861.

In consequence of the affair of John Anderson (see *Slavery in England*, note), an act was passed in 1862, enacting that no writ of *Habeas Corpus* should issue out of England into any colony, &c., having a court with authority to grant such writ.

HAIR. In Gaul, hair was much esteemed, hence the appellation *Gallia comata*; cutting off the hair was a punishment. The royal family of France held it as a privilege to wear long hair artfully dressed and curled. "The clerical tonsure is of apostolic institution!" *Isidorus Hispalensis*. Pope Anicetus forbade the clergy to wear long hair, 155. Long hair was out of fashion during the protectorate of Cromwell, and hence the term *Round-heads*; in 1795; and also 1801.—*Hair-powder* came into use in 1590; and in 1795 a tax of a guinea was laid upon persons using it, which yielded at one time 20,000*l.* per annum. HAMPTON COURT PALACE (Middlesex), built by cardinal Wolsey on the site of the manor-house of the knights-hospitallers, and in 1525 presented to Henry VIII.; perhaps the most splendid offering ever made by a subject to a sovereign. Here Edward VI. was born, 12 Oct. 1537; here his mother, Jane Seymour, died, 24 Oct. following; and here Mary, Elizabeth, Charles, and others of our sovereigns resided. Much was pulled down, and the grand inner court built by William III. in 1694, when the gardens, occupying 40 acres, were laid out. The vine was planted 1769. (*See Grapes.*) Here was held, 14, 16, 18 Jan. 1604, the CONFERENCE between the Puritans and the Established church clergy, which led to a new translation of the Bible; *see Conference*. An alarming fire in apartments over the picture gallery extinguished; one woman suffocated, 14 Dec. 1882. By another fire many apartments destroyed and injured, 19 Nov. 1886; estimated damage, 20,000*l.* Alterations and changes in the palace; pictures removed to Kensington palace; Queen Anne's drawing-room opened to the public, 15 July, 1899; Indian troops encamped here, summer, left 15 Aug. 1902. HANAPER OFFICE (of the court of chancery), where writs relating to the business of the subject, and their returns, were anciently kept in *hanaperio* (in a wicker hamper); and those relating to the crown, in *parva бага* (a little bag). Hence the names *Hanaper* and *Petty Bag Office*. The office was abolished in 1842.

HANAU (Hesse-Cassel), incorporated 1303. Here a division of the combined armies of Austria and Bavaria, of 30,000 men, under general Wrede, encountered the French, 70,000 strong, under Napoleon I., on their retreat from Leipzig, 30 Oct. 1813. Both armies suffered severely, but the allies most, and were compelled to retire. The county of Hanau was made a principality in 1803; seized by the French in 1806; incorporated with the duchy of Frankfurt in 1809; restored to Hesse in 1813; which was annexed to Prussia in 1866.

HANDEL'S COMMEMORATIONS. The first was held in Westminster abbey, 26 May, 1784; king George III. and queen Charlotte, and above 3000 persons being present. The band contained 268 vocal and 245 instrumental performers, and the receipts of three successive days were 12,746*l.* These concerts were repeated in 1785, 1786, 1787, and 1791.

Second great commemoration, in the presence of king William IV. and queen Adelaide, when there were 644 performers, 24, 26, 28 June, and 1 July, 1834. Great Handel festival (at the Crystal Palace) on the centenary of his death, projected by the Sacred

Harmonic Society. Grand Rehearsal at the Crystal Palace, 15, 17, 19 June, 1857, and 2 July, 1858. Performances: Messiah, 20 June; Selections, 22 June; Israel in Egypt, 24 June, 1859, when the prince consort, the king of the Belgians, and 26,827 persons were present. There were 2765 vocal and 363 instrumental performers, and the performance was highly successful. The receipts amounted to about 33,000*l.*, from which there were deducted 18,000*l.* for expenses; of the residue (15,000*l.*), two parts accrued to the Crystal Palace Company, and one part to the Sacred Harmonic Society. Handel's harpsichord, original scores of his oratorios, and other interesting relics, were exhibited. Handel festivals (at the Crystal Palace): 4000 performers; highly successful; 23, 25, 27 June, 1862; again, 26, 28, 30 June, 1865; frequently since.

HANDEL SOCIETIES; for publication of Handel's works:—

Founded in London, 1843; first volume issued, 1843-4; society dissolved, 1848; work continued by Cramer & Co. completed, 1855. Founded at Leipzig, in 1856; publications began, 1858. Handel and Haydn Society, Boston, U.S. for performances only; founded 1815.

HANDKERCHIEFS, wrought and edged with gold, used to be worn in England by gentlemen in their hats, as favours from young ladies, the value of them being from five to twelve pence for each in the reign of Elizabeth, 1558. *Stow's Chron.* Paisley handkerchiefs were first made in 1743.

HANGING, DRAWING, AND QUARTERING, said to have been first inflicted upon William Marise, a pirate, a nobleman's son, 25 Hen. III., 1241. Five gentlemen attached to the duke of Gloucester were arraigned and condemned for treason, and at the place of execution were hanged, cut down alive instantly, stripped naked, and their bodies marked for quartering, and then pardoned, 25 Hen. IV. 1447. *Stow.* The Cato-street conspirators (*which see*) were beheaded after death by hanging, 1 May, 1820. Hanging in chains (pirates, murderers, and others), an old custom, was abolished in 1834; *see Death*.

HANGO BAY (Finland). On 5 June, 1855, a boat commanded by lieutenant Geneste left the British steamer *Cossack* with a flag of truce to land some Russian prisoners. They were fired on by a body of riflemen, and five were killed, several wounded, and the rest made prisoners. The Russian account, asserting the irregularity to have been on the side of the English, was not substantiated.

HANOVER (N. W. Germany), successively an electorate, and a kingdom, chiefly composed of territories which once belonged to the dukes of Brunswick (*which see*).  uncle John, duke of Calenberg; created ELECTOR

HANSE TOWNS. The Hanseatic league
 (from *hansa*, a-sociation), formed by port towns in
 Germany against the piracies of the Swedes and
 Danes: began about 1140; the league signed 1241.
 At first it consisted only of towns situate on the
 coasts of the Baltic sea, but in 1370 it was composed
 of sixty-six cities and forty-four confederates. The
 league proclaimed war against Waldemar, king of
 Denmark, about the year 1348, and against Eric in
 1428, with forty ships and 12,000 regular troops,
 besides seamen. On this several princes ordered
 the merchants of their respective kingdoms to with-
 draw their effects. The Thirty Years' War in Ger-
 many (1618-48) broke up the strength of the asso-
 ciation, and in 1630 the only towns retaining the
 name were Lübeck, Hamburg, and Bremen. The
 league suffered also by the rise of the commerce of
 the Low Countries in the 15th century. Their
 privileges by treaty in England were abolished by
 Elizabeth in 1578.

HANWELL LUNATIC ASYLUM, for
 Middlesex, established 1831.

HAPSBURG (HABSURG or HABICHTS-
 BURG), HOUSE OF, the family from which the
 imperial house of Austria sprang in the 11th cen-
 tury, Werner being the first named count of Habs-
 burg, 1096. Hapsburg was an ancient castle of
 Switzerland, on a lofty eminence near Schintznach.
 Rodolph, count of Hapsburg, became archduke of
 Austria, and emperor of Germany, 1273; see
Austria, and *Germany*.

HARBOURS. England has many fine natural
 harbours; the Thames (harbour, dock, and depôt),
 Portsmouth, Plymouth, &c. Acts for the improve-
 ment of harbours, &c., were passed in 1847, 1861,
 and 1862.

HARFLEUR, seaport, N.W. France, taken
 by Henry V., 22 Sept. 1415.

HARLAW (Aberdeenshire), the site of a
 desperate indecisive battle between the earl of
 Mar, with the royal army, and Donald, the lord of
 the Isles, who aimed at independence, 24 July, 1411.
 This conflict was very disastrous to the nobility,
 some houses losing all their males.

HARLEIAN LIBRARY, containing 7000
 manuscripts, besides rare printed books, collected by
 Robert Harley, afterwards earl of Oxford and
 Mortimer, 1705, *et seq.*, is now in the British
 Museum. A large portion of his life and wealth
 was spent on the collection. He died 21 May,
 1724. The Harleian Miscellany, a selection from
 the MSS. and Tracts of his library, was published
 in 1744 and 1808.

HARLEIAN SOCIETY, founded in 1869 for the publication
 of heraldic visitations, &c.

HARLEY ADMINISTRATION, see *Ox-
 ford*.

HARLEY STREET, London, W. At No.
 139, the house inhabited by Mr. Henriques, the de-

composed body of a woman, stabbed in the breast and covered with chloride of lime, was found 3 June; verdict of coroner's inquest, wilful murder by person unknown, 14 June, 1880.

HARMONICA, or musical glasses (tuned by regulating the amount of water, and played by a moistened finger on the rim), were played on by Gluck in London, 23 April, 1746; "arranged" by Puckeridge and Delaval, and improved by Dr. Franklin in 1760; Mozart, Beethoven, and others composed for this instrument; see *Copophone*. "**HARMONICON**," an excellent musical periodical, edited by W. Ayrtton, Jan. 1823—Sept. 1833.

HARMONICHORD, a keyed instrument, in which sounds are produced by friction, invented by Th. Kauffmann in 1810.

HARMONISTS, a sect, founded in Würtemberg by George and Frederick Rapp, about 1780. Not much is known of their tenets, but they held their property in common, and considered marriage a civil contract. They emigrated to America, and built New Harmony in Indiana in 1815. Robert Owen purchased this town about 1823; but failed in his scheme at establishing a "social" community and returned to England: see *Socialists*. The Harmonists removed to Pittsburg in Pennsylvania in 1822.

HARMONIUM, a keyed instrument, resembling the accordion, the tones being generated by the action of wind upon metallic reeds. The Chinese were well acquainted with the effects produced by vibrating tongues of metal. M. Biot stated, in 1810, that they were used musically by M. Grenié; and in 1827-29, free reed stops were employed in organs at Beauvais and Paris. The best known harmoniums in England are those of Alexandre and Debain, the latter claiming to be the original maker of the French instrument. In 1841, Mr. W. E. Evans, of Cheltenham, produced his English harmonium, then termed the Organ-Harmonica, and by successive improvements he produced a fine instrument, with diapason quality, and great rapidity of speech, without loss of power. Dawes' melody attachment patented 1864.

HARMONY, the combination of musical notes of different pitch, appears not to have been practised by the Greeks.

Hucbald, a Flemish monk, published combinations in his "Enchiridion Musicae," 9th century.

Harmony greatly promoted by Palestrina, and especially by Monteverde.

Jean de Muris wrote "Ars Contrapuncti" in 14th century.

Francis of Cologne described "descant," 1600. Beethoven greatly enlarged the range of harmonic bases.

HARNESS, chariots and the leathern dressings used for horses to draw them, are said to have been the invention of Erichthonius of Athens, who was made a constellation after his death, under the name of *Boötes* (Greek for ploughman), about 1487 B.C.

HARO, CRY OF (*Clameur de Haro*), traditionally derived from Raoul, or Rollo, of Normandy, ancestor of our Norman princes of England. Rollo administered justice so well, that injured persons uttered the cry "*Ha Rou! Ha Rou! A mon aide, mon prince, on me fait tort.*" The cry was raised in a church in Jersey in 1859.

HARP. Invented by Jubal, 3875 B.C. (*Gen. iv. 21*). David played the harp before Saul, 1063 B.C. (*1 Sam. xvi. 23*). The Cimbri, or English Saxons,

had this instrument. The celebrated Welsh harp was strung with gut; and the Irish harp, like the more ancient harps, with wire. Erard's improved harps were first patented in 1795.

One of the most ancient harps existing is that of Brian Boróimhe, monarch of Ireland: it was given by his son Donagh to pope John XVIII., together with the crown and other regalia of his father, in order to obtain absolution for the murder of his brother Teig. Adrian IV. alleged this as being one of his principal titles to the kingdom of Ireland in his bull transferring it to Henry II. This harp was given by Leo X. to Henry VIII., who presented it to the first earl of Clanricarde: it then came into possession of the family of De Burgh; next into that of MacMahon of Clenagh, county of Clare; afterwards into that of MacNamara of Limerick; and was at length deposited by the right hon. William Conyngham in the College Museum, Dublin, in 1782.

The *clavicharp*, fitted like the pianoforte with a keyboard, and played like the pianoforte, was introduced into Brussels and Antwerp by Mlle. Dratz, and played on by her at Prince's Hall, London, 13 March, 1838.

HARPER'S FERRY (Virginia), see *United States*, 1859-62.

HARPSICHORD, see *Pianoforte*, note.

HARRISON'S TIME-PIECE, made by John Harrison, of Foulby, near Pontefract. In 1714, the government offered rewards for methods of determining the longitude at sea; to obviate the irregularities in the rate of clocks by variations of temperature, Harrison invented the method of compensation, before 1720. He came to London, and produced his first time-piece in 1735; his second in 1739; his third in 1758; and his fourth, which procured him the reward of 20,000*l.* offered by the Board of longitude, a few years after. He obtained 10,000*l.* of his reward in 1764, and other sums, more than 24,000*l.* in all, for further improvements in following years. He was born, May, 1693, and died in 1776.

In the patent museum at South Kensington is an eight-day clock made by Harrison in 1715. It strikes the hour, indicates the day of the month, and with one exception (the escapement) its wheels are entirely made of wood.

HARROGATE (Yorkshire). The first or old spa in Knaresborough forest was discovered by capt. Slingsby in 1571: a dome was erected over the well by lord Rosslyn in 1786. Two other chalybeate springs are the Alum well and the Towit spa. Sulphureous well discovered 1783. Theatre was erected 1788. Bath hospital erected by subscription 1825. Kursaal (cost 40,000*l.*) opened 27 May, 1903. Pop., 1901, 28,423.

HARROW-ON-THE-HILL SCHOOL (Middlesex), founded and endowed by John Lyon in 1571. To encourage archery, the founder instituted a prize of a silver arrow to be shot for annually on the 4th of August; but the custom has been abolished. Lord Palmerston, sir R. Peel, the statesman, and lord Byron, the poet, were educated here. The school building suffered by fire, 22 Oct. 1838. The school arrangements were modified by the public schools act, 1868. Charles II. called Harrow church "the visible church." Fire, 8, 9 Feb. 1896.

HARTLEPOOL, E. Durham, an ancient seaport, said to have been burnt by the Danes, 800,

fortified by the Bruces and others, and chartered by John. The foundation of West Hartlepool, with its harbour, docks, churches, &c., is due to the sagacity, skill, and energy of Mr. Ralph Ward Jackson. The work began in 1844, and the harbour was opened 1 June, 1847. The population, about 400 in 1840, was 16,998 in 1881; and 22,723 in 1901. West Hartlepool, 1901, 62,614.

HARTLEY COAL MINE (Northumberland). On 16 Jan. 1862, one of the iron beams, about 20 tons weight, at the mouth of the ventilating shaft, broke and fell, destroyed the brattice, divided the shaft, and carried down sufficient timber to kill five men who were ascending the shaft, and buried alive 202 persons, men and boys. Several days elapsed before the bodies could be removed. Much sympathy was shown by Queen Victoria and the public, and about 70,000*l.* were collected for the bereaved families. The coroner's verdict asserted the necessity of two shafts to coal mines, and recommended that the beams of colliery engines should be of malleable instead of cast iron.

HARTWELL (Buckinghamshire), the retreat of Louis XVIII., king of France, 1807-14. He landed in England at Yarmouth, 6 Oct. 1807, took up his residence at Gosfield-hall, in Essex, and afterwards came to Hartwell, as the count de Lille. His consort died here in 1810. On his restoration, he embarked at Dover for France, 24 April, 1814. See *France*.

HARUSPICES, priests or soothsayers, of Etruscan origin, who foretold events from observing entrails of animals. They were introduced to Rome by Romulus (about 750 B.C.), and abolished by Constantine, A.D. 337, at which time they were seventy in number.

HARVARD COLLEGE, Cambridge (Massachusetts, North America), was founded by the general court at Boston, on 28 Oct. 1636. It derived its name from John Harvard, of Emmanuel College, Cambridge, who bequeathed to it his library and 779*l.* in 1638. Present annual income now (1905) over \$1,000,000. Chiefly under the management of the state until 1865, when the government was vested in a board of 30 overseers. Among the university buildings are the Agassiz museum of comparative zoology, the Peabody museum of American archaeology, the memorial hall erected in honour of the alumni who fell in the Civil war, and the theatre. 250th anniversary of its foundation kept 6-8 Nov. 1886. \$50,000 given for the foundation of a museum of Semitic antiquities, 1900.

HARWICH, a sea-port, Essex, a Roman station, and the Saxon Harewic; chartered by Edw. 2nd; absorbed into Essex, 1885.

Near here Alfred defeated the Danish fleet. Parkeston, the new port near Harwich, was constructed in 1882.

HASTINGS, a cinque-port, Sussex; said to owe its name to the Danish pirate Hastings, who built forts here, about 893; but Mr. Kemble thinks it was the seat of a Saxon tribe named Hastings. At Senlac, now Battle, near Hastings, more than 30,000 were slain in the conflict between Harold II. of England and William duke of Normandy, the former losing his life and kingdom, 14 Oct. 1066, his birthday. He and his two brothers were interred at Waltham abbey, Essex. The new town, St. Leonard's-on-sea, was begun in 1828. Population, 1881, 42,258; 1891, 52,340; 1901, 65,523.

HASTINGS' TRIAL. Warren Hastings, governor-general of India, was tried by the peers of Great Britain for high crimes and misdemeanours. Among other charges was his acceptance of a present of 100,000*l.* from the nabob of Oude; see *Chunar, Treaty of*. The trial occupied 145 days, and lasted seven years and three months; commencing 13 Feb. 1788, terminating in his acquittal, 23 April, 1795. Mr. Sheridan's speech on the impeachment excited great admiration.

Hastings was born in 1732; went to India as a writer in 1750; became governor-general of Bengal in 1772; of India, 1773; governed ably, but, it is said, unscrupulously and tyrannically, till he resigned in 1785. The expenses of his trial (70,000*l.*) were paid by the East India Company; and a pension was granted to him. He died a privy-councillor in 1818.

HATELEY FIELD, see *Shrewsbury*.

HATFIELD'S ATTEMPT. On 15 May, 1800, during a review in Hyde-park, a shot from an undiscovered hand was fired, which wounded a young gentleman who stood near king Geo. III. In the evening, when his majesty was at Drury-lane theatre, Hatfield fired a pistol at him. Hatfield was confined as a lunatic till his death, 23 Jan. 1841, aged 69 years.

HATHERLEY'S ACT, see *Bankrupt*.

HATS, first made by a Swiss at Paris, 1404. When Charles VII. made his triumphal entry into Rouen, in 1449, he wore a hat lined with red velvet, and surmounted with a rich plume of feathers. Henceforward, hats and caps, at least in France, began to take the place of chaperons and hoods. *Hénault*. Hats were first manufactured in England by Spaniards in 1510. *Slow*. Very high-crowned hats were worn by queen Elizabeth's courtiers; and high crowns were again introduced in 1783. A stamp-duty laid upon hats in 1784, and in 1796, was repealed in 1811. Silk hats began to supersede beaver about 1820.

None allowed to sell any hat for above 2*od.* nor cap for above 2*s.* 8*d.*, 5 Henry VII. 1489. Every person above seven years of age to wear on Sundays and holidays, a cap of wool, knit, made, thickened, and dressed in England by some of the trade of cappers, under the forfeiture of three farthings for every day's neglect, 1571. HAWAII or **OWHYHEE**, the chief of the 12 islands which constitute the territory of Hawaii, situated in the N. Pacific Ocean. The islands are said to have been discovered in 1542 by Gaetano, and were rediscovered by capt. Cook in 1778, who named them the Sandwich islands, after lord Sandwich, then the first lord of the admiralty. Capt. Cook was killed at Owhyhee by the natives 1779. King Kamehameha I., who died 1819, united the 12 islands into one monarchy, and under his successor, Kamehameha II., idolatry was abolished, 1819-20; the king and his queen visited England, and died in London 1824. In 1840, Kamehameha III. established a constitution, which included an assembly of nobles, and a representative council. The independence of the kingdom was guaranteed by the English and French governments in 1843. A more popular constitution was granted in 1887, but in 1893 a revolution broke out, and the queen Liliuokalani was dethroned, and a republic was proclaimed in 1894. Hawaii was formally annexed to the United States 1898, and became one of its territories in 1900. Population, about 100,000, three-fourths of which are Japanese. HEALTH, GENERAL BOARD OF, was appointed by the act for the promotion of the public health, passed in 1848. This board was reconstructed in Aug. 1854, and sir Benjamin Hall was placed at its head, with a salary of 2000*l.*; succeeded by W. F. Cowper, Aug. 1855, and by Ch. B. Adderley in 1858. In 1858 this board was incorporated into the privy council establishment; Dr. Simon being retained as medical officer. See *Hygiene, Hygeiopolis, Sanitation, Exhibitions, Public Health, &c.*

HEARTH, or CHIMNEY, TAX, on every fire-place or hearth in England, was imposed by Charles II. in 1662, when it produced about 200,000*l.* a year. It was abolished by William and Mary at the Revolution in 1689; imposed again, and again abolished.

HEAT (called by French chemists *Caloric*). Little progress had been made in the study of the phenomena of heat till about 1757, when Joseph Black put forward his theory of latent heat (heat, he said, being absorbed by melting ice), and of specific heat. Cavendish, Lavoisier, and others, continued Black's researches. Sir John Leslie put forth his views on radiant heat in 1804. Count Rumford put forth the theory that heat consists in motion among the particles of matter, which view he supported by experiments on friction (recorded in 1802). This theory (now called the dynamical or mechanical theory of heat, and used to explain all the phenomena of physics and chemistry) has been further substantiated by the independent researches of Dr. J. Meyer of Heilbronn and of Mr. James P. Joule of Manchester, who assert that heat is the equivalent of work done. Mr. Joule, in his papers published 1841-2, laid the foundation of the science of thermo-dynamics, on which he worked till his death, 11 Oct. 1889. The Joule Memorial fund proposed, 30 Nov. 1889, was instituted by the Royal Society, Jan. 1890. In 1854, Sir William Thomson (aft. lord Kelvin), of Glasgow, published his researches on the dynamical power of the sun's rays. Thermo-electricity, produced by heating pieces of copper and bismuth soldered together, was discovered by Seebeck in 1823. A powerful thermo-electric battery was constructed by Marcus of Vienna, in 1865. Professor Tyndall's "*Heat, a Mode of Motion*," first published Feb. 1863, third edition, 1868, sixth edition, 1880. The researches of philosophers are still devoted to this subject; see *Boiling and Calorescence*. Greatest heat in the hot summer of 1868: at Nottingham, in sun, 122.4; in shade, 92.2, 22 July, 1 p.m.: 14 Aug. 1876, 95.7 in the shade; 147 in sun; 26 June, 1878, 95 in the shade.

Sir George Cayley invented a heated-air engine in 1807, and Mr. Stirling applied it to raising water in Ayrshire in 1818. One invented by Mr. Wenham was described in 1873. Improvements have been made by C. Wm. Siemens. Coal gas is generally employed.—See *Gas Engines*.

Captain John Ericsson constructed a ship, in which caloric, or heat, was the motive power. On 4 Jan. 1853, it sailed down the bay of New York, at the rate of 14 miles an hour, it is said at a cost of 80 per cent. less than steam. Although caloric engines were not successful, capt. Ericsson continued his experiments, and patented an improved engine in 1856. In 1868 he proposed condensation of the sun's rays, and their employment as

a motive power; in March, 1829, he exhibited his apparatus in New York shortly before his death, aged 86.

HECLA, MOUNT (Iceland). Its first recorded eruption is 1004. About twenty-two eruptions have taken place, according to Olsson and Paulson. Great convulsions of this mountain occurred in 1766, since when a visit to the top in summer is not attended with great difficulty. Perhaps the most awful volcanic eruption on record took place in 1784-5, when rivers were dried up, and many villages overwhelmed or destroyed. The mount was in a state of violent eruption from 2 Sept. 1845, to April, 1846. Three new craters were formed, from which pillars of fire rose to the height of 14,000 English feet. The lava formed several hills, and pieces of pumice stone and scoria of 2 cwt. were thrown to a distance of a league and a half; the ice and snow which had covered the mountain for centuries melted into prodigious floods.

HEGIRA, ERA OF THE, dates from the flight (Arabic *hejra*) of Mahomet, from Mecca to Medina, on the night of Thursday, 15 July, 622. The era commences on the 16th. Some compute this era from the 15th, but Cantemir proves that the 16th was the first day. 33 of its lunar years are equal to 32 of those of the vulgar era.

The British East India Company settled here in 1651; and the island was alternately possessed by the English and Dutch until 1673, when Charles II., on 12 Dec., assigned it to the company once more. St. Helena was the place of Napoleon's captivity, 15 Oct. 1815; and here he died, 5 May, 1821. His remains were removed in 1840, and interred at the Hôtel des Invalides, Paris; see *France*, 1840. HELIOGRAPHY (from *helios*, the sun).

A system of telegraphing by mirrors flashing the rays of the sun, said to have been employed by the ancients in the time of Alexander about 333 B.C.

A portable heliograph, invented by Mr. H. Mance, of the Persian telegraph department, was announced in 1875. It was employed in India, 1877-78; in the Afghan and Zulu campaigns, 1879-80, and S. African war, 1899-1902. See also *Photography*.

HELIO METER, an instrument for measuring the diameters of the sun, moon, planets, and stars, invented by Savary, in 1743; applied by M. Bouguer, in 1744. A fine heliometer, by Repsold of Hamburg, was set up at the Radcliffe observatory, Oct. 1849.

HELIO POLIS; see *Baalbec* (in Syria). The name was also given to a city in Lower Egypt (the biblical On or Bethshemesh) in the earliest known times, a chief seat of the worship of the sun. It suffered much by the Persian invasion, 525 B.C., and was in ruins in the time of Strabo, who died about A.D. 24.

HELIO SCOPE (a peculiar sort of telescope, prepared for observing the sun so as not to affect the eye), was invented by Christopher Scheiner in 1625.

HELLAS, in Thessaly, the home of the Hellenes and the Greek race, which supplanted the Pelasgians from the 15th to the 11th century B.C., derived its name from Hellen, king of Phthiotis, about 1600 B.C. The Hellenes separated into the Dorians, Æolians, Ionians, and Achæians. The present king of Greece is called "king of the Hellenes;" see *Greece*.

HELLESPONT (now the Strait of the Dardanelles) was named after Helle, daughter of Athamas, king of Thebes, who was drowned here. According to the legendary story of the loves of Hero of Sestos, and Leander of Abydos, Leander was drowned in a tempestuous night as he was swimming across the Hellespont (about one mile), and Hero, in despair, threw herself into the sea, dated seventh century B.C. Lord Byron and lieutenant Ekenhead also swam across, 3 May, 1810. See *Xerxes*.

HELMETS, among the Romans, were provided with a vizor of grated bars, to raise above the eyes, and beaver to lower for eating; the Greek helmet was round, the Roman square. Richard I. of England wore a plain round helmet; but most of the English kings had crowns above their helmets. Alexander III. of Scotland, 1249, had a flat helmet, with a square grated vizor, and the helmet of Robert I. was surmounted by a crown, 1306. The helmet is the general headdress of the British Army, the broad-brimmed Colonial patterns being found most serviceable. Helmets were adopted by the Spanish troops during the Melilla operations against the Moors, 1909. *Gwillim*.

HELOTS, *captives*, derived by some from the Greek *helein*, to take; by others from Helos, a city which the Spartans hated for refusing to pay tribute. The Spartans, it is said, ruined the city, reduced the Helots to slavery, and called all their slaves and prisoners of war *Helots*, 700 B.C. The number of the Helots was much enlarged by the conquest of Messenia, 668 B.C.; and is considered to have formed four-fifths of the inhabitants of Sparta. In the Peloponnesian war the Helots behaved with uncommon bravery, and were rewarded with liberty, 431 B.C.; but the sudden disappearance of 2000 manumitted slaves was attributed to Lacedæmonian treachery. *Herodotus*. The connection between the Helots and Helos is now considered mythical.

The Phrygians had a sow; the Thracians, Mars; the Romans, an eagle; the Goths, a bear; the Flemings, a bull; the Saxons, a horse; and the ancient French a lion, and afterwards the fleur-de-lis (*which see*). Heraldry, as an art, is ascribed first to Charlemagne, about 800; and next to Frederick Barbarossa, about 1152; it began and grew with the feudal law. *Mackenzie*. The great English works on Heraldry are those of Barcham or Barkham, published by Gwillim (1610), Edmondson (1780), and Burke's "Armory" (1842; new ed. 1883, contains a history and the arms of above 66,000 British families, &c.). See *Blazonry*, *Crests* and *Armorial Bearings*.

It was conquered by Persia, early in the 16th century; by the Afghans, in 1715; by Nadir Shah, 1731; recovered by the Afghans, 1749. The Persians, baffled in an attempt in 1838, took it 25 Oct. 1856, in violation of the treaty of 1853; and war ensued between Great Britain and Persia. Peace was made in April, 1857; and Herat was restored 27 July following. It was seized again by Dost Mahommed, 26 May, 1863; taken by Yakob Khan, rebelling against his father, 6 May, 1871. HERCULANEUM, an ancient city of Campania, overwhelmed, together with Pompeii, by an eruption of lava from Vesuvius, or 24 Aug. 79. Successive eruptions laid them still deeper under the surface, and all traces of them were lost until excavations began in 1711; and in 1713 many antiquities were found. In 1738 excavations were resumed, and works of art, monuments, and memorials of civilized life were discovered. 150 rolls of MSS. papyri were found in a chest, in 1754; and many antiquities were purchased by sir William Hamilton, and sold to the British Museum, where they are deposited; but the principal relics are preserved in the museum of Portici. The "Antichità di Ercolano," 8 vols. folio, were published by the Neapolitan government, 1757-92.

HEREDITY. The transmission of qualities of like kind of those of the parents has been specially studied by Mr. Francis Galton, F.R.S., who published "Hereditary Genius," 1869, and "Records of Family Faculties," containing tabular data to be filled up, in order to obtain authentic data for his new science of "Eugenics." Money prizes, 5*l.* and upwards, were offered for the best records.

Dr. August Weismann, in his "Studies in the Theory of Descent," English translation, 1882, and in his "Essays on Heredity," &c., 1889, set forth his reasons for opposing the theory, and referred to his researches on the lowest forms of animal life, *protozoa*, &c., and to Darwin's principle of natural selection, which he considers as the only possible theory for explaining the difficulties connected with metamorphoses of species. Much controversy ensued, in which the late prof. G. J. Romanes took a leading part.

HEREFORD was made the seat of a bishopric about 676, Putta being first bishop. The cathedral was founded by a nobleman named Milfride, in honour of Ethelbert king of the East Saxons, who was treacherously slain by his intended mother-in-law, the queen of Mercia. The tower fell in 1786, and was rebuilt by Mr. Wyatt. The cathedral was re-opened after very extensive repairs, on 30 June, 1863. The see is valued in the king's books at 768*l.* per annum. HERETICS (from the Greek *hairesis*, choice). Paul says, "After the way they call *heresy*, so worship I the God of my fathers," 60 (*Acts* xxiv. 14). Heresy was unknown to the Greek and Roman religions. Simon Magus is said to have broached the Gnostic heresy about 41. This was followed by the Manichees, Nestorians, Arians, &c.; see *Inquisition*. It is stated that the promulgation of laws for prosecuting heretics was begun by the emperor Frederick II. in 1220; and immediately adopted by pope Honorius III.

Epiphanius chosen bishop of Constantius in Cyprus, 367, wrote "Panarium," a discourse against heresies, died 402

Visit of the emperor Francis Joseph . . . 3 June, 1910

HESSE (W. Germany), the seat of the Catti, formed part of the empire of Charlemagne; from the rulers of it in his time, the present are descended. It was joined to Thuringia till about 1263, when Henry I. (son of a duke of Brabant and Sophia, daughter of the landgrave of Thuringia) became landgrave of Hesse. The most remarkable of his successors was Philip the Magnanimous (1509), an eminent warrior and energetic supporter of the Reformation, who signed the Augsburg Confession in 1530 and the League of Smalcald in 1531. At his death, in 1567, Hesse was divided into **HESSE-CASSEL** and **HESSE-DARMSTADT**, under his sons William and George, and their descendants played an eminent part in the convulsions of Germany during the 17th and 18th centuries.* In 1803 Hesse-Cassel became an electorate, and in 1806 Hesse-Darmstadt a grand duchy; which titles were retained in 1814. In 1807 Hesse-Cassel was incorporated with the kingdom of Westphalia, but in 1813 the electorate was re-established. Capital, Darmstadt. Population (1875), grand duchy, 884,218; 1900, 1,120,135; 1905, 1,203,175.

HESSE-CASSEL (made an electorate, 1803; incorporated with Westphalia, 1807; restored, 1813).

ELFCTORS.

1803. William I.; born 3 June, 1743; succeeded as landgrave, 1785; made elector, 1803; deprived of his states, 1806; restored, 1813; died 27 Feb. 1821.
1821. William II.; born 28 July, 1777; died 20 Nov. 1847.
1847. Frederic William; born 20 Aug. 1802.

The elector, in 1850, remodelled the constitution given in 1831 (by which the chamber had the exclusive right of voting the taxes), and did not convene the chamber until the usual time for closing the session had arrived, when his demand for money for 1851 was laid before it. The chamber called for a regular budget, that it might discuss its items. The elector dissolved the chamber, and declared his dominions in a state of siege, 7 Sept. 1850.

He fled to Hanover, and subsequently to Frankfurt; and on 14 Oct. he formally applied to the Frankfurt diet for assistance to re-establish his authority in Hesse. On 6 Nov. an Austro-Bavarian force of 10,000 men entered Hesse-Cassel, under the command of Prince Thurn und-Taxis, who fixed his head-quarters in Hanau; and on the next day a Prussian force entered Cassel. The elector returned to his capital, the taxes having been collected under threats of imprisonment, 27 Dec. 1850.

The constitution of 1831 was abolished, and a new one established, 1852.

The conflict was soon resumed, and continued till, by law of 20 Sept. 1866, Hesse-Cassel was annexed to Prussia, 8 Oct. 1866.

The ex-electors' property sequestered for intriguing against Prussia, 2 Nov. 1868 and Feb. 1869. He died 6 Jan. 1875.

The sum of 471,000*l.* three per cent. stock was transferred to the landgrave of Hesse, for Hessian auxiliaries lost in the American war, at 30*l.* per man, Nov. 1786. The Hessian soldiers were again brought to this realm at the close of the 18th century, and served in Ireland during the rebellion in 1798.

HESSIAN FLY (*Cecidomyia destructor*), the American wheat midge, very destructive to the corn in the United States in 1786, whither it is said to have been brought by the Hessian soldiers in British pay—hence its name.

The crops suffered severely in New York state in 1846 and 1886. It appeared in England in 1788, and was described by sir Joseph Banks. Its appearance here in 1887 occasioned much alarm throughout the country.

HIEROGLYPHICS, literally sacred sculptures or engravings, the representation of objects to express language, used by the ancient Egyptians, Mexicans, and other nations. The Egyptians used about 1700 hieroglyphs, engraved on stone, painted on wood, and written on papyri. They were either phonetic or ideographic. Their invention is mythically ascribed to Athotes. See "Book of the Dead," in article *Death*. Young, Champollion, Rosellini, Lepsius, Brugsch, Mariette, Chabas, De Rougé, Bunsen, Birch, Budge, Hilmy, and others (in the 19th century) have much elucidated Egyptian hieroglyphics; see *Rosetta Stone*. A. Erman's "Egyptian Grammar," English translation by J. H. Breasted, published about July, 1894.

HIGH AND LOW CHURCH sections in the Church of England became prominent in the reign of Elizabeth. High church principles were maintained by Abp. Whitgift, and set forth by Richard Hooker "the judicious" in his *Ecclesiastical Polity*, 1593-7. They were opposed by the Puritans. The contest, hot in the reign of Anne, has continued since. Dr. Sacheverell, preacher at St. Saviour's, Southwark, was prosecuted for two seditious sermons preached (14 Aug. and 9 Nov. 1709) to create apprehension for the safety of the church, and to excite hostility against dissenters. His friends were called High Church and his opponents Low Church, or moderate men, 1720. The queen favoured Sacheverell, and presented him with the rectory of St. Andrew's, Holborn. He died in 1724.

HIGHER CRITICISM. The terms "higher" and "lower" criticism were adopted and are used with specific reference to the criticism of the Bible. *Higher* criticism is the criticism of the literary forms and contents of the Bible, *lower* criticism is the criticism of the text of the Bible—of the original languages in which it was written. The Bible was written by many men and in three languages, Hebrew, Chaldee, and Greek. These languages have become dead languages, but they survive in written documents, and in these languages the Bible in the original is preserved to us. Criticism of the literary forms and contents of the Bible is necessary in order to establish true principles of Biblical interpretation, and to get at the intended and true meaning of the Bible. The doctrine of the divine inspiration of the Bible does not reach to the letter of the Bible, for that would mean the creation of a special and holy language through which to give the Bible to man. The Bible comes to us through human language as it is, and not as we imagine it might be or ought to be. The language is the language of man, and therefore fallible. The text of the Bible therefore depends for its accuracy upon the attention and care of successive generations of copyists. Thus Bible criticism is necessary to ascertain the true text of the Bible, and what its contents really are. In the higher criticism of the Bible there are four questions to be determined:—(1) Its integrity: to decide whether the writing in question is the work of a single author or a combination of writings by more than one author; whether it has received additions by editing in later times, or is in its original condition. What the parts are—which original and which added, and how and when the additions were made. (2) Its authenticity: this asks the question, does the writing bear the author's name, or is it anonymous? If the name is given, is the title a true one or a forgery, or is it anonymous? and if anonymous, what is its use as a writing? (3) Its literary forms: to determine the style and literary method of the various writers. (4) Its credibility: the answer to the question, are the writings which compose the Bible true? The result of the investigations of the higher criticism, so far as it has gone, has been partly destructive, for there were undoubtedly errors both in the Bible itself and also, and to a much greater extent, in its traditional interpretation by orthodox Christians; but this work has also been constructive, by clearing away from the Bible what was untrue, and establishing what is true and divine. The Reformation in the 16th century released the critical mind of Europe, and gave it liberty to work, with the result that a new spirit and method of inquiry arose, and were made use of in the search for the true meaning and worth of the Bible. At this time, it is true, the main effort was put forth in the defence of the original text, and for the simple grammatical exegesis of the Bible as against that of the Vulgate and traditional authority; but both Luther and Calvin worked upon questions of the higher criticism. Calvin, for example, denied that St. Paul was the author of the Epistle to the Hebrews. He also claimed that the Book of Psalms was a collection of psalms, and that David was not the author or even editor of the entire book. Luther denied that the

Epistle of St. James was by an apostle, and was quite willing, apparently, to allow that the whole Pentateuch was not written by Moses. But questions of authorship were not the prominent questions at this time in Biblical inquiry and research. The father of the higher criticism is the German Eichorn, in the last quarter of the 18th century. In the Book of Genesis Eichorn traces the marks of two sets of documents—one Elohist, and the other Jehovistic—and thus makes the book the work of two authors. The critical work begun by Eichorn went on in Germany; but owing to the fact that English divines were at this time engaged in bitter conflict with deism, the higher criticism had very little effect in England. It was not till the 19th century that English scholars really awoke to questions of Biblical criticism. It began with bishop Colenso's attack upon the historical books of the Pentateuch and that of Joshua. Since Colenso's time we have had such scholars as bishop Lightfoot and Robertson Smith, and in the present day there are at work among us upon questions of the higher criticism such men as professors Driver and Kirkpatrick.

HIGHGATE ARCHWAY, over a road made to avoid the hill; first stone laid by Edward Smith, 31 Oct. 1812; toll through ceased, 1 May, 1876. Rebuilding proposed, 1893; completed, 1900. See *London, Nov. 1880*.

HIGHGATE COLLEGE, founded by sir Roger Cholmeley, 1595.

HIGHLANDS (of Scotland), long held by semi-barbarous clans, were greatly improved by the construction of military roads by general Wade, about 1725-6; by the abolition of heritable jurisdiction of feudal rights in 1747, and by the establishment of the Highland and Agricultural Society in 1784; centenary celebrated at Edinburgh, July, 1884. See *Regiments, Crofters*.

Highland Society of London, founded 28 May, 1778. *Highland Land League* held fifth annual conference at Oban, 15 Sept. 1887; Glasgow, Sept. 1893.

HIGHNESS. The title of *Highness* was given to Henry VII.; and this, and sometimes *Your Grace*, was the manner of addressing Henry VIII.; but about the close of the reign of the latter, the titles of "Highness" and "Your Grace" were absorbed in that of "Majesty." Louis XIII. of France gave the title of Highness to the prince of Orange, in 1644; this prince had previously only the distinction of Excellency. Louis XIV. gave the princes of Orange the title of High and Mighty Lords, 1644. *Hénault*.

HIGH PRIEST, see *Priest*.

HIGH TREASON. To regulate the trials for this crime the statute, so favourable to liberty, the 25th of Edward III., 1352, was enacted, by which two living witnesses are required. By an act passed 19 April, 1821, this provision was extended to Ireland, parliament having refused to sanction the sentence of death against the duke of Somerset. In 1800 it was enacted that when the overt act was a direct attempt on the life of the sovereign, the trial should be conducted in the same manner as in the case of an indictment for murder. The trial of John Horne Tooke and others for constructive high treason failed, see *Horne Tooke*, Nov., Dec. 1794. See *Treason*.

The last two cases of execution for high treason:—

I. William Cundell *alias* Connell, and John Smith; tried on a special commission, 6 Feb. 1812, being two of fourteen British subjects taken in the enemy's service in

the isles of France and Bourbon. Mr. Abbot, afterwards lord Tenterden and chief justice, and sir Vicary Gibbs, attorney-general, conducted the prosecution, and Mr. Brougham, aft. lord Brougham, defended the prisoners. The defence was, that they had assumed the French uniform to aid their escape to England. They were hanged and beheaded on the lodge of Horsemonger-lane gaol on 16 March, 1812.

All the other convicts were pardoned, upon condition of serving in colonies beyond the seas.

II. *The Cat-street Conspirators* (which see), executed 1 May, 1820.

"Colonel" Lynch, member-elect for Galway, who fought on the side of the Boers in the S. African war, prosecuted by the crown on the charge of high treason, and tried at the king's bench before the lord chief justice, Mr. Justice Wills, and Mr. Justice Channell, and sentenced to death 23 Jan. 1903. The lord chief justice laid down, "that if a subject, in time of war, joined the king's enemies, for whatever purpose, that was an act of treason." Sentence afterwards commuted to penal servitude for life. Released "on licence," 23 Jan. 1904. Received a free pardon, 9 July, 1907.

On 6 Sept. 1893, near Gohna, in the district of Garhwal, Bengal, nearly the whole of the hill-Matthana fell into the river Birahi Ganga, a tributary of the Alaknanda, damming it up and forming a long deep lake, which gradually increased in size, and eventually overflowed and burst its banks, causing great destruction of buildings, bridges, &c., at Gohna and Hardwar, &c., 26-27 Aug. 1894. This event was anticipated by geologists, and through scientific precautions no loss of life ensued.

Whilst exploring the Nanga Parbat region, Mr. A. F. Mummery and 2 Gurkhas were killed by an avalanche, mid. Aug. 1895.

HISTORY. The Bible, the histories of Herodotus, "the father of history," Thucydides, and the poems of Homer, are the foundations of early ancient history. Later ancient history is considered as ending with the destruction of the Roman empire in Italy, 476. *Modern* history dates from the age of Charlemagne, about 800. Smith (died 1876), who agreed in considering the remains to be those of Carchemish, the ancient capital of the Hittites, captured and annexed by Sargon, king of Assyria (about 721 B.C.) when the nation was thoroughly subdued. The site had been held successively by Hittites, Assyrians, Babylonians, Greeks, Romans, and Arabs.

His "Altaic Hieroglyphs and Hittite Inscriptions" published 1887.

Prof. A. Sayce, in 1879, considered the Hittites to have been in very early times the predominant power in Asia Minor and N. Syria. The investigations of Messrs. Ramsay, Hogarth and Headlam, in 1890, supported by the English Asia Minor Exploration Fund, led to many discoveries which are described in the *Times* of 25 July, 1891. Investigations proceeding, 1905. New discoveries by the French expedition of 1893-94, and by M. E. Chantre, in Cappadocia, in 1898; see capt. HOLSTEIN AND SCHLESWIG (N.W. Germany), duchies once belonging to Denmark. The country, inhabited by Saxons, was subdued by Charlemagne in the beginning of the 9th century, and afterwards formed part of the duchy of Saxony. In 1106 or 1110, Adolphus of Schauenberg became count of Holstein: his descendants ruled till 1459, when Adolphus VII. died without issue, and the states of Holstein and Schleswig elected Christian, king of Denmark, his nephew, as their duke, through fear of his arms. In 1544, his grandson, Christian II., divided his states amongst his brothers, with the condition that the duchies should remain subject to Denmark. The eldest branch of the family reigned in Denmark till the decease of Frederick VII., 15 Nov. 1863. From a younger branch (the dukes of Holstein-Gottorp) descended through marriage, the kings of Sweden from 1751-1818, and the reigning family in Russia since 1762, when the duke, as the husband of Anne, became czar. In 1773, Catherine II. of Russia ceded Holstein-Gottorp to Denmark in exchange for Oldenburg, &c. The duchies were occupied by the Swedes in 1813, but restored to Denmark in 1814, and on 28 May, 1831, constituent assemblies were granted to them. Since 1844 disputes have been rife between the duchies and Denmark, and in 1848 the states-general of the duchies voted their annexation to the German confederacy, in which they were supported by Prussia; war ensued, which lasted till 1850, when they submitted to Denmark. The agitation in the duchies, encouraged by Prussia, revived in 1857. The Germans in Schleswig desired it to be made a member of the German confederation, like Holstein; but both duchies demanded a local government more independent of Denmark, which changes were resisted by that power. For the events of the war of 1864, see *Denmark*. By the convention signed at Gastein (*which see*), 14 Aug. 1865, the government of Holstein was left with Austria, and that of Schleswig with Prussia. The whole of Holstein and part of Schleswig were ceded to Prussia by the treaty of Prague, signed 23 Aug. 1866. The 5th clause, directing North Schleswig to be given to Denmark if the people voted for it, was not acted on, although claimed; and was abrogated, Feb. 1879. Expulsion of Danes, see *Prussia*, Oct. 1898.

HOLY ALLIANCE was ratified at Paris, 26 Sept. 1815, between the emperors of Russia (its originator) and Austria, and the king of Prussia, by which they ostensibly bound themselves, among other things, to be governed by Christian principles in all their political transactions, with a view to perpetuating the peace they had achieved. The compact was severely censured in this country as opposed to rational liberty.

HOLY MAID OF KENT. Elizabeth Barton was incited by the Roman Catholic party to oppose the Reformation by pretending to inspirations from heaven. She foretold the speedy and violent death of Henry VIII. if he divorced Catherine of Spain and married Anne Boleyn, and direful calamities to the nation. She and her confederates were executed at Tyburn, 5 May, 1534.

HOLYOKE, Massachusetts, U.S. A Roman Catholic church here took fire; a panic ensued; and about 80 were burnt or trampled to death, 26, 27 May, 1875.

HOLY PLACES IN PALESTINE. These places have been a source of contention between the Greek and Latin churches for several centuries. In the reign of Francis I. they were placed under Latin monks, protected by the French government; but the Greeks from time to time obtained firman from the Porte invalidating the rights of the Latins, who were at last (in 1757) expelled from the sacred buildings, which were committed to the care of the Greeks by a hattî-scheriff, or imperial ordinance.

The holy sepulchre partially destroyed by fire and rebuilt by the Greeks, who claim additional privileges, and cause fresh dissensions. 1808

The Russian and French governments sent envoys (M. Dashkoff and M. Marcellus) to adjust the dispute; an arrangement prevented by the Greek revolution. 1821

The subject again agitated, and the Porte proposed that a mixed commission should adjudicate on the rival claims. M. Titoff, the Russian envoy, acting on behalf of the Greeks, and M. Lavalette, the French envoy, on that of the Latins, took up the question very warmly. 1850

A firman issued by the Porte, confirming and consolidating the rights previously granted to the Greek Christians, and declaring that the Latins had no right to claim exclusive possession of certain holy places specified, but permitting them to possess a key of the church at Bethlehem, &c., as in former times. 9 March, 1852

The French government acquiesced with much dissatisfaction; but the Russian envoy still desired the key to be withheld from the Latin monks. M. D'Ozeroff made a formal declaration of the right of Russia to protect the orthodox in virtue of the treaty of Kainardji in 1774, and demanded that the firman of 9 March, 1852, should be read at Jerusalem, although it militated against his pretensions, which was accordingly done. The dispute still continued, the Porte being exposed to the attacks of both the Russian and French governments. March, 1853

Prince Menschikoff arrives at Constantinople as envoy extraordinary, and in addition to the claims respecting the holy places, made demands respecting the protection of the Greek Christians in Turkey which led to the war of 1854-6. (See *Russo-Turkish War*). 28 Feb. ..

HOLY ROMAN EMPIRE. The German empire received this title under the emperor Otho I. the great, crowned at Rome by pope John XII., 2 Feb. 962. See *Rome*, and *Germany*.

HOLY ROOD OR CROSS. A festival instituted on account of the recovery of a large piece of the cross by the emperor Heraclius, after it had

been taken away, on the plundering of Jerusalem, about 615. The feast of the invention (or finding) of the Cross is on 3 May; that of the exaltation of the Cross, 14 Sept. At Boxley abbey, in Kent, was a crucifix, called the *Rood of Grace*; at the dissolution it was broken in pieces as an imposture by Hilsey, bishop of Rochester, at St. Paul's cross, London, 1536.

HOLYROOD PALACE (Edinburgh), formerly an abbey, was for several centuries the residence of the monarchs of Scotland. The abbey, of which some vestiges remain, was founded by David I. in 1128, and in the burial-place within its walls are interred several of his successors. The palace is a large quadrangular edifice of hewn stone, with a court within surrounded by piazzas. In the north-west tower is the bed-chamber which was occupied by queen Mary; and from an adjoining cabinet to it David Rizzio, her favourite, was dragged forth and murdered, 9 March, 1566. The north-west towers were built by James V., and the remaining part of the palace was added during the reign of Charles II. The palace was burnt in 1650, and rebuilt in 1659. Great improvements were made in 1857. Queen Victoria held a court here, 30 Aug. 1850; King Edward VII., 12 May, 1903. The late lord Leven and Melville bequeathed 40,000*l.* for the restoration of the chapel at Holyrood palace for use as a chapel for the order of the Thistle, subject to certain specified conditions. Sept. 1906

HOLY SEPULCHRE, a Byzantine church in modern Jerusalem. Fergusson, Robinson, and others, consider the true site of the holy sepulchre to be the mosque of Omar, the "dome of the Rock." The question is still undecided. The order of the Holy Sepulchre was founded by Godfrey of Bouillon, 1099; revived by pope Alexander VI. 1496; re-organised, 1847 and 1868.

premier. New Home Office, Westminster, occupied 6 Aug. 1875.

"HOME, SWEET HOME." The words are attributed to John Howard Payne, an American actor, who died in 1852; the music is said to be Sicilian, but it is probably by sir Henry Bishop, who introduced the song into "Clari, or the Maid of Milan, in 1823."

HOMER'S ILIAD AND ODYSSEY, the earliest and most perfect epic poems in the world. The first begins with the wrath of Achilles, and ends with the funeral of Hector; the second recounts the voyages and adventures of Odussee or Ulysses, after the destruction of Troy. Various dates are assigned to these works, from 962 to 915 B.C.

F. A. Wolf, in his *Prolegomena*, in 1795, argued that the Homeric poems were composed of independent epic songs, collected and arranged by Peisistratus about 550 B.C. This theory occasioned much controversy between scholars and poets; Mr. Andrew Lang, in "Homer and the Epic," vigorously defends "the one author theory," March, 1893.

The first English version of the Iliad, by Arthur Hall, appeared in 1581. The present text is attributed to the time of Pericles, who died B.C. 429. The most celebrated versions of Homer's works are Chapman's, 1616; Hobbes', 1675; Pope's, 1715-25; Cowper's, 1791. The translation of the Iliad by the earl of Derby (1864) is much commended.

HOMICIDE is said to have been tried at Athens by the Areopagites. Among the Jews, wilful murder was capital; but for chance-medley the offender was to flee to one of the cities of refuge, and there continue till the death of the high-priest, 1451 B.C. (*Num. xxxv.*). 9 Geo. IV. c. 31 (1828) distinguishes between justifiable homicide and homicide in its various degrees of guilt, and circumstances of provocation and wilfulness; see *Murder*.

Animals have been tried and punished for killing human beings. A bull was hanged for homicide near the abbey of Beauprès May, 1499

HOMILDON HILL (Northumberland), where the Scots, headed by the earl of Douglas, were defeated by the Percies (among them Hotspur), 14 Sept. 1402. Douglas and the earls of Angus, Murray, Orkney, and the earl of Fife, son of the duke of Albany, and nephew of the Scottish king, with many of the nobility and gentry, were taken prisoners.

HOMILIES in early Christian times were discourses delivered by the bishop or presbyter, in a homely manner, for the common people. Charlemagne's "Homiliarium" was issued 809. The Book of Homilies drawn up by abp. Cramer, and published 1547, and another prepared by an order of convocation, 1563, were ordered to be read in those churches that had not a minister able to compose proper discourses.

HOMŒOPATHY, a hypothesis promulgated in his "Organon of Medicine," 1810, and in other works, by Dr. Samuel Hahnemann, of Leipsic (died 2 July, 1843), according to which every medicine has a specific power of inducing a certain diseased state of the system (*similia similibus curantur*, likes are cured by likes); and if such medicine be given to a person suffering under the disease which it has a tendency to induce, such disease disappears, because two similar diseased actions cannot simultaneously subsist in the same organ. *Brande*. Infinitesimal doses of medicine, such as the millionth of a grain of aloes, have been employed, it is said, with efficacy. The system requires the patient

HOME SECRETARY, see *Secretaries*, and all the administrations under the name of their

to regulate his diet and habits carefully. It has led to a more accurate study of the *materia medica*. Introduced into England, 1827. The Hahnemann hospital was opened in Bloomsbury-square, 16 Sept. 1850. "The World's Convention of Homœopathic Physicians" opened at Philadelphia, 26 June, 1876, London School of Homœopathy, founded 15 Dec. 1876. Under the heading *Odium Medicum*, many controversial letters from allopaths and homœopaths appeared in the *Times*, Jan. 1888.

HOMOUSION AND HOMOIOUSION (*Greek*, same essence, and similar essence or being), terms employed with respect to the nature of the Father and the Son in the Trinity. The orthodox party adopted the former term as a party cry at the council of Nice, 325; the Arians adopted the latter at Seleucia, 359.

HOSPITAL SHOPPING DAY. A scheme
organised, Sept. 1903, by a committee, with lord
Dunraven as chairman, to augment King Edward's
Hospital fund; the king and the prince of Wales
as patron and president signifying their approval.
Shopkeepers of all classes, to the number of
33,000, were invited to give a certain percentage,
according to individual choice, of their takings on
a specified day to the fund, and a special appeal
was made to the public to make extra purchases to
aid the object in view. A large number of firms in
the West-end and in other parts of London
responded favourably to the proposal. The first
"Hospital Shopping Day" took place, 3 Nov. 1903.
Receipts to 17 Nov. 1,027l.; discontinued.

HOST, ELEVATION OF THE, introduced into

HÔTEL DE VILLE, Paris, the residence
of the chief magistrate, the prefect of the Seine, was
begun in 1533, and completed, after his own design,
by Dominico da Cortona, 1628. Here La Fayette
introduced Louis-Philippe, the citizen-king, to the
people, Aug. 1830; and here the republic was pro-
claimed, 26 Feb. 1848. The communists, who had
established themselves here, set fire to the building,
24 May, 1871, after their total defeat. The Hôtel
was reopened 13 July, 1882.

HOURL. The early Egyptians divided the day
and night each into twelve hours, a custom adopted
by Jews or Greeks probably from the Babylonians.
The day is said to have been first divided into hours
from 293 B.C. when L. Papius Cursor erected a
sun-dial in the temple of Quirinus at Rome. Pre-
viously to the invention of water-clocks (*which see*)
158 B.C., the time was called at Rome by public
criers. In England, the measurement of time was,
in early days, uncertain; one expedient was by
wax candles, three inches burning an hour, and six
wax candles burning twenty-four hours, said to
have been invented by Alfred, A.D. 886; see *Day*.

Hour, daily conservative newspaper, first ap-
peared, 24 March, 1873; last time, 11 Aug. 1876.

HOUSE DUTY was imposed in 1695. Its
rate was frequently changed till its repeal. It was
re-imposed as a substitute for the window-tax, in
1851. The duty was reduced for houses rented at
from 20l. to 40l. to 2d., and for those rented at from
40l. to 60l. to 4d. and 6d., 17 April, 1890. In the
year 1872-3 it produced 1,243,818l.; in 1875-6,

HOUSEHOLD SUFFRAGE, after one year's residence, was introduced into parliamentary elections for boroughs, by the reform act passed 15 Aug. 1867. Trevelyan's proposal lost in the commons (287 to 173), 13 May, 1874; (268 to 166), 7 July, 1875; (261 to 165), 30 Aug. 1876; (276 to 220), 29 June, 1877; (271 to 219), 22-23 Feb. 1878; (291 to 226), 4 March, 1879. HOWARD FAMILY. John Howard, son of Margaret, the heiress of the Mowbrays, was created earl marshal and the 7th duke of Norfolk in 1483. He was slain with his master, Richard III., at Bosworth, 22 Aug. 1485. His son was restored to the earldom of Surrey in 1489; in reward for having gained the victory of Flodden, 9 Sept. 1513, he was created the 8th duke of Norfolk, in 1514. Thomas, the 10th duke, was beheaded for conspiracy against queen Elizabeth on behalf of Mary, queen of Scots, in 1572. Henry Fitzalan Howard, now the 21st duke of Norfolk, and the 15th of the Howard family, premier duke and earl of England and hereditary earl marshal, was born in 1847.

HUDIBRAS. The first three cantos of this political satire, by Samuel Butler, appeared in 1653; the other parts in 1664 and 1678.

HUDSON'S BAY, discovered by Sebastian Cabot, 1512, and re-discovered by captain Henry Hudson, when in search of a north-west passage to the Pacific Ocean, 1610, had been visited by Frobisher. The "governor and company of adventurers of England trading to Hudson's Bay," obtained a charter from Charles II. in 1670. The "fertile belt" was settled by lord Selkirk in 1812. For these territories the bishopric of Rupert's Land was founded, 1849. The charter having expired, the chief part of the company's territories, on the proposition of earl Granville, the colonial secretary (9 March, 1869), were transferred to the Dominion of Canada for 300,000l., and a right to claim a certain portion of land within fifty years, and other privileges; the company having consented to this, 9 April, 1869. A portion of the people resisted the annexation, and gen. Louis Riel proclaimed independence and seized the company's treasury, Jan. 1870. On 3 or 4 March he tried and shot Thomas Scott, a Canadian, who had escaped from his custody. Col. (afterwards lord) Wolsley conducted a Canadian expedition to the territories (now named Manitoba), and issued a proclamation to the loyal inhabitants, 23 July, saying "our mission is one of peace." Riel was unsupported and offered no resistance. Extensive explorations by Mr. Tvreil, Dr. Bell, and Mr. Henry O'Sullivan, 1893 *et seq.* See *Manitoba and Western Territories*.

HUE AND CRY, the old common-law process of pursuing "with horn and with voice," from hundred to hundred, and county to county, all robbers and felons. Formerly, the *hundred* was bound to make good all loss occasioned by the robberies therein committed, unless the felon were taken; but by subsequent laws it is made answerable only for damage committed by riotous assemblies. The pursuit of a felon was aided by a description of him in the *Hue and Cry*, a gazette established for advertising felons in 1710. *Ashie*.

HUGUENOT SOCIETY of London, established by sir H. Austen Layard and other descendants of Huguenots, about 15 April, 1885. The society publishes historical works, 1888.

HUGUENOTS, a term (derived by some from the German *Eidgenossen*, confederates; by others from Hugues, a Genevese Calvinist) applied to the Reformed party in France, followers of Calvin. They took up arms against their persecutors in 1561. After a delusive edict of toleration, a great number were massacred at Vassy, 1 March, 1562, when the civil wars began, which lasted with some intermission till the edict of Nantes in 1598 (re-

voked in 1685). The massacre of St. Bartholomew's day, 24 Aug. 1572, occurred during a truce; see *Calvinists, Protestants, Bartholomew, Edict*, and *Camisards*. S. Smiles's "History of the Huguenots," appeared in 1867. The crypt in Canterbury cathedral, assigned to French protestants in 1550, is still used by them for divine worship.

HULSE'S FOUNDATIONS. The rev. John Hulse, who died in 1790, bequeathed his estates in Cheshire to the university of Cambridge for the advancement of religious learning:—by the maintenance of two scholars; the payment of a prize of 40*l.* annually for a theological dissertation; the establishment of the office of Christian advocate (made a professorship of divinity, 1 Aug. 1860); and the payment of a lecturer, to be chosen annually. The first Hulsean lectures were given by the rev. Christopher Benson, in 1820.

HUMAITÁ, a strong post on the river Paraguay, fortified at a great cost with a battery of 300 cannon, by Lopez, the president of Paraguay, and believed to be impregnable, was passed by the Brazilian ironclads, 17 Feb. 1868. On the 19th, Caxias, the Brazilian general, stormed a work to the north of Humaitá, and captured many stores. Humaitá itself, after a severe siege, was abandoned, 24 July, 1868.

HUMANE SOCIETY, ROYAL (London), for the recovery of persons apparently drowned,

was founded in 1774, by Drs. Goldsmith, Heberden, Towers, Lettsom, Hawes, and Cogan, but principally by the last three. The society has above 280 depôts supplied with apparatus. The principal one was erected in 1794, on a spot of ground given by George III. on the north side of the Serpentine river, Hyde-park. The motto of this society is appropriate—"Lateat scintillula forsan"—"a small spark may perhaps lie hid." Nearly 500 persons were relieved in 1887; 544 in 1890; 711 saved, 873 rewards in 1905; 704 saved, 799 rewards in 1908. See *Drowning*, and *Lisbon*, Dec. 1890.

HUMANISM, a name given to the philosophical study of man's personality as distinguished from a class, especially advanced by Petrarch and other energetic advocates of the revival of the study of ancient classic literature, termed the "new learning," and ("*literæ humaniores*") the age of the *renaissance*, in the 14th, 15th, and 16th centuries, whereby freedom of thought and language was greatly promoted.

HUMANITARIAN LEAGUE.—A society of members and workers, irrespective of class or creed, united for the sole purpose of humanising as far as possible the conditions of modern life. Society formed 1891. Its business is to educate public opinion, and so pave the way for further and more advanced legislation. Among the direct results of the League's efforts are the discontinuance of flogging in the Navy; the increased public interest in the criminal law and prison system, which led to the passing of the Prison Act of 1898, the disuse of the tread-wheel, the abolition of the Royal Buckhounds, and the introduction in Parliament of a Spurious Sports Bill, which has at last brought the reform of "blood-sports" within the range of practical politics. Annual meetings. Monthly organ, "The Humanitarian."

HUNGARY, part of the ancient Pannonia and Dacia, was subjected to the Romans about 105, and retained by them till the 3rd century, when it was seized by the Goths, who were expelled about 376 by the Huns. See *Huns*, and *Attila*. After Attila's

death, in 453, the Gepidæ, and in 500 the Lombards held the country. It was acquired by the Avars about 568, and retained by them till their destruction by Charlemagne in 799. About 890 the country was settled by a Scythian tribe, named Vingours or Ungri (whence the German name *Ungarn*) and the Magyars of Finnish origin. The chief of the latter, Arpad (889), was the ancestor of a line of kings (*see below*). The progress of the Magyars westward was checked by their defeat by the emperor Henry the Fowler, 934. HYDRAULIC PRESS, see under *Hydrostatics*.

HYDROCHLORIC ACID or **CHLORHYD- RIC ACID**, the only known compound of chlorine and hydrogen, was discovered by Dr. Priestley, 1772; its constitution determined by Davy, 1810. It is also called muriatic acid and spirit of salt; see under *Alkalies*.

HYDROGEN (from *hydōr*, water). Paracelsus observed a gas rise from a solution of iron in oil of vitriol, about 1500; Turquet de Mayerne discovered its inflammability, 1656; as did Boyle, 1672; Lemyer noticed its detonating power, 1700. In 1766 Cavendish proved it to be an elementary body; and in 1781, he and Watt first showed that in the combination of this gas with oxygen, which takes place when it is burnt, water is produced; subsequently Lavoisier decomposed water into its elements, and gave hydrogen its present name instead of "inflammable air." One volume of oxygen combines with two volumes of hydrogen to form water. Hydrogen is never found in the free state.

In 1877, Cailliet and Wroblewski obtained by rapid expansion of the compressed gas, a condensation or mist, which was supposed to be produced by the liquefaction of hydrogen. Olszewski had seen a few drops of an unknown liquid falling in a glass tube and remaining for a few instants unevaporated, subsequently proved to be due to impurities. Prof. Dewar's paper on "The Density of Hydrogen in Palladium," was published in 1873; "The Absorption of Hydrogen by Palladium at high temperatures, pressures, etc.," was published in 1897. On 10 May, 1893, at the Royal Institution, he produced half a wine-glassful of liquefied hydrogen at 240 deg. centigrade (below zero) in 5 min., and on the 12th he doubted the quantity. On the 12th he reported it to the Royal Society, and on the 16th to the French Academy. By means of this liquid he also, on the 10th, liquefied a mixture of helium and other gas or gases.

Lecture on liquid hydrogen at the Royal Institution, 20 Jan. 1899; further researches; boiling point by exhaustion, 15° of absolute temperature; liquid hydrogen exhibited boiling in a vacuum tube immersed in liquid air, 21° absolute temperature; and experiments with liquid hydrogen and the vitality of seeds; see *Athenæum*, 16 Dec. 1899; hydrogen obtained in the solid state by prof Dewar, 16° absolute scale, reported, Jan. 1900.

HYDROGENIUM, a hypothetical metal. In a paper read before the Royal Society, 7 Jan. 1869, Mr. Thomas Graham, master of the Mint, suggested that a piece of the metal palladium, into which hydrogen had been pressed, became an "alloy of the volatile metal hydrogenium."

HYDROGRAPH, an apparatus invented by capt. Neale, for transmitting sound by water, for the purpose of signalling between ships, lighthouses, &c.; it consists of a transmitter, a receiver, and electric recorder; experiment: were made on the Solent under the auspices of the Trinity Board.—*Times*, 19 Oct. 1893.

HYDROGRAPHY is the description of the surface waters of the earth. The first sea-chart is attributed to Henry the Navigator, in the 16th century. There is a hydrographic department in the British admiralty, by which a series of charts has

been issued. International Hydrographic and Biological congress meets at Stockholm, 15 June, 1899. See *China*, May, 1903.

HYDROMETER, the instrument by which is measured the gravity, density, and other properties of liquids. The oldest mention of the hydrometer occurs in the 5th century, and may be found in the letters of Synesius to Hypatia; but it is not improbable that Archimedes was the inventor of it, though no proofs of it are to be found. *Beckmann*. Archimedes was killed in 212 B.C., and Hypatia was torn to pieces at Alexandria, A.D. 415. "Hypatia," by the rev. Charles Kingsley, appeared in 1853. Robert Boyle described a hydrometer in 1675; Baumé's (1762) and Sykes', about 1818, have been much employed. Modifications of the apparatus have been invented.

HYDROPATHY, a term applied to the treatment of diseases by cold water, practised by Hippocrates in the 4th century B.C., by the Arabs in the 10th century A.D., and revived by Dr. Currie in 1797. A system was suggested in 1825 by Vincenz Priessnitz, of Grafenberg, in Austrian Silesia. The rational part of the doctrine was understood and maintained by Dr. Sydenham, before 1689. Priessnitz died 26 Nov. 1851.

A grand hydropathic establishment at Bushey, Herts, opened, 13 Feb. 1883. Many others exist throughout the kingdom.

HYDROPHOBIA, in man, rabies in animals, M. Pasteur announced his discovery of a method of checking this disease, analogous to vaccination, the system afterwards applied to various diseases.

He operates on monkeys and other animals successfully, May, on dogs, Aug. 1884; on 40 persons 14 Dec. 1885. An international hospital, afterwards termed the Pasteur institute, founded (40,000*l.* subscribed) May, 1886; opened by president Carnot, 14 Nov. 1888. Out of 726 cases treated, 4 deaths reported 12 April, 1886; 1673 persons treated, 1 May, 1888, to 1 May, 1889. The principle much opposed 1886-7. A British commission for inquiry (sir James Paget, Dr. Burdon Sanderson, and others) appointed 12 April, 1886; visits Paris, and reports confidence in M. Pasteur's treatment, 27 June, 1887. M. Pasteur proposes and verifies other applications of his principles, 1887-8. The book, "M. Pasteur, Histoire d'un Savant," was published in 1883; and an English translation by lady Claud Hamilton in 1885.

Reported number of patients by M. Pasteur (he died 28 Sept. 1895) since 1885, 6,950, to 28 June, 1889; 1,830 patients, 7 deaths in 1889; 1,520 patients, 5 deaths, in 1895; 1,308 patients, 4 deaths in 1896; 1,521 patients, 6 deaths in 1897; 1,614 patients, 4 deaths in 1899; 1,321 patients, 8 deaths in 1901; 1,105 patients, 2 deaths in 1902.

HYKSOS, a race, probably of Tatar origin, who overthrew the dynasty of lower Egypt, captured Memphis, and made Avaris (Tanis) the seat of their kingdom. Joseph is supposed to have been vizier to Apepi, one of the Hyksos, or "Shepherd Kings," as they are also called. They were overthrown by Aahmes I. of the 18th dynasty, *cir.* 1700 B.C. See *Egypt*. HYMNS. The song of Moses is the most ancient, 1491 B.C. (*Exod.* xv.) The Psalms date from about 1060 B.C. to about 444 B.C. (from David to Ezra). The hymns of the Jews were frequently accompanied by instrumental music. Paul (A.D. 64) speaks of Christians admonishing one another "in psalms and hymns and spiritual songs" (*Col.* iii. 16.) The composition of hymns for the Christian church is very ancient. The hymns of Dr. Watts (died 1748), of John Wesley (died 1791), and of his brother Charles (died 1788), are used by English churchmen and dissenters. "Hymns, Ancient and Modern," edited by rev. sir Henry Baker, first appeared in 1860; new edition, with revisions, 1904. "A Dictionary of Hymnology," edited by the rev. John Julian, D.D., was published Jan. 1892.

HYPNOTISM (Greek *hypnos*, sleep) or nervous sleep, terms given by Mr. Braid (in 1843) to a sleep-like condition, produced in a person by steadily fixing his mind on one particular object. Minor surgical operations have been performed without pain on persons in this state. Used successfully in cases of mental hysteria, melancholia, morphinomania, certain neurotic skin diseases, functional neurosis, &c. The lecture by R. Heidenhain, at Breslau 19 Jan. 1880, on "Hypnotism or Animal Magnetism," was translated by L. C. Wooldridge, and published in 1888. ICE. Galileo observed ice to be lighter than water, about 1597. See *Congelation*, where is a notice of the ice-making machines of Harrison and of Siebe. In 1841 there were sixteen companies in Boston, U.S., engaged in exporting ice, brought from Wenham lake and Fresh and Spy Ponds, about 18 miles from that city. The trade was begun by Mr. Tudor in 1806. 156,540 tons were sent from Boston alone in 1854. 408,124 tons, value 247,319*l.*, imported 1894; 362,867 tons, value 203,424*l.*, 1902; 367,010 tons, value 181,030*l.*, 1908.

A vessel called *The Spring*, Captain Clare, went to sea from Yarmouth on March 17, 1822, proceeded to Norway, and, north of Trondhjem, took on board a cargo of about 300 tons of ice; arriving in the Thames on May 8. Mr. William Leftwich chartered the vessel, which was stopped at the Thames by the custom house officers, who demanded duty on the ice and detained the ship so long before permitting it to unload that fears were entertained that the ice would be worthless. Ice was not mentioned in the list of custom duties, but finally a duty of 20 per cent. *ad valorem* was imposed. 12*l.* per ton was offered for the cargo, but the owner decided to sell in small lots, which realised much higher prices.

"**ICH DIEN**," *I serve*, the motto under the plume of ostrich feathers found in the helmet of the king of Bohemia slain at the battle of Cressy, at which he served as a volunteer in the French army, 26 Aug. 1346. ICHOLOGY, the science of footprints, treats of the impression made in mud or sand by the animals of former ages. Dr. Duncan discovered the footprints of a tortoise in the sandstone of Annandale, in 1828; since then numerous discoveries have been made by Owen, Lyell, Huxley, and others.

ICHTHYOLOGY, the science of fish. Eminent authors are Aristotle (384—322 B.C.), Willoughby, Ray, Valenciennes, Cuvier, Owen, Agassiz, &c. Yarrell's "British Fishes" (1836-59) is a classical work; see *Fish*.

ICONIUM (Syria). Here Paul and Barnabas preached, 38. Soliman the Seljuk founded a kingdom here in 1074, which lasted till 1307, when it was conquered by the Turks. It had been subdued by the Crusaders in 1097 and 1190; see *Konieh*.

ICONOCLASTS (image-breakers). The controversy respecting images (which had been introduced into churches for popular instruction about 300) was begun about 726, and occasioned much disturbance and loss of life in the Eastern Empire. Leo Isauricus published two edicts for demolishing images in churches in that year, and enforced them with great rigour in 736. The defenders of images were again persecuted in 752 and 761, when Constantine forbade his subjects becoming monks. The worship of images was restored by Irene in 780. This schism was the occasion of the second council of Nice, 787. Theophilus banished all the painters and statuaries from the Eastern Empire, 832. The Iconoclasts were finally excommunicated at the 8th general council at Constantinople, 869-870. This controversy led to the separation of the Greek and Latin churches. Many images in churches were destroyed in Scotland and the Netherlands in the 16th century, and in England during the Reformation and the civil war, 1641-8.

In March, May, July, and October, the 8th Idus was on the 8th of the month, the 7th on the 9th, &c., the first, or Ide, being the 15th. In the other months the 8th Ide fell on the 6th, and the first on the 13th. On the Idus of March (the 15th) 44 B.C., Julius Cæsar was assassinated.

ILLUMINATED BOOKS. The practice of adopting ornaments, drawings, and emblematical figures, and even portraits, to enrich MSS., is of great antiquity. Varro wrote the lives of 700 illustrious Romans, which he embellished with their portraits, about 70 B.C. *Plin. Nat. Hist.* Some beautiful missals and other works were printed in the 15th and 16th centuries *et seq.*, and fine imitations have lately appeared.

ILLUMINATI, heretics who sprang up in Spain, where they were called Alombrados, about 1575. After their suppression in Spain, they appeared in France. One of their leaders was friar Anthony Buchet. A secret society bearing this name, opposed to tyranny and priestcraft, was founded at Ingoldstadt, Bavaria, by Dr. Adam Weishaupt, in May, 1776, and was suppressed in 1784-5.

INDEPENDENTS or CONGREGATIONALISTS, hold that each church or congregation is independent of all others in religious matters; that there is no absolute occasion for synods or councils, whose resolutions may be taken for advice, but not as decisions to be peremptorily obeyed; and that one church may advise or reprove another, but has no authority to excommunicate. Robert Brown preached these doctrines about 1585, but, after 32 imprisonments, he eventually conformed to the established church. A church was formed in London in 1593, when there were 20,000 independents. They were driven by persecution to Holland, where they formed several churches; that at Leyden was under Mr. Robinson, often regarded as the author of *Independency*. In 1616 Henry Jacobs returned to England and founded a meeting-house. Cromwell, himself an independent, obtained them toleration, in opposition to the Presbyterians. The independents published an epitome of their faith, drawn up at a conference at the Savoy, in 1658; and the congregational union of England

and Wales formed in 1831, published their "declaration of faith, order, and discipline," in 1833. In 1851 they had 3244 chapels for 1,067,760 persons in England and Wales; in 1909, 51 county and other associations, with 4,652 churches and preaching stations; 3,198 ministers; 1,696,738 sittings. Annual meetings of the union are held; see *Worship*. The first independents in Scotland were the Glasites (*which see*). The first independent church in America was founded by the followers of John Robinson, at Plymouth, New England, in 1620.

INDEXES OF PROHIBITED BOOKS.

The Index by which the reading of the Scriptures was forbidden (with certain exceptions) to the laity, was confirmed by a bull of pope Clement VIII. in 1595.

The council of Nice (325) forbade magical books.

Pope Paul IV., 1555, began the "Index" published by Pius IV., 1559. The Talmud and heretical books were especially prohibited, causing much dissatisfaction. The Inquisition was engaged in the work, which was organized by the Council of Trent. The Congregation of the Index was instituted and rules laid down.

The Indexes are—1. *Prohibitorius*, of books absolutely forbidden to be read; 2. *Expurgatorius*, of books not to be licensed till purged from error.

Many of the works of the great authors of France, Spain, Germany, and England, are thus prohibited. On 25 June, 1864, Hugo's "Les Misérables" and other books were added to the number, and many others since.

INDICTION, a Roman term originally applied to a tribute of corn, paid every fifteen years, and to the time at which it was paid. The first examples in the Theodosian code are of the reign of Constantius II., who died 361.—In memory of the great victory obtained by Constantine over Maxentius, 8 Cal. Oct. 312, the council of Nice ordained that the accounts of years should be no longer kept by the Olympiads, but by the Indiction, which has its epocha 1 Jan. 313. It was first used by the Latin church in 342.

INDIGO, the dye obtained from the woad plant, *isatis tinctoria*, was used by the Egyptians, and other ancient nations; and the processes are described by Pliny. After the passage of the Cape of

Good Hope, in 1497, it was gradually superseded by the eastern indigo, got from the *indigofera*. The mention of indigo occurs in English statutes in 1581. Its cultivation was begun in Carolina in 1747. The quantity imported into Great Britain in 1840 was 5,831,269 lbs.; in 1850, 70,482 cwt.; in 1861, 83,109 cwt.; in 1871, 106,307 cwt.; in 1881, 81,088 cwt.; in 1890, 81,854 cwt.; 1900, 33,877 cwt.; 1902, 30,471 cwt.; 1904, 20,709 cwt.; 1906, 7,641 cwt.; 1908, 8,644 cwt.

After long-continued experiments, especially by prof. A. Baeyer, the dye has been prepared artificially from its chemical elements in coal tar 1869-80 Professor H. E. Roscoe, at the Royal Institution, proved that the properties of the artificial and natural indigo were identical . . . 27 May, 1881

INDIRECT CLAIMS, see *Alabama, Washington*.

INDIUM, a metal discovered in the arsenical pyrites of Freiberg by F. Reich and T. Richter in 1863. Its name is due to its giving an indigo blue ray in its spectrum.

INDIVIDUALISM, the principle maintained by Herbert Spencer and others in opposition to too much state control and socialism.

INDO-CHINA, a name given to central Asia. The countries under French government or protection are Annam, Cochin China, Cambodia, and Tonquin. Burmah is subject to Great Britain, and Siam is independent.

INDORE, a province of British India; the principal native rulers have been the Mahratta chiefs, named Holkar, rivals of the Scindiahs at Gwalior. Rao Holkar received a grant of territory from the British in 1733. After severe conflicts the Mahratta chiefs were finally quelled in 1818. The town of Indore, founded in 1767, was destroyed by Scindiahs after a battle on 14 Oct. 1801. The maharajah Shivaji Rao Holkar died 17 June, 1886. Succeeded by his son, Tuckaji Rao Holkar, who was present at queen Victoria's jubilee in London in 1887. Indore was visited by the viceroy, the marquis of Lansdowne, 24 Nov. 1891. The maharajah Shivaji Rao Holkar in ill-health, abdicated in favour of his son, Tukoji Rao, aged 12, 31 Jan. 1903. Population, 1901, 850,690.

INDUCTION of electric currents, discovered by Faraday, and announced in his "Experimental Researches," published in 1831-2. Ruhmkorff's magneto-electric induction coil was constructed in 1850. See under *Electricity*.

INDUCTIVE PHILOSOPHY, based on the results of observations and experiments, really *common sense*, is especially expounded by Bacon in the second book of his "*Novum Organon*," published 1620. Wm. Harvey (1578-1657) endeavoured "to search out the secrets of nature by the way of experiment." See *Blood*.

INDULGENCES in the early church were the moderation of ecclesiastical punishment. The papal system for the absolute pardon of sin, commenced by Leo. III. about 800, was granted in the 11th century by Gregory VII., and by Urban II., and by others, in the 12th century as rewards to the crusaders. Clement V. was the first pope who made public sale of indulgences, 1313. In 1517, Leo X. published general indulgences throughout Europe, and the resistance to them led to the Reformation.

INDUSTRIAL AND PROVIDENT SOCIETIES ACTS, 1852 and 1862, were amended by acts passed 1867, 1871, and 1876. Acts consolidated in 1893; amended, 1895.

The Workmen's International Exhibition, Agricultural hall, London, was opened 16 July; closed, 31 Oct. 1870; one by the Article club at the Crystal palace opened by the duke of Connaught, 30 May, 1849; others since.

INDUSTRIAL SCHOOLS ACT, 21 & 22 Vict. c. 48 (1857) was enacted to make better provision for the care and education of vagrant, destitute, and disorderly children. Another act was passed, 1861. These acts were consolidated by an act passed in Aug. 1866; amended 1894. Forty-seven of these schools had been certified under these acts up to 29 Sept. 1864. The act was extended to Ireland, 1868. See also *Reformatory Schools*.

INDUSTRIAL VILLAGES; the formation of these by the removal of workmen from towns, was proposed at a meeting of the Society of Arts, 26 June, 1885.

INDUSTRY, see *Scientific*. A conference for the christian organisation of industry met in Holborn town hall, 29 Nov. 1893.

INFALLIBILITY OF THE POPE, in regard to faith and morals, was decreed by the Vatican Council, and promulgated, 18 July, 1870. The doctrine was much opposed in Germany, and led to the constitution of the church named "Old Catholics," *which see*. Mr. Gladstone's pamphlets, "The Vatican Decrees in their bearing on Civil Allegiance," published Nov. 1874, and "Vaticanism," in Feb. 1875.

INFANTICIDE, especially female, was very prevalent in barbarous countries. Lord Macartney stated that 20,000 infants were killed annually; it gradually decreased in India. On 12 Nov. 1851, Mr. Raikes induced the Chohan chiefs to agree to resolutions against it, and a great meeting in the Punjab was held for the same purpose, 14 Nov. 1853. Much suspicion was caused in London in 1867 through the deaths of children farmed out to improper persons. The agitation revived, June, 1870. Margaret Waters was convicted of the murder of John Cowen, an illegitimate infant, by

poison and neglect, 23 Sept. 1870. She had adopted about 40 children, receiving a few pounds as premium; in four years many had died. John and Catherine Barns, of Trammere, near Birkenhead, convicted of manslaughter (see *Trials*), 29 Oct. 1879. The Infant Life Protection act passed 25 July, 1872; amended, 1897. Female infanticide prohibited in China about June, 1873. Amelia E. Dyer, a baby farmer, convicted of the murder of infant children, the bodies having been thrown into the Thames at Reading, 22 May; executed, 10 June, 1896. Two women "baby-farmers" executed at Holloway, 3 Feb. 1903; Daisy Lord, condemned to death in July, 1908, for the murder of her illegitimate child; sentence afterwards commuted to penal servitude for life.

INFANTRY, foot soldiers; their organisation much improved during the wars of Charles V. and Francis I., in the 16th century. The British army comprised 99 regiments of regular infantry in 1858, when the Canadians raised a regiment termed the 100th. The number 109, beside the rifle brigade until 1881 included the nine regiments formerly in the pay of the East India company, and several colonial corps. In 1871 the principle of localisation, the linking of battalions, and short service, came into operation; in 1881 the existing 109 regiments and the rifle brigade were reorganised, forming 71 territorial regiments of the line, each regiment comprising usually 2 battalions of its own and linked battalions of the militia and volunteers. The army scheme of reorganisation introduced by Mr. Brodick, March 1901, increases the strength of the infantry and raises the number of militia. Marshal Soult (or marshal Bugeaud) said, "The British infantry is the finest in the world: happily there is not much of it." In 1905, 161,035; in 1909, 151,126 (53,940 stationed in India). *Mounted infantry* were largely and successfully employed in the operations of the war in S. Africa, 1899-1902.

INFANT SCHOOLS began in New Lanark, Scotland, in 1815; in London in 1818.

INFANTS' RELIEF ACT, passed 7 Aug. 1874, to amend the law relating to contracts made by persons under age.

The powers of wives and widows in respect to the care and training of their children were somewhat enlarged in 1839, more so in 1873, and very much more by a bill brought in by Mr. James Bryce, read a second time 26 March, 1884.

Guardianship of Infants Act passed, 1886.

INFECTIOUS DISEASES. By an act passed 30 Aug. 1889, notification of any person suffering from infectious disease is required to be given by the nearest relative or any person in charge, and also by the medical attendant to the medical officer of health of the district; extension of same act passed, 20 June, 1899. An act to prevent the spread of infectious disease was passed 4 Aug. 1890.

INFIRMARIES. Ancient Rome had no houses for the cure of the sick; diseased persons were carried to the temple of Æsculapius for cure. Institutions for the accommodation of travellers, the indigent, and sick were founded by the emperor Julian about 362; and infirmaries or hospitals were frequently built to cathedrals and monasteries. The emperor Louis II. caused infirmaries

situated on mountains to be visited, 855. In Jerusalem the knights and brothers attended on the sick. There were hospitals for the sick at Constantinople, in the 11th century. The oldest mention of physicians and surgeons established in infirmaries occurs in 1437. *Beckmann*; see *Hospitals*. Parish workhouse infirmaries established, 1867.

INFLUENZA, a name given in Italy about 1741 to an epidemic febrile catarrh with variations, probably known to the ancients.

It prevailed in Europe in 1510, and has since frequently appeared, generally commencing in Russia and thence spreading over the continent. It appeared in Britain in 1762 and frequently since, especially in 1830-1, 1833, 1836-7, and 1847. It appeared at Paris in 1866-7, and at Berlin, 1874-5. In Oct. 1889, it was severe in St. Petersburg, and thence spread over Europe, reaching Great Britain, Canada and the United States, Jan. 1890, causing indirectly the deaths of several eminent persons. In the spring, the disease was severe in India and Australia. In 189a the disease was severe in the west of the United States and in London and other parts of England, and also on the Continent. The disease reappeared in Jan. 1892, in much the same localities. In London the general mortality was much increased, all classes being attacked. The death of the duke of Clarence and Avondale, 14 Jan. 1892, was attributed to pneumonia following influenza. Reports of the epidemic of 1889-90, by Dr. Parsons, issued by government, 1891-3. Moderate outbreak in London, Feb. 1893; many cases autumn and winter, 1893-94; epidemic in London; prevalent in United Kingdom and on the continent, many deaths, Feb.-April, 1895. Epidemic in St. Petersburg and S. Russia, March, 1895. Epidemic in London and home counties, Jan., Feb. 1898; again rife in London and Paris, spring, 1899; again in London and other parts, Jan. 1900, and since.

INFORMERS, upon penal statutes, compounding with defendants without leave of the court, were punishable with fine and pillory, by 18 Eliz. c. 5 (1576). Their share of a penalty was regulated by 2 & 3 Vict. c. 71 (1839).

INGESTRE HALL, Staffordshire, destroyed by fire 12 Oct. 1882. It was built in 1676. Many valuable portraits, &c., were destroyed.

INGOUR, a river rising in the Caucasus and falling into the Black Sea. Omar Pasha, marching to the relief of Kars, crossed this river on 6 Nov. 1855, with 10,000 men, and attacked the Russians, 12,000 strong, who, after a struggle, retreated with the loss of 400 men. The Turks had 68 killed and 242 wounded. Kars, however, was not saved.

INK. The ancient black inks were composed of soot and ivory black, and Vitruvius and Pliny mention lamp-black; but they had ink of various colours, as red, gold, silver, and purple. Red ink was made of vermillion and gum. **INDIAN INK** was brought from China, and must have been in use by the people of the east from the earliest ages. **INVISIBLE**, or **SYMPATHETIC INKS**, were known at early periods. Ovid (A.D. 2) teaches young women to write with new milk. Receipts for preparing invisible ink were given by Peter Borel, in 1653; and by Le Mort, in 1669. *Beckmann*.

INKERMANN (Crimea). The Russian army (about 40,000) having received reinforcements, and being encouraged by the presence of the granddukes Michael and Nicholas, attacked the British (8000) near the old fort of Inkermann, before daybreak, 5 Nov. 1854. They were kept at bay for six hours till the arrival of 6000 French. The Russians were then repulsed, leaving 9000 killed and wounded.

The loss of the allies was 462 killed, 1952 wounded, and 191 missing. Sir George Cathcart, and generals Strangways, Goldie, and Torrens, were among the slain. On 15 Nov. 1855, an explosion of about 100,000 lbs. of gunpowder occurred near Inker-mann, and caused great loss of life.

INOCULATION, see *Small Pox*. Lady Mary Wortley Montagu introduced inoculation from small pox to England from Turkey. In 1718 she had her son inoculated at Adrianople with success. She was allowed to have it first tried in England on seven condemned criminals, 1721; and in 1722 two of the royal family were inoculated. The practice was preached against by many of the bishops and clergy until 1760. Dr. Mead practised inoculation very successfully up to 1754, and Dr. Dimsdale, of London, inoculated Catherine II., empress of Russia, in 1768. Of 5964 who were inoculated in 1797-99, only three died. An inoculation hospital was established in 1746. *Vaccine* inoculation was introduced by Dr. Jenner, 21 Jan. 1799; he had discovered its virtue in 1796, and had been making experiments during the intermediate three years. Inoculation was forbidden by law in 1840. Dr. A. E. Wright's typhoid vaccine elaborated in 1896, introduced in the army, reported, June, 1899; satisfactory results obtained at Ladysmith, 1899-1900, reported, 5 Sept. 1902; see also *Times*,

INQUESTS, see *Coroner*.

INQUISITION or HOLY OFFICE. Pre-vi-ous to Constantine (306), heresy and spiritual offences were punished by excommunication only; but shortly after his death capital punishments were added, and inquisitors were appointed by Theodosius, 382. Priscillian was put to death in 384 by the emperor Maximus. Justinian decreed the doctrine of the four holy synods as to the holy scrip-tures and their canons to be observed as laws, 529; hence the penal code against heretics. About 800 the power of the western bishops was enlarged, and courts were established for trying and punishing spi-ritual offenders, even with death; the punishment being termed in Spain *auto-da-fé*, "an act of faith." In the 12th century many heresies arose, and during the crusades against the Albigenses, Gregory IX., in 1233, established by rules the inquisitorial missions sent out by Innocent III., 1210-15, and committed them to the Dominicans. Pietro da Verona (styled Peter Martyr), the first inquisitor who burnt heretics, assassinated by an accused gon-falonier, 6 April, 1252, was canonized.

INSECTS. About 200,000 species known, Jan. 1877. An exhibition of these creatures, illustrat-ing their structure, food, and habits, was opened in the gardens of the Tuileries, at Paris, 7 Sept., 1874; at the Westminster Aquarium, 9 March, 1878; and in the Zoological gardens, Regent's park, 1881. About 8,000 new species of insects named annually; total estimated 10,000,000 forms, 1902. See *Entomology*.

INSOLVENCY. The first insolvent act was passed in 1649, but it was of limited operation; a number of acts of more extensive operation were passed at various periods, and particularly in the reign of George III. The benefit of the act known as the Great Insolvent Act, was taken in England by 50,733 insolvents from the time of its passing in 1814, to March, 1827, a period of thirteen years. Since then the acts relating to insolvency have been several times amended. Persons not traders, or being traders whose debts are less than 300*l.*, might petition the court of bankruptcy, and propose compositions, and have *pro tem.* protection from all process against their persons and property, by 6 Vict. c. 116 (1842). In 1861, by a new bankruptcy act, the business of the insolvent debtors' court was transferred to the court of bankruptcy; and a number of imprisoned debtors were released in Nov. 1861. See *Bankrupts*.

INSPIRATION. The term used in theology, derived from the Vulgate translation of 2 Tim. iii. 16, to denote the influence of the Holy Spirit upon the mind of the writers of the Scriptures, "which makes these Scriptures the Word of God." Orthodox theologians all ascribe divine assistance to the writers of the books of the Old and the New Testaments, but differ as to its extent, degree, and mode of interpretation. To these are opposed the theologians of the more modern school, who hold that "the Bible is the book which contains the record of God's dealings with a chosen race, and through them with mankind . . . it is the book which contains the gospel of His Son and the lessons of salvation. It is not all of the same value, it is not all written on the same level . . . much of it is written from the imperfect moral and spiritual standpoint of times of ignorance." Others hold that the spirit, ideas, and doctrines of the Bible only are inspired, not the strict form or letter. Prior to the Reformation no definite Church doctrine existed on the subject of inspiration, nor is it a doctrine of the Roman Church. Calovius (1612-1686) advanced the theory, which became the accepted orthodox Protestant doctrine, "that nothing exists in the Scriptures which is not divinely suggested and inspired." This belief was expanded by the advocates of "plenary" inspiration, who asserted that every word, syllable, and letter of the Bible was inspired by God. See *Higner Criticism*.

INSURANCE. The origin of insurance is unknown; it has, on the authority of Suetonius, been ascribed to the emperor Claudius, A.D. 43. Marine insurance was in use in the beginning of the 15th century, and arose from the custom of merchants insuring their vessels and goods against

the perils of the sea. Growing out of this form of protection to property was the insurance of the life of the merchant, who usually accompanied the ship, and of the captain of the vessel, both being liable to capture by Moorish and Turkish pirates. The persons to whom the premium was paid were termed underwriters, who agreed to pay a fixed amount, the sum assured, if the person insured died within a year; the document specifying the contract was called the policy, the name it still bears. The premium charged appears to have been not less than 5 per cent. of the sum assured, irrespective of the age of the insurer. In 1574, Robert Chandler, under a patent granted to him by queen Elizabeth, established a chamber of insurance in London to regulate all contracts of insurance. This chamber was destroyed by the great fire of 1666. The earliest *life* policy of which particulars have been preserved was issued 15 June, 1583, at the "Office of Insurance, within the Royal Exchange, London." This policy gave rise to the first authenticated disputed claim. It provided that if a certain William Gybbons should die within twelve months the underwriters, thirteen in number, who guaranteed sums from 2*5* *l.* to 50*l.* each, should pay to Richard Martin 38*3* *l.* 6*s.* 8*d.*, the premium for which was 8 per cent. Gybbons died 28 May, 1584, and the underwriters refused to pay on the ground that he had survived twelve months of 28 days each. The commissioners appointed to determine such cases decided that the twelve months mentioned in the policy meant a calendar year, and ordered payment to be made by the underwriters; on appeal to the court of admiralty, the decision of the commissioners was upheld, 1587. Life insurance as a provision for a wife and children is mentioned in 1622. Policies as collateral security for money advanced for the purchase of appointments were much in vogue in the 17th and 18th centuries. The earliest known life insurance office, named the "Society of Assurance for Widows and Orphans," was established in 1699, and was of the nature of an assessment company; up to this date life insurances were underwritten. In principle it was to consist of 2,000 members, who were to contribute 5*s.* each on entry, to pay for the first claim, and the same sum on each subsequent death among the members, 500*l.* being thus provided for the widow and children. The society came to an end in 1712. "The Amicable" was started in 1705, and received its charter from queen Anne, 25 July, 1706; the number of its members was to be 2,000, each paying 10*s.* entrance fee, and an annual subscription of 6*l.* 4*s.* Amongst the representatives of those who died in the first year one-sixth of the contributions were to be divided; one-third the second year, and proportionately until in the fifth and all subsequent years five-sixths of the contributions were to be divided, the remainder, with all profits made by the sale of annuities, being accumulated as a reserve fund. In 1807, the contribution was made to vary with the age of entry. The Amicable existed as an independent institution until 1866, when it was transferred to the Norwich Union Life Insurance Society, its policies being finally merged, 30 June, 1886, with those of the Norwich Union. Numerous life offices of the assessment type came into existence shortly after the foundation of the Amicable, all of which, except the Amicable, collapsed at the bursting of the South Sea Bubble, 1720. The London Assurance Corporation and the Royal Exchange Assurance Corporation, chartered in 1720, received additional powers authorising them to transact life business; these two institutions are now the oldest life offices extant. The Equitable,

founded 1760, was the first life insurance office to transact its business on a scientific basis, by fixing the sum assured and the premium at the time of making the assurance, securing at death the payment of a definite sum, the rate of premium being regulated by the age at entry. Owing to the Northampton tables of mortality, which over-estimated the death-rate percentage, having been used as the basis of calculation, a surplus accumulated. After paying claims and expenses and providing a reserve fund, this sum was distributed among the assured, and is the origin of the system of *bonuses*. The practice of insuring lives as a speculation was put down by the Gambling Act of 1774, which made it illegal to effect an insurance on the life of any person, unless the insurer had pecuniary interest in the life insured. In the 19th century the number of companies rapidly increased, reaching a total of 113 in 1870, insuring 320,000,000*l.*, under 638,000 policies, with funds against liabilities amounting to 92,000,000*l.*, with an annual premium income of 9,500,000*l.* The reckless amalgamation of companies prior to 1870 led to disastrous results in the case of the Albert and the European companies, the former of which absorbed 26, the latter 40 other offices; the Albert failing for 8,000,000*l.* The Life Assurance Companies Act, 1870, passed to protect the public against unsound companies, requires each office to publish a statement of its affairs in the form of an annual balance sheet, and a periodical valuation of its liabilities and assets; the sum of 20,000*l.* must also be deposited with the board of trade by every new company as a guarantee to its policy holders. A scheme for effecting life insurances through the medium of the post office was inaugurated in 1864, the amount insured being not less than 5*l.* nor more than 100*l.* for either sex between the ages of 14 and 65, and 5*l.* on children between 8 and 14 years. *Industrial* insurance is carried on to a large extent in life policies of small amount, the premiums varying from *3d.* to *6d.* per week; the Prudential, founded 1848, which has a very extensive business of this class, is the largest office of the kind, its funds exceeding 50,000,000*l.* An early attempt to guarantee fidelity of employees by insurance was made in 1720. The first fidelity office, The Guarantee Society, was established in 1840, the Provident Clerks Guarantee in 1865, the Law Guarantee and Trust in 1888. Among the developments of modern life assurance are endowment policies; policies at reduced and modified premiums; insurance without medical examination, instituted by the Sun Office in 1900, and since adopted by other companies; annuities; partnership policies; policies as trusts for married women in connection with the Married Women's Property Acts of 1870 and 1882, and the Married Women's Policies Insurance (Scotland) Act of 1880; insurances for special classes, as the Clergy Mutual, founded in 1829; the University, 1825; the Scottish Temperance, 1883; the United Kingdom Temperance, 1840; and the Abstainers and General, 1883, which grants special advantages to vegetarians. Insurance against *accident* has largely increased as a result of the Workmen's Compensation Acts, 1897 and 1900. The *coupon* system entitles persons travelling who possess copies of specified newspapers, diaries, railway guides, &c., containing accident coupons, to the payment of certain sums for injuries specified. *Special risks* are provided against by insurances effected with various offices, such as the National Burglary Insurance Company, 1892, which issues a combined burglary and fire policy, as well as special policies for lic used victuallers, cyclists, and the army; school epidemics can also be insured

against in certain offices. The first *Mortality Table* was prepared by Halley, astronomer-royal of England, 1693; the first table of premiums used by the Equitable Society was prepared from the mortality of the year 1741 by John Dodson, author of the "Mathematical Repository," who, with Robert Simpson, was the founder of that society, which later adopted the "Northampton" tables, constructed by Dr. Price from statistics of the parish of All Saints, Northampton, from 1735-80. Joshua Milne, actuary to the Sun Office, constructed the "Carlisle" table, based on the population of the parishes of St. Mary and St. Cuthbert, Carlisle, in 1780 and 1787. The Equitable assurance table was compiled by Griffith Davies, F.R.S., 1825. In 1843, a committee of actuaries collected the data of 17 insurance companies, and published the result of their investigations in 1843. The Institute of Actuaries, founded in 1848 (incorporated by royal charter in 1844), published in 1869 a table compiled on the basis of the experience of 21 insurance companies; tables deduced from these results by Dr. Sprague were published in 1882. A vast business in life insurance is transacted in the *United States*, the Mutual Insurance Company of New York being the largest in the world. A feature in American insurance is the *tontine* system (*which see*), which is in extensive operation. Insurance offices are under state control, and are required to maintain a standard of solvency, the company being compelled to close if its assets are not sufficient to meet its liabilities according to the legal estimate. *Fire Insurance* appears to have had its origin in Anglo-Saxon times in connection with the guilds, the extant rules of some of these specifying that in consideration of certain contributions, the members guaranteed each other against loss by fire, water, robbery, and other contingencies. The oldest fire insurance in existence is the Sun, founded in 1710. See also *Lloyd's* and *Tontine*.

INTERDICT or ECCLESIASTICAL CEN-
 SURE, seldom decreed in Europe till the time of
 Gregory VII. 1073, but often afterwards. When a
 prince was excommunicated, all his subjects retain-
 ing their allegiance were excommunicated also,
 and the clergy were forbidden to perform any part
 of divine service, or any clerical duties, save the
 baptism of infants, and taking the confessions of
 dying penitents. In 1170, pope Alexander put all
 England under an interdict; and when king John
 was excommunicated in 1208, the kingdom lay
 under a papal interdict for six years. England was
 put under an interdict, on Henry VIII. shaking off
 the pope's supremacy, 1535; and pope Sixtus V.
 published a crusade against queen Elizabeth of
 England in 1588; see *Excommunication*.

INTEREST, see *Usury*. The word interest
 was first used in an act of parliament of the 21st
 James I. 1623, wherein it was made to signify a
 lawful increase by way of compensation for the use
 of money lent. The rate fixed by the act was 8l.
 for the use of 100l. for a year, in place of usury at
 10l. before taken. The Commonwealth lowered the
 rate to 6l. in 1651; confirmed in 1660; and by an
 act of the 13th of queen Anne, 1713, it was reduced
 to 5l. The restraint being found prejudicial to
 commerce was somewhat relaxed in 1839, and was
 totally removed by 17 & 18 Vict. c. 90 (1854).

INTERIM OF AUGSBURG, a decree issued
 by the emperor Charles V. in 1548, with the view
 of attempting to reconcile the Catholics and Pro-
 testants, in which it entirely failed. It was revoked
 in 1552. The term *Interim* has been applied to
 other decrees and treaties.

INTERMEZZI, light dramatic entertain-
 ments, introduced between the acts of a tragedy,
 comedy, or grand opera; of very ancient origin.
 They became more important in the 16th century.

INVESTITURE OF ECCLESIASTICS, was a cause of discord between the pope and temporal sovereigns in the middle ages; and led to actual war between Gregory VII. and the emperor Henry IV. 1075-1085. Henry V. gave up the right, by treaty, Feb. 1111; but other sovereigns resolutely refused to concede it.

INVINCIBLES, IRISH, see *Irish Invincibles, Fenians and Ireland*, 1882-3.

INVOCATION OF THE VIRGIN AND SAINTS to intercede with God. This practice of the Romish church has been traced to the time of Gregory the Great, 593. The Eastern church began (in the 5th century) by calling upon the dead, and demanding their suffrage as present in the divine offices.

IODINE (from the Greek *iōdēs*, violet-like), was discovered by M. De Courtois, a manufacturer of saltpetre at Paris in 1811, and investigated by M. Clement, 1813. On the application of heat it rises in the form of a dense violet-coloured vapour, easily evaporates, and melts at 220 degrees: it changes vegetable blues to yellow, and a seven-thousandth part converts water to a deep yellow colour, and starch into a purple. Very valuable medicinally.

IONA, ICOLMKILL, or HII, one of the Hebrides. About 565 St. Columba founded a monastery here, which flourished till the 8th and 9th centuries, when it was frequently ravaged by the Norsemen. Other religious bodies afterwards were formed here, and the isle was long esteemed sacred.

IONIA (Asia Minor). About 1040 B.C. the Iones, a Pelagic race, emigrated from Greece, and settled here and on the adjoining islands. They built Ephesus, Smyrna, and other noble cities. They were conquered by the great Cyrus about 548 B.C.; revolted 504, but were again subdued. After the victories of Cimon, Ionia became independent and remained so till 387, when it was once more subjected to Persia. It formed part of the dominions of Alexander and his successors; was annexed to the Roman empire, 133, and conquered by the Turks.—Ionia was renowned for poets, historians, and philosophers. The "Antiquities of Ionia" were published by Chandler, Revett, and Parris, 1769-1840, and the Dilettanti Society, 1840-1881.

IONIAN ISLANDS (on W. coast of Greece), Corfu, the capital, Cephalonia, Zante, Ithaca, Santa Maura, Cerigo, and Paxo. They were colonised by the Iones, and partook of the fortunes of the Greek people; were subject to Naples in the 13th century, and in the 14th to Venice.

IRONCLADS, see *Circular, Navy, and United States*, 1862; *Germany*, 1878.

IRON CROSS, an order of knighthood established by Frederick William III. of Prussia, 10 March, 1813, to honour patriotic bravery in the war against France; was revived by William I. in the Franco-Prussian war, and awarded by him to his son for his victory at Wissembourg, 4 Aug. 1870. About 40,000 persons were decorated in 1870-71.

IRON CROWN (of Italy), of gold and precious stones, set in a thin ring of iron, said to have been forged from a nail of Christ's cross, was made by order of Theudelinde for her husband, Agilulf, king of the Longobards, 591. She presented it (to be kept) to the church at Monza. Charlemagne was crowned with this crown, and after him all the emperors who were kings of Lombardy; Napoleon I. at Milan, on 26 May, 1805, put it on his head, saying, "*Dieu me l'a donnée; gare à qui y touchera.*" (God has given it to me; woe to him who touches it.) The crown was removed from Monza to Mantua by the Austrians, on 23 April, 1859. After the peace of Vienna in 1866, the crown was given up to general Menabrea on 11 Oct., and presented to king Victor Emmanuel, at Turin, on 4 Nov. The order of the "Iron Crown of Italy," instituted by Napoleon 26 May, 1805, was abolished in 1814, but revived by the emperor of Austria 12 Feb. 1816. The order of the Crown of Italy was instituted by king Victor Emmanuel 20 Feb. 1868.

IRON-MASK, THE MAN WITH THE,* A mysterious prisoner in France, wearing a mask and closely confined under M. de St. Mars, at Pignerol (1679), Exilles (1681), Sainte Marguerite (1687), and at the Bastille (1698), where he died 19 Nov. 1703. He was of noble mien, and was treated with profound respect; but his keepers had orders to despatch him if he uncovered. M. de St. Mars himself always placed the dishes on his table, and stood in his presence.

IRRIDENTISTS, see *Italia Irredenta*.

IRRIGATION, practised in the east and in Egypt from the most remote ages. It was strenuously advocated for India by sir A. Cotton and others at the Social Science Congress at Manchester, Oct. 1866. In 1865 acts were passed for utilising London sewage in the irrigation of grass land, and the results are said to be generally favourable. The subject was much discussed, Aug. 1873. A method of producing artificial rain from ponds by means of steam-power, patented by Isaac Brown, of Edinburgh, was tried by Mr. Coleman, at Stoke Park, and reported successful; see *Sewage*, and *Intermittent Filtration*, *Madras* (1895), *Egypt*, *Nile*.

IRUN (a frontier village of Spain). On 16 May, 1837, the British auxiliary legion under general Evans, marched from St. Sebastian to attack Irun (held by the Carlists), which after a desperate resistance was carried by assault, 17 May.

IRVINGITES, followers of Edward Irving,†

* The following conjectures have been made as to his identity:—An Armenian patriarch forcibly carried from Constantinople (who died ten years before the mask); the duc de Vermandois, son of Louis XIV., reported to have perished in the camp before Dixmude; the duc de Beaufort, whose head is reported to have been taken off before Candia; James, duke of Monmouth, executed on Tower-hill; a son of Anne of Austria, queen of Louis XIII., either by cardinal Mazarin, or by the duke of Buckingham; the twin brother of Louis XIV. (a conjecture received by Voltaire and others); Fouquet, an eminent statesman in the time of Louis XIV.; and a count Matthioli, secretary of state to Charles III., duke of Mantua. M. Delort and the right hon. Agar Ellis (afterwards Lord Dover) endeavoured to prove Matthioli to have been the person. The mask, it seems, was not made of iron; but of black velvet, strengthened with whalebone, and fastened behind the head with a padlock.

† Edward Irving was born 15 Aug. 1792, and was engaged as assistant to Dr. Chalmers, at Glasgow, in 1819. In 1823 he attracted immense crowds of distinguished persons to his sermons at the Scotch church,

now called the "Holy Catholic Apostolic Church." They use a liturgy (framed in 1842, and enlarged 1853), and have church officers named apostles, angels, prophets, &c. In 1852 lighted candles were placed on the magnificent altar, and burning of incense during prayers was prescribed. The Gothic church in Gordon-square was solemnly opened 1 Jan. 1854. They have over 80 churches in 1910.

Hatton-garden. A new church was built for him in Regent-square in 1827. Soon after, he propounded new doctrines on the human nature of Christ: and the "Utterances of Unknown Tongues," which began in his congregation with a Miss Hall and Mr. Taplin, 16 Oct. 1831, were countenanced by him, as *oïdvin* inspiration. He was expelled from the Scotch church, 15 March, 1833. His church, "reconstituted with the threefold cord of a sevenfold ministry," was removed to Newman-street. He died 8 Dec. 1834.

ISMAIL (Bessarabia) was taken by the Russians, 6 Aug. 1770, after a long siege, when the Russians lost 20,000 men; the town was taken by storm, 22 Dec. 1790; when Suwarrow, the most merciless warrior of modern times, put the brave Turkish garrison (30,000 men) to the sword and delivered up Ismail to pillage, and ordered the massacre of 6000 women. It was again captured by the Russians 26 Sept. 1809, and retained till the treaty of Paris in 1856, when it was ceded to Moldavia.

ISTHMIAN GAMES received their name from the isthmus of Corinth, where they were observed: their institution is mythically attributed to Sisyphus of Corinth, 1326 B.C., and to Theseus in honour of Neptune about 1234. The games, which were solemnly kept every third year, were discontinued at the destruction of Corinth by Lucius Mummius, 146 B.C. The games were revived by Julius Caesar, 60 B.C.; and by the emperor Julian, A.D. 362, and ceased in 396, when Corinth was sacked by the Goths.

The congregation of St. Paul, of the Italian Catholic church headed by Mons. Savarese, declared heretical, Oct. 1884.

The following terms are often used with reference to certain periods in the history of Italian literature and art.

1. *Trecento* (three hundred), from the birth of Dante (1265) to the death of Boccaccio (1375), which two, with Petrarca, are styled "the triumvirate of the Trecento."
 2. *Quattrocento* (four hundred), from 1375 to the revival of Italian literature by Lorenzo de' Medici in the 15th century. During this period Latin was revived, to the prejudice of Italian.
 3. *Cinquecento* (five hundred), from about 1480 to 1590. A sensuous style of art, founded on the heathen mythology, began to prevail.
 4. *Seicento* (six hundred), from 1590 to 1700. The bad taste which prevailed during this period is ascribed to the influence of the Spaniards and the Jesuits throughout Italy. *Seicentisti* is a term of reproach.
- The *Trecento* and *Cinquecento* were the most flourishing periods.

ITALIAN REPUBLIC was the name given to the remodelled Cisalpine republic. Napoleon Bonaparte, president, Jan. 1802.

ITALY, a name mythically derived either from Italus, an early king, or *italus*, a bull calf. The invading Pelasgians from Greece, and the Aborigines (Umbrians, Oscans, and Etruscans), combined, form the Latin race, still possessing the southern part of Europe. The history of Italy is soon absorbed into that of Rome, founded 753 B.C. In the middle ages it was desolated by intestine wars and the interference of the German emperors; since then, Spain, France, and Germany struggled for the possession of the country, which has been divided among them several times. Spain, which predominated in Italy during the 16th and 17th centuries, yielded to the house of Austria at

the beginning of the 18th. The victories of Bonaparte in 1797-8 changed the government of Italy; but the Austrian rule was re-established at the peace in 1814. In 1848 the Milanese and Venetians revolted and joined Piedmont, but were subdued by Radetzky; see *below*. The hostile feeling between Austria and Piedmont gradually increased till war broke out in April, 1859. The Austrians were defeated, and the kingdom of Italy, comprising Piedmont, Sardinia, Lombardy, Tuscany, Modena, Parma, the Romagna, Naples, and Sicily was re-established, 17 March, 1861, by the Italian parliament (consisting of 443 deputies from 59 provinces). On 29 Oct. 1861, the internal government was re-organized; the 59 provinces were placed under prefects, subject to four directors-general. War with Austria was declared 20 June, 1866; and on 3 Oct., peace was signed at Vienna, and Venetia was ceded to Italy; see *below* for the events. The settlement of the kingdom of Italy was consummated by the occupation of Rome as the capital, 1870. Estimated population of the kingdom, 1862, 25,003,635 (Rome was added in 1870); 1878, 28,209,620; Jan. 1882, 28,452,639; 1902, 32,966,307; 1910 (est.), 34,275,250. JACOBINS, a name given to the Dominicans in France, because their first convent was the hospital of the pilgrims of St. James (Jacobus), at Paris, at the request of pope Honorius III. (1216-27). The Jacobin club (first called "club Breton") consisted of about forty gentlemen and men of letters, who met in the hall of the Jacobin friars, at Paris, in Oct. 1789, to discuss political and other questions. Similar societies were instituted in all the principal towns of the kingdom. The club was closed 11 Nov. 1794.

A sentimental revival of Jacobitism appeared in England in 1891, the "White Rose League" having been formed. JAVA, a large island in the Eastern Archipelago, is said to have been reached by the Portuguese in 1511, and by the Dutch in 1595. The latter, who now possess it, built Batavia, the capital, about 1619; see *Batavia*. The atrocious massacre of 20,000 of the unarmed natives by the Dutch, sparing neither women nor children, to possess their effects, took place in 1740. The island capitulated to the British, 18 Sept. 1811. The sultan was dethroned by the English, and the hereditary prince raised to the throne, in June, 1813. Java was restored to Holland by treaty in 1814, and given up in 1816. The English promoted free labour instead of forced; but the Dutch reverted to the old system, and in 1830 abolished free labour, introducing the "culture system," by which the government controls the cultivation of the land and buys the produce at its own price. In Aug. 1860, the Swiss soldiers here, aided by the natives, mutinied, but were soon reduced, and many suffered death. The diminished prosperity of Java led to warm discussions in the Dutch chamber in 1866.

Java has a great many volcanoes, and has frequently been devastated by eruptions and earthquakes; those

of 5 Jan. 1699, 31 Oct. 1876, and 10 June, 1877, were very destructive.

Java and neighbouring isles desolated by a series of violent eruptions from about two-thirds of its 46 volcanoes, beginning with Krakatoa, casting up immense quantities of lava, mud, ashes, and fragments of rocks, darkening the air for about 50 square miles. Mountains were split up, some disappeared, and many new craters were formed. Rumbling noises heard 25 Aug., violent eruptions of Krakatoa 26 Aug. There was much submarine disturbance, and an immense "tidal wave" destroyed Anjer and other places, 27 Aug. The lighthouses in the straits of Sunda were swallowed up, and new volcanic peaks appeared, rendering navigation highly dangerous. Loss of life estimated at 35,000, 25-28 Aug. Great atmospheric, oceanic, and electrical disturbances for thousands of square miles. See under *Sun*, 1883.

Serious volcanic outbreaks; great destruction; about 500 persons perish, early May, 1885.

JERSEY. The chief island of the Channel archipelago (which includes Guernsey, Sark, Alderney, &c.), formerly held by the Romans in the 3rd and 4th centuries after Christ—Jersey being termed *Cæsarea*. The isles were captured by Rollo, and thus became an appanage of the duchy of Normandy, and were united to the crown of England by his descendant, William the Conqueror. The inhabitants of the Channel Islands preferred to remain subjects of king John, at the period of the conquest of Normandy by Philip Augustus, and while retaining the laws, customs, and (until lately) the language of their continental ancestors, have always remained firm in their allegiance to England. Almost every war with France has been characterised by an attack on Jersey, the most formidable of which, under the baron de Rullecourt, was defeated by the English garrison and Jersey militia, commanded by major Pierson, 6 Jan. 1781. Jersey became a place of refuge for MM. Rouher, Baroche, Drouyn de Lhuys, and other distinguished French imperialists, Sept. 1870. The Jerusalem, Cowper's Court, Cornhill, originally a coffee-house, opened early in the 17th century; burnt in the great fire 1666, and again in 1748, last rebuilt in 1880.

"JERUSALEM DELIVERED," the great Italian epic, by Tasso, was published in 1580.

JERVIS'S ACTS, 11 & 12 Vict., cc. 42, 43 (1848), relate to legal proceedings against criminals.

JESTER is described as "a witty and jocose person, kept by princes to inform them of their faults, and of those of others, under the disguise of a wagghish story." The office of jester existed in the 8th cent. in the East, and probably earlier in India. The famous caliph, Haroun-al-Raschid, had a jester, Bahallu, some of whose sayings have been preserved. Several of our kings, particularly the Tudors, kept jesters, among these Will Somers, the "fool" of Henry VIII. Rahere, the founder of St. Bartholomew's priory, West Smithfield, London, 1133, is said to have been a court jester and minstrel. There was a jester, Archie Armstrong, at court in the reigns of James I. and Charles I. who was deprived of his office for his jests on abp. Laud, but we hear of no licensed jester afterwards. The last private person to keep a jester is said to be lord Suffolk, whose "fool," Dicky Pierce, was buried at Berkeley, 1728.

JESUIT PORCELAIN, a Japanese porcelain of the 16th cent., now rare, which the jesuits in Japan caused to be decorated with Madonnas, images of saints, and various emblems of the Christian faith.

JESUITS. The society or company of Jesus was founded by Ignatius Loyola, a page to Ferdinand V. of Spain, subsequently an officer in his army, and afterwards canonised. Having been wounded in both legs at the siege of Pampeluna, in 1521, he devoted himself to theology, and renounced the military for the ecclesiastical profession. He dedicated his life to the Blessed Virgin as her knight; made a pilgrimage to the Holy Land, and on his return laid the foundation of his society at Paris,

15 Aug. 1534. He presented his institutes, in 1539, to pope Paul III., who made many objections; but Ignatius adding to the vows of chastity, poverty, and obedience, a fourth of implicit submission to the holy see, the institution was confirmed by a bull, 27 Sept. 1540. The number of members was not to exceed sixty, but that restriction was taken off by another bull, 14 March, 1543; and popes Julius III., Pius V., and Gregory XIII. granted many privileges. Loyola died 31 July, 1556. Francis Xavier, and other missionaries, the first brethren, carried the order to the extremities of the habitable globe, but it met with great opposition in Europe, particularly in Paris; see *Paraguay* and *Jansenists*. The order still exists in many European states contrary to the laws.

JESUIT'S BARK, called by the Spaniards fever-wood, from the cinchona or chinchona tree, discovered, it is said, by a Jesuit, about 1535 (and used by the order). Its virtues were not generally known till 1633, or 1638, when the wife of the viceroy at Peru, the countess of Chincoan, was cured of a fever by this drug, hence termed *pulvis comitisæ*. She brought it to Europe in 1639. It was sold at one period for its weight in silver, and was introduced into France in 1649; and is said to have cured Louis XIV. of fever when he was dauphin. It came into general use in 1680, and sir Hans Sloane introduced it here about

1700. The cinchona plant thrives in India, Jamaica, New Zealand, and other places. See *Quinine*.

JESUS CHRIST, the SAVIOUR OF THE WORLD. 1 Tim. iii. 16. The following dates given in the English bible have been much controverted, and others have been proposed by various chronologers, as Hales and Clinton, and others (see *Nativity and Crucifixion*). The birth of Christ is dated, 4 B.C.; his baptism and first ministry, 26 A.D.; his crucifixion, resurrection, and ascension, 29 A.D.

The divinity of Christ, denied by the Arians, was affirmed by the council of Nice 325

JEUNESSE DOREE, "gilded youth," a party name applied during the French revolution to certain young Parisians who sought to bring about the reaction or counter-revolution after the fall of Robespierre, 27 July, 1794. Called also *petits-maitres*, "elegants," and *muscadines*, "scented darlings." The term *jeunesse dorée* now designates fashionable young men who dress in elegant style, and spend their lives in luxury and pleasure.

JEWELLERY was received by Rebekah as a marriage gift, 1857 B.C. (*Gen.* xxiv. 53). Pliny the elder says he saw Lollia Paulina (wife of Caius Cæsar, and afterwards Caligula) wearing ornaments valued at a sum equal to 322,916l. sterling. Jewels were worn in France by Agnes Sorel in 1434, and encouraged in England about 1685. The standard of gold for jewellery, except wedding rings, was lowered by parliament in 1854. See *Gems*.

JEWISH ERA AND CALENDAR. The Jews usually employed the era of the Seleucidæ until the 15th century, when a new mode of computing was adopted. They date from the creation, which they consider to have been 3760 years and 3 months before the commencement of our era. To reduce Jewish time to ours, subtract 3761 years. The Jewish year consists of either twelve or thirteen months, of 29 or 30 days. The civil year commences with the month Tisri, immediately after the new moon following the autumnal equinox; the ecclesiastical year begins with Nisan.

JEZREELITES, New and Latter House of Israel, was founded by James Jereshom Jezreel (James White), who claimed that he was a messenger sent from God, whose revelations revealed to him are recorded in "The Flying Roll." White died in 1885. The Jezreelites asserted that the Gospel is sufficient for the salvation of the soul, but for the salvation of the body the Law must be added, and that when Christ comes to reign for His millennium, He will be greeted by the 144,000 (Rev. vii., 5-8), who will be endowed with immortal bodies, to which chosen band the Jezreelites claimed to belong. Jezreel's widow, "Queen Esther," died in 1888; since then the sect has become almost extinct. Their headquarters were at Gillingham, near Chatham.

JOAN OF ARC, the maid of Orleans, born at Domremy, imagined that she had a divine commission to expel the English, who under the earl of Salisbury were besieging Orleans. Charles VII. entrusted her with the command of some French troops, and she raised the siege, and entered Orleans with supplies, 29 April, 1429; and the English, who were before the place from 12 Oct. preceding, abandoned the enterprise 8 May following. She captured several towns in the possession of the English, whom she defeated in a battle near Patay, 18 June, 1429. She was wounded several times herself, but never shed any blood with her own hand. She was taken at the siege of Compiègne, 25 May, 1430; and, after a trial, burnt for a witch at Rouen, 30 May, 1431. A statue of Joan of Arc, the work of the late princess Marie of France, was inaugurated at Orleans, 13 Sept. 1851, and the 435th anniversary of the deliverance of the city was celebrated there on 14 May, 1895. In early times real and substantial persons were required to pledge themselves to answer to the crown for an amercement or fine set upon the plaintiff, for raising a false accusation, if he brought an action without cause, or failed in it;

and in 1285, 13 Edw. I., sheriffs and bailiffs were, before they made deliverance of the distress, to receive pledges for pursuing the suit, and for the return of the property, if return were awarded. But this becoming a matter of form, the fictitious names of Doe and Roe were used until the form was declared to be no longer necessary by the Common Law Procedure Act, 1852.

JOHN O'GROAT'S HOUSE, an ancient house formerly situated on Duncan's Bay Head, the most northerly point of Great Britain, deriving its name from John of Groat, or Groot, and his brothers, originally from Holland, said to have settled here about 1489.

The house was of an octagon shape, being one room, with eight windows and eight doors, to admit eight members of the family, the heads of different branches of it, to prevent their quarrels for precedence at table. Each came in by this contrivance at his own door, and sat at an octagon table, at which, of course, there was no chief place or head.

Upwards of 250 administrative "centres" and some thousands of "detached classes" have been formed in all parts of the United Kingdom, India, the colonies, and elsewhere abroad, and over 100,000 certificates of proficiency have been awarded. It was ordered to be celebrated every fifty years by pope Clement VI.; and by Urban VI. every thirty-third year; and by Sixtus V. every twenty-fifth year. Leo XIII. celebrated his pontifical jubilee, Feb. 1903, see *Pope*.

JUGGERNAUT, correctly *Jagannāth*, or "Lord of the World," one of the incarnations of Krishna, is an idol formed of an irregular pyramidal black stone, with two rich diamonds to represent eyes; the nose and mouth are painted vermilion. The number of pilgrims that visit the god is stated at 1,200,000 annually. Formerly some were crushed by the wheels of the car (so lately as Aug. 1864); a great many never returned, and, to the distance of fifty miles, the way was strewn with human bones. The temple of Juggernaut has existed about 800 years. The state allowance to the temple was suspended by the Indian government in June, 1851. The festival was kept, June, 1872. Twelve persons were said to be killed by accident, Aug. 1873. The festival of 1878 reported a failure.

JUGURTHINE WAR. Jugurtha murdered his cousin, Hiempsal, king of Numidia, and usurped his throne, 118 B.C. He gave Adherbal a share in the government, but killed him in 112. He then provoked the Romans to war. Cæcilius Metellus was first sent against him, and defeated him in two battles; and Marius brought him in chains to Rome to adorn his triumph, 106 B.C., where he was put to death in 104. This war has been celebrated by the pen of Sallust.

JULIAN ERA and YEAR, see *Calendar*.
Julian period (by Joseph Scaliger, about 1583), a term of years produced by the multiplication of the lunar cycle 19, solar cycle 28, and Roman indiction 15. It consists of 7980 years, and began 4713 years before our era. It has been employed in computing time to avoid the ambiguity attendant on reckoning any period antecedent to our era, an advantage in common with the mundane era used at different times. By subtracting 4713 from the Julian period, our era is found; if before Christ, subtract the Julian period from 4714.

JULIAN PERIOD (YEAR OF)

1907	6620	1910	6623
1908	6621	1911	6624
1909	6622		

JULIERS, a Prussian province; made a duchy in 1356; became the subject of contention on the extinction of the ruling family in 1609; was allotted to Neuburg in 1659; seized by the French in 1794; and ceded to Prussia in 1815.

JULY, the seventh, originally fifth, Roman month, named by Marc Antony from *Julius Cæsar*, the dictator of Rome, who was born in it.

The early part of July, 1888, was very cold; many thunderstorms, followed by destructive floods in the latter part. See *Inundations*.

July Revolution. See *France*, 1830.

JUNE, originally the fourth, now the sixth month, owes its name to *Junius*, which some derive from *Junio*, and others from *Juniores*, this being the month for the young, as May was for aged persons. Ovid, in his *Fasti*, introduces Juno as claiming this month. "Glorious 1st of June;" see *Ushant*.

JUNG RIVER, West Africa. Natives chastised for outrage on Mr. Laborde, envoy, and others, by gen. Havelock, governor of Sierra Leone, May, 1882.

JUNIUS'S LETTERS began in the *Public Advertiser*, 21 Jan. 1769.

They have been ascribed to Mr. E. Burke, Mr. William Gerard Hamilton, commonly called Single-speech Hamilton, John Wilkes, Mr. Dunning (afterwards lord Ashburton), serjeant Adair, the rev. J. Rosenhagen, John Roberts, Charles Lloyd, Samuel Dyer, general Lee, the duke of Portland, Hugh Boyd, lord George Sackville, earl Temple, and sir Philip Francis. The last-named is generally considered to have been the author. Junius said, "I am the depositary of my own secret, and it shall perish with me." The work of Mr. Chabot and hon. E. T. B. Twisleton was considered decisive of sir Philip Francis being Junius, May, 1871. "Junius is as much unknown as ever."—*Athenæum*, 8 Sept. 1888.

Sale of manuscript papers of sir Philip Francis, reported to be inconclusive respecting "Junius," June, 1892; the sir Philip Francis correspondence sold for 430l. 2s. 27 Nov. 1897
 Mr. Charles Knight in his description of the letters in his "Popular History of England," 1860, asserts that they abound in gross exaggeration and venomous abuse. Mr. H. R. Francis, in his "Junius Revealed," published March, 1864, maintains that his grandfather (Sir Philip) was Junius. The *Athenæum* (17, 24 March, 1894, and Mr. Fraser Rae, in 6 papers, 19 Feb. 1898) consider the book unsatisfactory.

JUNKER PARTY (*Junker*, German for *young noble*), a term applied to the aristocratic party in Prussia, which came into power under Otto von Bismarck-Schönhausen, appointed prime minister, 9 Oct. 1862. Their political organ is the *Kreuz-Zeitung*.

JUNO, the planet discovered by M. Harding, of Lilienthal near Bremen, 1 Sept. 1804. Its distance from the sun is 254 millions of miles, and it accomplishes its revolution in four years and 128 days, at the rate of nearly 42,000 miles an hour.

JUNONIA, festivals in honour of Juno (the Greek Hera, or Hère) at Rome, and instituted 431 B.C.

JUNTA. The Spanish provincial juntas or councils declared against the French in 1808, and incited the people to insurrection.

JUNTO, a name given to the leaders of the whig party in the reigns of William III. and Anne (1689-1714); the chiefs were admiral Edward Russell, John Sumners, Charles Montague, and Thomas Warton.

JUPITER, known as a planet to the Chaldeans. The discovery of the satellites, incorrectly attributed to Simon Mayr (Marius) in 1609, was made by Galileo on 8 Jan. 1610; see *Planets*. JUPITER'S moons were all invisible on 21 Aug. 1867; a very rare occurrence. A fifth very small satellite was discovered by Mr. Barnard at the Lick observatory, 9 Sept. 1892. Dark spots observed, 1901-2. Sixth satellite discovered at Lick observatory by means of the Crossley reflector, 6 Jan. 1905, another the 7th, at the same observatory by Mr. Perrino, assistant-astronomer, 28 Feb. 1905. —JUPITER AMMON'S temple in Libya was visited by Alexander, 332 B.C. Cambyse's army sent against it perished miserably, 525 B.C. The Greek Zeus was the Roman Jupiter, contracted from Divis pater, the father of Heaven.

JURIDICAL SOCIETY was established in Feb. 1855, and opened with an address by sir R. Bethell on 12 May following.

JURIES. Trial by jury was introduced into England during the Saxon heptarchy, mention being made of six Welsh and six Anglo-Saxon freemen appointed to try causes between the English and Welsh men of property, and made responsible, with their whole estates real and personal, for false verdicts. *Lambard*. By most authorities their institution is ascribed to Alfred about 886, which is not historical. In *Magna Charta*, juries are insisted on as the great bulwark of the people's liberty. When either party is an alien born, the jury shall be one half denizens, and the other half aliens, stat. 28 Edw. III. 1353. By the common law a prisoner upon indictment or appeal might challenge peremptorily thirty-five, being under three juries; but a lord of parliament, and a peer of the realm, who is to be tried by his peers, cannot challenge any of his peers. An act for the trial by jury in civil cases in Scotland was passed in 1815. An act to consolidate and amend the laws relating to juries in Ireland was passed 4 Will. IV. 1833. A new act respecting juries, regulating their payment, &c., was passed 9 Aug. 1870. The clause respecting their payment was rescinded by act passed 28 Feb. 1871. Laws respecting juries in Ireland amended, 14 Aug. 1871. New Juries bill brought in by the attorney-general, sir John Coleridge, Feb. 1873. Special juries bill passed, May, 1898. Juries are sum-

moned to assist the coroner in investigating the causes of sudden or violent death.—**GRAND JURIES** (of not less than 12 or more than 23 persons) decide whether sufficient evidence is adduced to put the accused on trial.—The constitution of 1791 established the trial by jury in France.—An imperial decree abolished trial by jury throughout the Austrian empire, 15 Jan. 1852.—Trial by jury began in Russia, 8 Aug. 1866; in Spain, 1889.—A true bill for libel granted against alderman sir F. Truscott in his absence, who was honourably acquitted, 18 Sept. 1879.

COERCION OF JURIES.—It is said that in early times the suitors used to feed the jury empanelled in their action, and hence arose the common law of denying sustenance to a jury after the hearing of the evidence. A jury may be detained during the pleasure of the judge if they cannot agree upon a verdict; and may be confined without meat, drink, or fire, candle light excepted, till they are unanimous.—Some jurors have been fined for having fruit in their pockets, when they were withdrawn to consider of their verdict, though they did not eat it. *Leon Dyer*, 137. A jury at Sudbury not being able to agree, and having been some time under duress, forcibly broke from the court where they were locked up, and went home, 9 Oct. 1791. *Phillips*. In Scotland, Guernsey, Jersey, and France, juries decide by a majority; in France, since 1831, a majority of two-thirds is required.

"JUSTE MILIEU" (moderation and conciliation to parties), according to Louis-Philippe (in 1830), is the only principle of government which can secure the welfare of France.

JUSTICE GENERAL, LORD, Scotland, see *Court of Session*.

JUSTICES OF THE PEACE are unpaid local magistrates, invested with extensive powers in minor cases, but subject to supersession and punishment by the King's Bench for an abuse of their authority. They were first nominated by William I. in 1076. *Stow*. Persons termed conservators of the peace in each county were appointed by 1 Edw. III. c. 2, 1327; and their duties were defined in 1360. The form of a commission of the peace settled by the judges, 23 Eliz. 1580. *Hawkins*; see *Eyre*.

JUSTICES, LORDS, were appointed by English sovereigns to govern during their absence; especially by William III., George I. and George II. (1695-1760). George III. never left England. In Sept. 1821, when George IV. went to Hanover, lords justices were appointed, the duke of York being the first. No such appointment was made during the reign of queen Victoria, it having been decided by the law authorities in 1843 to be unnecessary when the queen went to France. Ireland is always ruled by lords justices when the lord-lieutenant is out of the country, or his office is vacant.—Two lords justices of the court of appeal in chancery, having rank next after the chief baron of the exchequer, were appointed from 1 Oct. 1851, salary 6000*l*. For recent changes see *Appeal and King's Bench*.

JUSTICIARS. In ancient times the kings of England used to hear and determine causes; but it is declared by law that if the king cannot determine every controversy, he, to ease himself, may divide the labour among persons, men of wisdom and fearing God, and out of such to appoint judges. The Saxon kings of England appointed a judge after this manner, who was, in fact, the king's deputy. After the Norman conquest, the person invested with that power had the style of *Capitalis Justiciæ*, or *Justiciarius Angliæ*. These judges continued until the erection of the courts of king's bench and the common pleas. The first justiciars of England were Odo, bishop of Bayeux, and William Fitz-Osborne, in 1067; and the last was Philip Basset, in 1261, or Hugh le Despencer, 1263 (Henry III.). Authorities vary.

KEEPER OF THE KING'S CONSCIENCE. The early chancellors were priests, and out of their supposed moral control of the king's mind grew the idea of an equity court in contradistinction to the law courts. A bill in chancery is a petition through the lord chancellor to the king's conscience for remedy in matters for which the king's common law courts afford no redress. The keeper of the king's conscience is therefore now the officer who presides in the court of chancery; see *Chancellor* and *Lord Keeper*.

KEEPER (LORD) OF THE GREAT SEAL OF ENGLAND differed only from the lord chancellor in that the latter had letters patent, whereas the lord keeper had none. The two offices were made one by 5 Eliz. 1563. *Cowell*; see *Chancellor*. The office of lord keeper of the great seal of Scotland was established in 1708, after the union.

KHERSON, an ancient Dorian colony (deriving its name from Chersonesus, a peninsula), came under the sway of the great Mithridates about 120 B.C.; and afterwards under that of Rome, A.D. 30. It continued important, and its possession was long disputed by the Russians and Greeks. Justinian II. cruelly treated it. It was taken by Vladimir, grand-duke of Russia in 988, when he and his army received Christian baptism, and he married the emperor's sister Anne, who obtained Kherson as her dowry. The city was destroyed by the Lithuanians; and the Turks found it deserted when they took possession of the Crimea in 1475. What ancient remains the Turks and Tartars had spared, the Russians conveyed away for the construction of Sebastopol.

KHERSON, a Russian city on the Dnieper, founded 1778. Potemkin, the favourite of Catherine, who died at Jassy in 1791, is buried here, and John Howard, the English philanthropist, who died here, 20 Jan. 1790, is buried about three miles from the town, where an obelisk has been erected to his memory, by the czar Alexander I. An expedition sent against it by the emperor Nicholas of Russia in 1839 perished through the rigour of the climate in 1840. In 1875, colonel F. A. Burnaby reached Khiva, after a perilous ride, when his progress was stopped by Russian jealousy. Population, about 800,000; chief town Khiva, pop. about 5,000.

KING'S BENCH PRISON (Southwark), near the site of one of the oldest prisons of London, long used for the confinement of debtors. Here, it is said, prince Henry (afterwards Henry V.) was committed by Justice Gascoigne. The prison was burnt down by the London rioters, 7 June, 1780; see *Gordon's No-Popery Riots*. It was rebuilt in 1781, and contained about 230 rooms. Formerly, the debtors were allowed to purchase the liberties, to enable them to have houses or lodgings without the walls, or to purchase day-rules, to go out of the prison under certain regulations. The rules included St. George's Fields, &c. A consequence of the Bankruptcy act, 1861, was the release of many insolvent debtors; and an act was passed

KINGSTON, see *Hull*.—**KINGSTON**, Jamaica, was founded in 1693, after the great earthquake in 1692 which destroyed Port Royal; it was constituted a city, 1802. An awful fire here ravaged a vast portion of the town, and consumed 500,000*l.* of property, 8 Feb. 1782; another fire in 1843; another great fire; town nearly destroyed; estimated loss about 3,000,000*l.*, 5 deaths announced, 11 Dec. 1882. See *Mansion House*. The bishopric was established in 1856. The city destroyed by an earthquake, 14 Jan. 1907; see *Jamaica*.

KINGSTON-ON-THAMES, Surrey, a municipal borough 12 miles from London. The town is of ancient origin and figures conspicuously in English history. Here was held the great council convened by Egbert, king of Wessex, and his son Ethelbert, 838. The coronation stone still standing near the market place records the crowning of seven of the Anglo-Saxon kings, from Edward the Elder to Ethelred II. King John granted a charter to the town, which he frequently visited, 1204-1215. Kingston castle, now demolished, was taken by Hen. III. in 1264 during the civil war with Simon de Montfort. The town in 1647 was the headquarters of Fairfax in the civil war, 1642-1660. Gay's "Kitty," duchess of Queensberry, resided in the neighbourhood at Ham Common. The parish church contains some fine monuments; William Coxe the historian was once the rector. County council buildings were erected at the cost of 36,000*l.* in 1890. Population 1801, 4,438; 1901, 34,375; 1910 (est.), 37,812.

Canon Hook consecrated the first bishop suffragan of Kingston, 28 Oct. 1905.

Electric tramways formally opened, 1 March 1906.

KINGSTON TRIAL. The duchess of Kingston was arraigned before the lords in Westminster-hall, on a charge of bigamy, having married first, capt. Hervey, earl of Bristol, and next, during his lifetime, Evelyn Pierrepont, duke of Kingston, 15-22 April, 1776. She was found guilty, but, on pleading the privilege of peerage, the punishment of burning in the hand was remitted, and she was discharged on paying the fees.

KINGSTOWN (Dublin). The harbour here was commenced in June, 1817. The name was changed from Dunleary in compliment to George IV., who here embarked for England at the close of his visit to Ireland, 3 Sept. 1821. Kingstown railway from Dublin opened 17 Dec. 1834.

KISSING the hands of great men was a Grecian custom. Kissing was a mode of salutation among the Jews, 1 *Samuel* x., 1, &c. The "kiss of charity," or "holy kiss," commanded in the Scriptures (*Romans* xvi. 16, &c.), was observed by the early Christians, and is still recognised by the Greek church and some others. Kissing the pope's foot (or the cross on his slipper) began with Adrian I. or Leo III. at the close of the 8th century. Kissing the Book in giving evidence on oath superseded by the Oaths Act, 1909.

KIT-KAT CLUB, of above thirty noblemen and gentlemen, instituted in 1703, to promote the Protestant succession. The duke of Marlborough, sir R. Walpole, Addison, Steele, and Dr. Garth were members. It took its name from its dining at the house of Christopher Kat, a pastry-cook in King-street, Westminster.

KNEELING. The knee was ordered to be bent at the name of Jesus (see *Philippians* ii. 10), about the year 1275, by the order of the pope. The ceremony of a vassal kneeling to his lord is said to have begun in the 8th century.

KNIGHTS. The word knight is derived from the Saxon *cnicht*, a servant (*i.e.*, servant to the king, &c.). The institution of the Roman knights (*Equites* or horsemen, from *equis*, a horse), is ascribed to Romulus, about 750 B.C., when the curia elected 300. Knighthood was conferred in England by the priest at the altar, after confession and consecration of the sword, during the Saxon heptarchy. The first knight made by the sovereign with the sword of state was Athelstane, by Alfred, A.D. 900. *Spelman*. The custom of ecclesiastics conferring the honour of knighthood was suppressed in a synod held at Westminster in 1100. *Ashmole's Institutes. Salmon*. On the decline of the empire of Charlemagne, all Europe being reduced to a state of anarchy, the proprietor of every manor became a petty sovereign; his mansion was fortified by a moat, and defended by a guard, and called a castle. Excursions were made by one petty lord against another, and the women and treasure were carried off by the conqueror. At length the owners of rich fiefs associated to repress these marauders, to make property secure, and to protect the ladies; binding themselves to these duties by a solemn vow, and the sanction of a religious ceremony. See *Banneret, Chivalry, Tournaments, Holy Sepulchre, John, and Michael*.

FEMALE KNIGHTS. It is said that the first were the women who preserved Tortosa from the Moors in 1149, by their stout resistance. Large immunities were granted to the women and their descendants. Several female orders appear in the preceding list. Ladies have been admitted to several male orders.

KNIGHTS OF GLEN AND KERRY IN IRELAND. The heads of two branches of the family of Fitzgerald, who still enjoy the distinctions bestowed on their ancestors by sovereigns in the 13th century. The 19th knight of Kerry died 6th Aug. 1880.

KNIGHTS OF THE SHIRE, or OF PARLIAMENT; summoned by the king's writ and chosen by the freeholders, first summoned by Simon de Montfort, in 1258, and in a more formal manner, 20 Jan. 1265. There are writs extant as far back as 11 Edward I., 1283. The knights are still girded with a sword when elected, as the writ prescribes.

KNIGHTS OF LABOUR. A large secret trade union in the United States, said to have been originated by a man named Uriah Stevens in Philadelphia in 1869, for protection of workmen against capitalists. They were energetic in the promotion of railway and other strikes, especially in Missouri in March, 1886. Headquarters at Philadelphia, number about 400,000, May, 1886. The society is condemned by the pope. Decline of the order reported Aug. 1888; active in Aug. 1890. *Knights of Industry* active in regard to strikes, 1893.

KNIVES. In England, Hallamshire (the country round Sheffield) has been renowned for its cutlery for five centuries; Chaucer speaks of the "Sheffield thwytel." Stow says that Richard Mathews on the Fleet-bridge was the first Englishman who made *fine* knives, &c.; and that he obtained a prohibition of foreign ones, 1563. Clasp or spring knives became common about 1650; coming originally from Flanders.—*Knife-cleaning machines* were patented by Mr. George Kent in 1844 and 1852; others have been invented, by Masters, Price, &c.; see *Forks*.

KNOW-NOTHINGS, a society which arose in 1853, in the United States of N. America. Their principles were embodied in the following propositions (at New York, 1855).

1. The Americans shall rule America.
2. The Union of these States.
3. No North, no South, no East, no West.
4. The United States of America—as they are—one and inseparable.
5. No sectarian interferences in our legislation or in the administration of American law.
6. Hostility to the assumption of the pope, through the bishops, &c., in a republic sanctified by Protestant blood.
7. Thorough reform in the naturalisation laws.
8. Free and liberal educational institutions for all sects and classes, with the Bible, God's holy word, as a universal text-book.

A society was formed in 1855 in opposition to the above, called *Know-Somethings*. Both bodies were absorbed into the two parties, Democrats and Republicans, at the presidential election in Nov. 1856.

KNOX, JOHN, the great Scottish reformer (1505-1572). Quincentenary of his birth celebrated in Scotland, 1905.

KNUTSFORD, Cheshire. The foundation stone of St. Paul's college for the northern counties here was laid, 24 Sept. 1873.

KOH-I-NOOR, or "Mountain of Light," the East India diamond; see *Diamonds*.

KOLA, a West African nut, from which is obtained, by grinding, a stimulating and sustaining drug, much used by the natives in long journeys, enabling them to endure thirst and hunger. Kola nuts are much prized in the Soudan, the presentation of some of these nuts being esteemed a special honour. Known to traders since the 17th century. Dr. Daniell in 1865 discovered that the nuts contained an alkaloid identical with that found in tea, coffee, maté and guarana. Called also *Guru nuts*.

KOLIN or **KOLLIN** (Bohemia). Here the Austrian general Daun gained a signal victory over Frederick the Great of Prussia, 18 June, 1757. In commemoration, the military order of Maria Theresa was instituted by the empress-queen.

KÖLN, see *Cologne*.

KOMORN or **COMORN** (Hungary), an ancient fortress town, often taken and retaken during the wars with Turkey. Near it the Hungarians, under gen. Klapka, defeated the Austrians, 11 July, 1849, but surrendered the town 1 Oct.

KONIEH (formerly Iconium). Here the Turkish army was defeated by the pasha of Egypt, after a long sanguinary fight, 21 Dec. 1832.

KÖNIGGRÄTZ (Bohemia). Near here was fought the decisive battle between the Austrians commanded by marshal Benedek, and the Prussians commanded by their king William I., 3 July, 1866. Prince Frederick Charles halted at Kammenitz on Monday, 2 July, his troops commenced their march at midnight, and the first shot was fired about 7.30 a.m. 3 July. The attack began at Sadowa (after which the battle is also named) about 10 o'clock, and a desperate struggle ensued, the result appearing uncertain, till the army of the crown prince of Prussia arrived about 12.30. When Chlum, which had been taken and lost seven times by the Prussians, was taken for the eighth time, the fate of the day was decided; and the retreat of the Austrians, at first orderly, became a hasty disastrous flight. About 400,000 men were engaged in this battle, one of the greatest in modern times. The Austrians are said to have lost 174 guns, about 40,000 killed and wounded, and 20,000 prisoners. The Prussians lost about 10,000 men. The victory gave the supremacy in Germany to Prussia, unity to North Germany, and Venetia to Italy; and led to the legislative independence of Hungary.

KÖNIGSBERG, the capital of east Prussia, was founded by the Teutonic knights in 1255, and became the residence of the grand master in 1457. It joined the Hanseatic league in 1365. University founded, 1544. It was ceded to the elector of Brandenburg in 1657, and here Frederick III. was crowned the first king of Prussia in 1701. It was held by the Russians 1758-64, and by the French in 1807. Here king William I. and his queen were crowned, 18 Oct. 1861; his monument unveiled by the emperor, 4 Sept.; the emperor at a banquet censures the nobles for opposing his plans, promises additional grants to the province, and declares that the reigns by Divine right, 6 Sept. 1894. Population, in 1900, 187,897; 1910 (est) 224,770. *Königsberg Trial*, see *Germany*, 25 July, 1904.

KÖNIGSTEIN TUN (Nassau, Germany), most capacious, was built by Frederick Augustus,

king of Poland, in 1725. It was made to hold 233,667 gallons of wine; and on the top, which was railed in, was accommodation for twenty persons to regale themselves. The famous tun of St. Bernard's was said to hold 800 tons; see *Heidelberg Tun*.

KOOKAS, a warlike reforming sect in N. W. India, founded by Baluk Ram about 1845, and after his death, about 1855, headed by Ram Singh, who preached the restoration of the old Sikh religion, which venerated cattle and punished their slaughterer. After several outrages against the Mahometans, an outbreak of the Kookas took place near Loodiana, which was vigorously suppressed, 15 Jan. 1872, by commissioner Cowan, who ordered 49 prisoners to be blown from cannon, 17 Jan. Several others were tried and executed by commissioner Forsyth soon after. For this severity Mr. Cowan was ordered to be dismissed, and Mr. Forsyth removed to another station, April, 1872. The Kooka leaders claim 800,000 followers; but the probable number is about one-tenth.

KORAN or **ALCORAN** (**AL KURAN**), the sacred book of the Mahometans, was written about 610, by Mahomet (who asserted that it had been revealed to him by the angel Gabriel in twenty-three years), and published by Abu-bekr about 635. Its general aim was to unite the professors of idolatry and the Jews and Christians in the worship of one God (whose unity was the chief point inculcated), under certain laws and ceremonies, exacting obedience to Mahomet as the prophet. The leading article of faith preached is compounded of an eternal truth and a necessary fiction, namely, that there is only one God, and that Mahomet is the apostle of God. *Gibbon*. The Koran was translated into Latin in 1143; into French, 1647; into English by Sale, 1734; and into other European languages, 1763 *et seq.* It is a rhapsody of 6000 verses, divided into 114 sections; see *Mahometanism*, &c.

KOREISH, an Arab tribe which had the charge of the Caaba, or shrine of the sacred stone of Mecca, and strenuously opposed the pretensions of Mahomet. It was defeated by him and his adherents, 623-30.

KOSSOVA, see *Cossova*.

KOSZTA AFFAIR. Martin Koszta, a Hungarian refugee, when in the United States in 1850, declared his intention of becoming an American citizen, and went through the preliminary forms. In 1853 he visited Smyrna, and on 21 June was seized by a boat's crew of the Austrian brig *Huzzar*. By direction of the American minister at Constantinople, captain Ingraham, of the American sloop *St. Louis*, demanded his release; but having heard that the prisoner was to be clandestinely transported to Trieste, he demanded his surrender by a certain time, and prepared to attack the Austrian vessel on 2 July; Koszta was then given up. On 1 Aug., the Austrian government protested against these proceedings in a circular addressed to the European courts, but eventually a compromise was effected, and Koszta returned to the United States.

LAC, see *Lakh*.

LACE is said to have been made in the 14th century in France and Flanders. Its importation into England was prohibited in 1483; but it was used in the court costume of Elizabeth's reign. Dresden, Valenciennes, Mechlin, and Brussels have long been famous for their fine lace. An ounce weight of Flanders thread has been frequently sold for four pounds in London; and its value, when manufactured, has been increased to forty pounds, ten times the price of standard gold. A framework knitter of Nottingham, named Hammond, is said to have invented a mode of applying his stocking-frame to the manufacture of lace from studying the lace on his wife's cap, about 1768. *Macculloch*. So many improvements have been made in this manufacture, particularly by Heathcote (1809, 1817, &c.), Morley and Leaver (1811, &c.), that a piece of lace which about 1809 cost 17l. may now be had for 7s. (1853). *Ure*. The process of "gassing" by which cotton lace is said to be made equal to fine linen lace, was invented by Samuel Hall of Basford, near Nottingham. He died in Nov. 1862. LACEDÆMON or **LACONIA** (*Tzakonia*), see *Sparta*.

LA CROSSE. Originally a game played by the Canadian Indians, it was adopted successively by the French and English settlers, and introduced into the United States and Great Britain. The

game is played with an indiarubber ball, 8 or 9 in. in circumference, and a long stick, 5 or 6 ft. in length, curved at the top like a bishop's crook (*crosse*, whence the name), across which strings of deerskin are stretched diagonally forming a net. The object of the game is to drive the ball through goals situated at each end of the field. The players are usually 12 a side. The rules of the game were systematised by Dr. Beers in 1860. In 1867 the La Crosse association of Canada was founded, and an Indian team visited Great Britain. The principal associations in Great Britain are the North of England association, formed 1880; the South of England association, 1882, and the English Union, 1892, which governs all international matters, including the laws of the game.

See *Spanish-American War*.

LADY. The masters and mistresses of manor-houses, in former times, served out bread to the poor weekly; and were therefore called *Lafords* and *Lef-days*—signifying *bread givers* (from *hlaf*, a loaf): hence Lords and Ladies. Wedgewood considers this fanciful, and derives the words from the Anglo-Saxon, *laford*, lord, and *hlæfdig*, lady.—**LADY DAY** (March 25), a festival instituted about 350, according to some authorities, and not before the 7th century according to others; see *Annunciation*. The year,

which previously began on this day, was ordered to begin on Jan. 1, in France in 1564; and in Scotland, by proclamation, on 17 Dec. 1599; but not in England till 3 Sept. 1752, when the style was altered.

This affair arose out of breaches of a treaty for the suppression of the slave-trade. In 1861, the place was ceded to the British government, and created a settlement: Henry Stanhope Freeman, first governor. Lagos was constituted a distinct colony in 1886, comprising several native kingdoms. Area of island 4 square miles, protectorate 26,700 square miles. LAKE DWELLINGS contain relics of the stone, iron, and bronze ages. Herodotus (about 450 B.C.) described the Peonians as living on platforms in Lake Prasias. In 1855, Dr. Keller discovered the remains of lake habitations which had been supported on piles in several Swiss lakes ages ago. His book was published in England in 1866. Similar relics discovered in lake Constance, March, 1882; they have also been discovered in Britain and various parts of Europe, Africa, and South America; they are now considered to be evidence of a stage in human progress. The artificial fortified islands termed "Crannoges" discovered in some Irish lakes are attributed to the 9th and 10th centuries. They

have been frequently used as places of refuge. *Artificial lake*, see under *Liverpool*, 1881 *et seq.*

Mr. Arthur Bulleid, in the spring of 1892, discovered, by excavation, near Glastonbury, in Somersetshire, remains of a pre-historic lake-village, in about 60 low mounds, enclosing wooden structures, many of which had been probably workshops. The tower of the church was erected about 1375; and other parts of the edifice in the 15th century. Simon of Sudbury, archbishop of Canterbury, was killed here by the followers of Wat Tyler, who attacked the palace, burnt the furniture and books, and destroyed the registers and public papers, 14 June, 1381. The domestic portion of the palace was greatly enlarged for archbishop Howley (who died 1488), by Mr. Blore, at an expense of 52,000l. The palace was reopened after restoration, Oct. 1873; see *Canterbury, Articles*. For Lambeth Conferences see *Pan-Anglican Synods*. Lambeth bridge was freed from toll 24 May, 1879.

Lambeth degrees are those conferred by the archbishop of Canterbury by virtue of 25 Henry VIII., c. 21., 1533-4. *Archbishop's park* (over 9 acres), given to the public by the abp. of Canterbury (laid out by the London County Council at cost 4,600l.), opened by the abp. 24 Oct. 1901; a drinking fountain presented by Miss Du Bois, end Oct. 1901.

LAMIAN WAR, 323 B.C. (excited by Demosthenes, the orator), between Athens and her allies and Antipater, governor of Macedon. Antipater fled to Iamnia, in Thessaly, and was there besieged. He escaped thence and defeated his adversaries at Cranon, 322 B.C.

LAMMAS-DAY, the 1st of August, one of our four cross quarter-days of the year. Whitsuntide was the first, Lammas the second, Martinmas the third, and Candlemas the last; and such partition of the year was once equally common with the present divisions of Ladyday, Midsummer, Michaelmas, and Christmas. Some rents are yet payable at each of these quarterly days in England, and very generally in Scotland. *Lammas* probably comes from the Saxon *hlammæsse*, loaf mass, because formerly upon that day our ancestors offered bread made of new wheat. Anciently, those tenants that held lands of the cathedral church of York were by tenure to bring a lamb alive into church at high mass.

LAMPETER COLLEGE (Cardiganshire), was founded by bishop Burgess in 1822, and incorporated 1828.

LAMPS. The earthen lamp of Epictetus the philosopher sold after his death for 3000 drachmas. Lamps with horn sides said to be the invention of Alfred. London streets were first lighted with oil-lamps in 1681, and with gas-lamps in 1814. A lamp "constructed to produce neither smoke nor smell, and to give considerably more light than any lamp hitherto known," was patented by M. Aimé Argand in 1784, and was brought into general use in England early in the nineteenth century. On his principle are founded the lamps invented by Carcel about 1803, and since 1825, the moderator lamps of Levasseur, Hadrot, and Neuburger. See *Safety Lamp*. Paraffin oil and naphtha spirit are now much used in lamps. The Water Safety Lamp invented by Mr. Devoll, was tried and approved 2 June, 1890. The flame is extinguished by the water if the lamp is overturned. The Kitson oil lamp, in which petroleum is burnt as gas, used successfully in Portland-place, May, 1901. See *Petroleum*. Dr. Rostin's invention for the automatic lighting and extinguishing of gas lamps successfully tried end Jan., 1909.

LANCASTER, supposed to have been the *Ad Alaunum* of the Romans. Lancaster was granted by William I. or II. to Roger de Poitou, who erected a castle upon its hill. It was taken by the Jacobites, Nov. 1715 and Nov. 1745. It was

A new infirmary opened by the duke and duchess of York, 24 March, 1896. Population, 1901, 40,329; 1910 (est.), 44,351.

LANCASTERIAN SCHOOLS, based on a system of education by means of mutual instruction, devised by Joseph Lancaster about 1796, were not much patronised till about 1808. The system led to the formation of the British and Foreign School society, in 1805, whose schools are unsectarian, and use the Bible as the only means of religious instruction. Lancaster was accidentally killed at New York in 1838.

The proprietors of the "*Lancet*" have at various times employed medical men as commissioners of enquiry. The "*Lancet*" commissioners (three physicians) enquired into the state of workhouse infirmaries in London, 1865, and in the country, 1867.

LANGUAGE must either have been revealed originally from heaven, or the fruit of human invention. The latter opinion is embraced by Horace, Lucretius, Cicero, and most of the Greek and Roman writers; the former by the Jews and Christians, and many modern philosophers. Some suppose Hebrew to have been the language spoken by Adam; others say that the Hebrew, Chaldee, and Arabic are only dialects of the original tongue. "And the whole earth was of one language and of one speech" (*Genesis* xi. 1). * George I. in 1724, and George II. in 1736, appointed regius professors of modern languages and of history to each of the universities of England.

The original European languages were thirteen, viz.: Greek, Latin, German, Slavonian, spoken in the east; Welsh; Biscayan, spoken in Spain; Irish; Albanian, in the mountains of Epirus; Tartarian; the old Illyrian; the Jazygian, remaining yet in Liburnia; the Chaucin, in the north of Hungary; and the Finnic, in east Friesland.

From the Latin sprang the Italian, French, Spanish, and Portuguese.

The Turkish is a mixed dialect of the Tartarian.

From the Teutonic sprang the present German, Danish, Swedish, Norwegian, English, Scotch, &c.

There are 424 known languages, or rather dialects, in the world. Of these, 937 are Asiatic; 587 European; 276 African; and 1624 American languages and dialects.

Laon surrendered to the Germans 9 Sept. 1870. As the last man of the garde mobile left the citadel, a French soldier, in contravention of the capitulation, blew up the powder magazine, causing great destruction to the town and fortress. The grand-duke William of Mecklenburg-Schwerin was bruised, and 95 German riflemen and 300 French gardes mobiles were killed or wounded; general Theremin Du Hame, the commander, was wounded. The French attributed the explosion to accident.

LA PEROUSE'S VOYAGE. In 1785 La Perouse sailed from France for the Pacific, with the *Boussole* and *Astrolabe* under his command,

and was last heard of from Botany Bay, in March, 1788. Several expeditions were subsequently despatched in search of Perouse; but no certain information was obtained until captain Dillon, of the East India ship *Research*, ascertained that the French ships had been cast away on the New Hebrides, authenticated by articles which he brought to Calcutta, 9 April, 1828.

By its means the vocal chords of the interior of the larynx, &c., are exhibited, and have been photographed. It was invented by señor Manuel Garcia, and reported to the Royal Society 24 May, 1855. One constructed by Dr. Türk was greatly modified, in 1857, by Dr. Czermak, who exhibited its successful action in London in 1862. A similar apparatus is said to have been constructed by Mr. John Avery, a surgeon in London, in 1846. The British Laryngological and Rhinological Association was founded in 1888.

Señor Garcia received by king Edward VII. on his attaining his 100th birthday; event celebrated by a reception and banquet, 17 March, 1905.

Death of señor Manuel Garcia, inventor of the laryngoscope, aged 101 (born in Madrid 17 Mar. 1805), 1 July, 1906.

LATERAN, a church at Rome, dedicated to St. John, "the mother of all the churches," was originally a palace of the Laterani, a Roman family, and was given to the bishops of Rome by Constantine, and inhabited by them till their removal to the Vatican in 1377.

LATHE. The invention is ascribed to Talus, a grandson of Dædalus, about 1240 B.C. Pliny ascribes it to Theodore of Samos, about 600 B.C. Great improvements have been made in recent times.

LATHOM-HOUSE (Lancashire) was heroically defended for three months against the parliamentarians, by Charlotte, countess of Derby. She was relieved by prince Rupert, 27 May, 1644. The house was, however, surrendered 4 Dec. 1645, and dismantled.

LATIN LANGUAGE, a member of the Aryan family, and one of the original languages of Europe, from which sprang the Italian, French, and Spanish; see *Latium*. A large portion of our language is derived from the Latin. It ceased to be spoken in Italy about 581; and was first taught in England by Adelmus, brother of Ina, in the 7th century. The use of Latin in law deeds in England gave way to the common tongue about 1000; was revived in the reign of Henry II.; and again was replaced by English in the reign of Henry III. It was finally discontinued in religious worship in 1558, and in conveyancing and in courts of law in 1731 (by 4 Geo. II. c. 25). A corrupt Latin is still spoken in Roumelia. The foreign pronunciation of Latin (*a*, *ah*; *e*, *a*; *i*, *e*, &c.) was adopted in English universities and many schools about 1875-6. For "Latin name," see *Latium*.

LATIN UNION (Monetary), that of France, Italy, Belgium, and Switzerland, to maintain the use of the same coinage, from 1805 *et seq.*; re-constituted in 1885; arranged to be continued from year to year, autumn 1889; renewed till 31 Dec. 1893, Oct. 1891; conference at Paris, 9 Oct. 1893; convention in Greece, Dec. 18, 1908.

LATITAT, an ancient writ, directing the sheriff to apprehend persons to be brought before the king's bench court, had its name from its being supposed that the person was lying hid, and could not be found in the county to be taken by bill. The writ was abolished by the Uniformity of Process act, 23 May, 1832.

LATITUDE. First determined by Hipparchus of Nice, about 162 B.C. It is the extent of the earth or the heavens, reckoned from the equator to either pole. Maupertuis, in 1737, in latitude 66°20 measured a degree of latitude, and made it 69,493 miles. Swanberg, in 1803, made it 69,292. At the equator, in 1744, four astronomers made it 68°732; and Lambton, in latitude 12, made it 68°743. Mudge, in England, made it 69°148. Cassini, in France, in 1718 and 1740, made it 69°12; and Biot, 68°769; while a recent measurement in Spain makes it but 68°63—less than at the equator, and contradicts all others, proving the earth to be an oblate spheroid (which was the opinion of Cassini, Bernouilli, Euler, and others), instead of a prolate spheroid; see *Longitude*.

LATITUDINARIANS, a name given to certain theologians who endeavoured to reconcile the church and nonconformists in the 17th century, such as Hales, Chillingworth, Tillotson, and Burnet.

LAW COURTS.—Commissioners appointed in 1850 reported in favour of the concentration of the law-courts in London, on a site near Carey-street, Chancery-lane, about 7 acres, on which stood about 400 houses. The estimated expense was about £500,000, which it was recommended to take from the accumulated Chancery fund, termed "Suitors' fund." Acts of parliament to carry out the plan were passed in 1865 and 1866.

Competitive designs were invited, and after much discussion (public and professional), Mr. Street's design was selected, 30 May, 1868; much attacked, but approved by the commission, Aug. 1870; contracts signed 17 Feb. 1874, and the works were begun immediately by Bull and Son, to be finished in 1881.

There were to be 18 courts, varying in size; a central hall, 231 feet long, 48 feet wide, 30 feet high; principal entrance in the Strand.

Offices in Eastern Block occupied 21 April, 1879.

LAW'S BUBBLE. John Law, of Edinburgh (born 1681), was made comptroller-general of the finances of France, upon the strength of a scheme for establishing a bank, and an East India and a Mississippi company, by the profits of which the national debt of France was to be paid off. See *Mississippi*. He first offered his plan to Victor Amadeus, king of Sardinia, who told him he was not powerful enough to ruin himself. The French ministry accepted it; and in 1716, he opened a bank in his own name, under the protection of the duke of Orleans, regent of France, and the deluded rich subscribed for shares both in the bank and the companies. In 1718 Law was declared a royal bank, and the shares rose to upwards of twenty-fold the original value; so that, in 1719, they were worth more than eighty times the amount of all the current specie in France. In 1720 this fabric of false credit fell to the ground, spreading ruin throughout the country. Law died in poverty at Venice in 1729.—The South Sea Bubble in England occurred in 1720; see *South Sea*.

LAWN TENNIS is an offspring of tennis (*which see*). Major Wingfield is the reputed originator of the game introduced by him in 1874, under the name of *Sphairistike*, a compromise between tennis and Badminton. Various modifications have taken place since. The national lawn tennis association, founded 1888, controls the laws, etc., relating to the game.

LAYBACH (near Trieste, in Illyria). A congress met here in Jan. 1821, and was attended by the sovereigns of Austria, Russia, Prussia, and Naples. It broke up in May, after having issued two circulars, stating it to be their resolution to occupy Naples with Austrian troops, and put down popular insurrections.

Layer was hanged, 17 May, 1723. He was hanged for enlisting soldiers for the Pretender. Bishop Atterbury was accused of complicity and attainted, but permitted to quit the country.

LAYMEN, HOUSE OF, composed of 102 members elected in the dioceses, as a purely consultative body to assist the Convocation of the clergy, its main object being the promotion of church reform. It first met with Convocation at Westminster, 16 Feb. 1886. Lord Selborne, chairman; Mr. G. A. Spottiswoode, vice-chairman.

LAZARISTS (the Priests of the Mission), a congregation devoted to education, founded by St. Vincent de Paul, 1625, were so named from their first establishment in a house which once belonged to the military order of St. Lazarus. They are also called *Vincentines*. See *France*, Oct. 1902.

LAZZARONI (from *lazzaro*, Spanish for a pauper or leper), a term applied by the Spanish viceroys to the degraded beings in Naples, half-clothed and houseless. No man was born a lazzaro; and he who turned to a trade ceased to be one. The viceroy permitted the lazzaroni to elect a chief with whom he conferred respecting the imposts on the

goods brought to the markets. In 1647, Masaniello held the office, and made an insurrection; see *Naples*. In 1793, Ferdinand IV. enrolled several thousands of lazzaroni as pikemen (spontaneers), who generally favoured the court party; on 15 May, 1848, they were permitted, on the king's behalf, to commit fearful ravages on the ill-fated city.—*Colletta*.

LEAP-YEAR or **BISSEXTILE**, originated with the astronomers of Julius Cæsar, 46 B.C. They fixed the solar year at 365 days, 6 hours, comprising, as they thought, the period from one vernal equinox to another; the six hours were set aside, and at the end of four years, forming a day, the fourth year was made to consist of 366 days. The day thus added was called intercalary, and was

placed a day before the 24th of February, the sixth of the calends, which was reckoned *twice*, hence called *bissextile* or *twice sixth*. This added day with us is Feb. 29th; see *Calendar*. This arrangement makes the year nearly three minutes longer than the astronomical year, to obviate this, 1700, 1800, and 1900 were not leap-years, but 2000 will be one; see *Calendar* and *Year*.

LEARNING AND THE ARTS flourished among the Greeks, under Pisistratus, 537 B.C., and especially under Pericles, 444 B.C.; and with the Romans at the commencement of the Christian era, under Augustus. The Greek refugees caused their revival in Italy, particularly after the taking of Constantinople by the Turks in 1453, and the invention of printing shortly before,—the period of the *Renaissance*. Leo X. and his family (the *Medici*) greatly promoted learning in Italy, in the 16th century; when literature revived in France, Germany, and England; see *Literature*, and authors under *Greek*, *Latin*, *English*, and other languages.

LEATHER was very early known in Egypt and Greece, and the thongs of manufactured hides were used for ropes, harness, &c., by all ancient nations. The Gordian knot was made of leather thongs, 330 B.C. A leather cannon was proved at Edinburgh, fired three times, and found to answer, 23 Oct. 1778. *Phillips*. The duty on leather imposed 1697, produced annually in England, 450,000*l.* and in Ireland about 50,000*l.* It was abolished, 29 May, 1830. Many bankruptcies were declared in the leather trade, in the autumn of 1860 in England. In the case of Lawrence, Mortimore, and Co., enormous fraudulent dealings in bills were disclosed. A plan for making artificial leather out of cuttings, &c., was made known in 1860.—*Leather cloth* (invented by Messrs. J. R. & C. P. Crockett, of Newark, U.S., and patented in 1849) is unbleached cotton coated with a mixture of boiled linseed oil and turpentine, and coloured. C. Brodie (1813-17). Mr. G. Macilwain, about 1824, gave surgical clinical lectures in connection with a dispensary. The political lectures of Thelwall, commenced in Jan. 1795, were interdicted by an act of parliament. In the autumn of 1857 and since, many distinguished noblemen and gentlemen lectured at mechanics' institutes. An act passed in 1835 prohibited the publication of lectures without the consent of the lecturers. See *Gresham College*, *Boyle's Lectures*, *Royal and London Institutions*, *Trials*, 1887, &c.

Further changes were made in 1881, 1888, 1889; the duty was replaced in 1894 by the "Estate duty," *which see*, also *Succession Duty Act*, and *Wills*. In June, 1857, above 60 persons were killed at the theatre, through an alarm of fire; see *Tuscany and Italy*. Population, 1890, 104,960; 1910 (est.), 110,125.

There were ten, and sometimes as many as eighteen, legions kept at Rome. Augustus had a standing army of 45 legions, together with 25,000 horse and 37,000 light-armed troops, about 5 B.C.; and the peace establishment of Adrian was thirty of these formidable brigades. A legion was divided into ten cohorts, and every cohort into six centuries, with a vexillum, or standard, guarded by ten men. The peace of Britain was protected by three legions. The palace and offices were burnt by the communalists, 23 May, 1871. The Legion comprised upwards of 54,000 members in 1887. LEINSTER, a kingdom in 1167, now one of the four provinces of Ireland. The abduction of Devorgilla, wife of O'Ruarc, a lord of Connaught, by Dermot king of Leinster in 1152, is asserted to have led to the landing of the English and the subsequent conquest. The province of Leinster gave the title of duke to Schomberg's son in 1690. The title became extinct in 1719, and was conferred on the family of Fitzgerald in 1766.

LEIPSIC (Saxony), an ancient city, famous for its university (founded 1409) and its fair (1458). At Breitenfeld, near here, Gustavus Adolphus, king of Sweden, defeated the Imperialists, under Tilly, 7 Sept. 1631; and the Imperialists were again defeated here by the Swedes, under Torstensen, 23 Oct. 1642. Here took place, on 16-18 Oct. 1813, "the battle of the nations," between the French army and its allies, commanded by Napoleon (160,000), and the Austrian, Russian, and Prussian armies (240,000 strong). The French were beaten chiefly owing to 17 Saxon battalions, their allies, turning upon them in the heat of the engagement. 80,000 men perished on the field, of whom more than 40,000 were French, who also lost 65 pieces of artillery, and many standards. The victory was followed by the capture of Leipsic, of the rear guard of the French army, and of the king of Saxony and his family. The 50th anniversary was celebrated 18 Oct. 1863. *The Leipsic book fair* began 1545. The new Supreme Court for all Germany, opened here 1 Oct. 1879. LEMURES. The ancients supposed that the soul, after death, wandered over the world, and disturbed the peace of the living. The happy spirits were called *Lares familiares*, and the unhappy, *Lemures*. The Roman festival, *Lemuralia*, kept on 9, 11, 13 May, is mythically said to have been instituted by Romulus about 747 B.C., to propitiate the spirit of the slaughtered Remus.

The commencement of Lent varied, but in the 8th or 9th century Ash Wednesday became the first day. Lent was first observed in England by command of Ercombert, king of Kent, in 640 or 641. *Baker's Chron.* Flesh was prohibited during Lent; but Henry VIII. permitted the use of *white meats* by a proclamation in 1543, which continued in force until, by proclamation of James I., in 1619 and 1625, and by Charles I., in 1627 and 1631, flesh was again wholly forbidden; see *Ash-Wednesday*, *Quadragesima*.

LEPROSY, a skin disease described in *Leviticus* xiii. (B.C. 1490), which prevailed in ancient times throughout Asia. It has now almost disappeared from Europe. It chiefly affected the lower classes, yet occasionally proved fatal to the very highest personages. Robert Bruce of Scotland died of leprosy in 1329. A hospital for lepers was founded at Granada, by queen Isabella of Castile, about 1504, and a large number of leper houses were founded in Britain. Dr. Edmondson met with a case in Edinburgh in 1809.

The great increase of leprosy in the Sandwich Islands compelled the government to isolate the lepers, and large numbers were transported to Molokai, where they endured much suffering. Since 1873 Father Joseph Damien (de Venster), R. C. Belgian missionary, devoted his whole life most successfully to their general relief, and finally died of their disease, aged 49, 10 April, 1889 (succeeded by Father Wendolin). Other missionaries, male and female, are continuing his labours.

The *Father Damien Memorial Fund*, under the auspices of the prince of Wales, was founded about 18 June, 1889; and on 29 June it was determined to set up a memorial statue of Father Damien at Kalawao, and to establish a fund for the medical treatment of the disease in the United Kingdom, and for the promotion of the study of it at home and abroad especially in India.

princes of Germany and the magistrates of cities to resign their authority; and on his march his followers ravaged the country. The landgrave of Hesse at length defeated him at Frankenhauseu, 15 May, 1525; 7000 of the enthusiasts fell in the battle, and the rest fled; their leader was taken and beheaded at Mulhausen. The English "Levellers," powerful in parliament in 1647, were put down by Cromwell in 1649, and their leader Lilburn was tried and acquitted. At the period of the French revolution some Levellers appeared in England. A "Loyal Association" was formed against them by John Reeves, Nov. 1792.

LEVELS. The great Level of the Fens is a low-lying district of about 2000 square miles, in Lincolnshire, Huntingdonshire, Cambridgeshire, and Norfolk, said to have been overflowed by the sea during an earthquake, 368. It was long afterwards an inland sea in winter, and a noxious swamp in summer, and was gradually drained—by the Romans, the Saxons, and especially by the monks during the reigns of the Plantagenet kings. One of the first works on a large scale was carried out by Morton, bishop of Ely, in the reign of Henry VII. A general drainage act was passed by the advice of lord Burghley, in 1601, but little work was done till the reign of James I., who, in 1621, invited over the great Dutch engineer, Cornelius Vermuyden, to assist in the general drainage of the country. After completing several great works, Vermuyden agreed (in 1629) to drain the "Great Level." He was at first prevented from proceeding with his undertaking through a popular outcry against foreigners; but eventually, aided by Francis, earl of Bedford, in spite of the great opposition of the people, for whose benefit he was labouring, he declared his great work complete in 1652. He also reclaimed much valuable land at Axholme, in Lincolnshire, 1626-30, and many Dutch and French protestants settled here about 1634; and a few of their descendants still remain.—There are the Middle, Bedford, South, and North Levels.

The drainage of the Great Level employed the talents of Rennie (about 1807), and of Telford (1822), and of other eminent engineers.
The Middle Level commission cut through certain barrier banks, and replaced them by other works 1844

LIBEL. By the Roman laws of the Twelve Tables, libels which affected the reputation of another were made capital offences. In the British law, whatever renders a man ridiculous, or lowers a man in the opinion and esteem of the world, is deemed a libel. "The greater the truth the greater the libel," is the well-known law maxim of a high authority, is now disputed. See *Trials*.

An action for libel was brought in the court of King's Bench by a bookseller named Stockdale, against Messrs. Hansard, the printers to the house of commons; this action related to an opinion

expressed in a parliamentary report of a book published by Stockdale, 7 Nov. 1836. Lord Denman, in giving judgment, said he was not aware that the authority of the house of commons could justify the publication of a libel—an opinion which led to some proceedings on the part of the house, and to other actions by Stockdale. 1837-39

Verdicts were given in his favour, and in Nov. 1839, the sheriffs took possession of Hansard's premises. This caused much excitement in parliament, and they were ordered to appear at the bar of the house of commons, and were formally committed to the custody of the serjeant-at-arms, 21 Jan., but immediately discharged: the conflict was maintained by the law officers and the commons till May, 1840

By an order in council, Jan. 1837, the archdeaconry of Coventry was added to the see of Worcester, and Dr. Samuel Butler became bishop of Lichfield. The building was despoiled at the Reformation, and was scandalously injured in the parliamentary war (when its monuments, its fine sculptures, and beautifully painted windows, were demolished); it was repaired at the restoration, 1660; in 1788; and by Gilbert G. Scott, 1860-63 and 1884. In Lichfield castle, king Richard II. kept his Christmas festival, 1397, when 200 tuns of wine and 2000 oxen were consumed. LICINIAN LAWS. In 375 B.C., C. Licinius Stolo and L. Sextius, tribunes of the people, promulgated various rogations or laws to weaken the power of the patricians and benefit the plebeians: one was to relieve the plebeians from their debts; another enacted that no person should possess more than 500 jugera of the public land, or more than 100 head of large cattle, or 500 of small, in the Roman states; and the third, that one of the consuls should be a plebeian. After much opposition these were carried, and L. Sextius became the first

plebeian consul, 366. Another law, 56 B.C., of this name, imposed a severe penalty on party clubs, or societies assembled for election purposes; and another, about 103 B.C. (brought forward by P. Licinius Crassus), limited the expenses of the table.

LIGHT. The law of refraction discovered by Snellius, about 1624. The motion and velocity of

light discovered by Reaumur, and after him by Cassini, and calculated by Roemer (1676) and Bradley (1720). Its velocity ascertained to be about 190,000,000 of miles in sixteen minutes, or nearly 200,000 miles in a second, which is a million of times swifter than the velocity of a cannon ball, about 1667. The light of the sun takes eight minutes and eight seconds for its transmission through space to the earth. See *Emission Theory, Optics, Photography, Calorescence, Fluorescence, Röntgen Rays, Radium, Finsen*.

Velocity of Light. Direct determination by the toothed-wheel method by Fizeau agreed with the astronomical result 1849

Foucault, with the revolving mirror, gave 298,000 kilometres in a second of mean time 1865

Cornu's improved tooth-wheel apparatus gave 300,400 kilometres in a second of mean time 1874

Professor Simon Newcomb, of Washington, with his "phototachometer" (completed in May, 1880) gave 299,860 kilometres in a second of mean time 1886

Mr. (aft. sir) Wm. Crookes, F.R.S., considered that he had demonstrated the mechanical action of light by experiments with delicate balances in the highest procurable vacuum, and calculated the force of the sun's rays upon the earth to be 2.3 tons to the square mile, 1873-6. His apparatus was termed *Radiometer* (*which see*). After much investigation, Mr. Crookes admitted that the action was not due to radiation, but to difference of heat-absorption and the reaction of residual air.

LIGHT BRIGADE. See *Balaklava*.

LIGHTHOUSE, called *Pharos* (now *phare*, French; *faro*, Italian), from one erected at *Pharos*, (*which see*) near Alexandria, Egypt, 550 feet high, said to have been visible forty-two miles, about 283 B.C. There was one at Messina, at Rhodes, &c. The light was obtained by fires. A coal-fire light was exhibited at Tynemouth castle, Northumberland, about 1638. The first true lighthouse erected in England was the Eddystone lighthouse (*which see*) in 1758-60. Lights were exhibited in various places by the corporation of the Trinity-house early in the 16th century.

BRITISH LIGHTHOUSES.

The lighthouse 40 years old, height 80 feet, weight 300 tons) on the pier at Sunderland, Durham, was moved forward 500 feet without stopping the illumination, under the superintendence of Mr. John Murray, October, 1841.

Glass reflectors were used in 1780, and copper ones in 1807. A common coal-fire light was discontinued at St. Bees in 1822. Fresnel's Dioptric system (*which see*), devised about 1819, was adopted for the first time in England by Messrs. Wilkins, at the direction of the corporation of the Trinity-house, 1 July, 1836.

The most brilliant artificial light ever produced—derived from magneto-electricity by a machine devised by professor Holmes—was first employed at the South Foreland lighthouse, near Dover, on 8 Dec. 1858; and at Dungeness in 1862. Mr. Holmes' arrangement, and a similar one constructed by M. Serin, were shown at the International exhibition, London, in 1862.

LIGHTING UP (Towns, &c.), see *London*, 1884, 1694; *Gas and Electric Light*.

LIGHTNING-CONDUCTORS were first set up for the protection of buildings by Franklin shortly after 1752, when he brought down electricity from a thunder-cloud. Richmann, of St. Petersburg, was killed while repeating these experiments, Aug. 1752. The first conductor in England was set up at Payne's Hill, by Dr. Watson. In 1766 one was placed on the tower of St. Mark, at Venice, which has since escaped injury, although frequently injured by lightning previously. A powder magazine at Glogau, in Silesia, was saved by a conductor in 1782; and, from the want of one, a quantity of gunpowder was ignited at Brescia in 1767, and above 3000 persons perished. In 1762, Dr. Watson recommended conductors to be used in the navy; and they were employed for a short time, but soon fell into disuse from want of skill and attention. Mr. (afterwards sir William) Snow Harris devoted his attention to the subject from 1820 to 1854, and published a work, in 1843, detailing his experiments.

In 1830, above thirty ships were fitted up with his conductors, and in 1842 his plans were adopted, and his conductors are now manufactured in the royal dockyards. In 1854 parliament granted him 5000*l*. A lightning research committee formed, Jan. 1901, with a view to the better protection of buildings, 200 observers in the United Kingdom, and others abroad.

LIGHT SHIPS, floating beacons guarding dangerous sandbanks and shoals. Those round the English coast are under the control of Trinity-house. The first English light vessel was placed at the Nore in 1825, and there were 51 in position off the coast of England in June, 1910.

Cable Ships are stationed at Haisbro', Shipwash, Kentish Knock and North Goodwin.

LIGURIANS, a Celtic tribe, N. Italy, invade the Roman territory, and were defeated 238 B.C. They were not subjugated till 172 B.C.—The **LIGURIAN REPUBLIC**, founded in May, 1797, on the ruin of Genoa, was incorporated with France in 1805, and then merged into the kingdom of Italy.

LILAC TREE, *Syringa*. The Persian lilac from Persia was cultivated in England about 1638; the common lilac by Mr. John Gerard about 1597.

LILLE (formerly Lisle), N. France, has a strong citadel by Vauban. It was besieged by the duke of Marlborough and the allies; and, though deemed impregnable, was taken after a three months' siege in 1708. It was restored by the treaty of Utrecht, in 1713, in consideration of the demolition of the fortifications of Dunkirk. Lisle sustained a severe bombardment from the Austrians, who were obliged to raise the siege, 7 Oct. 1792. Population, 1886, 188,272; 1901, 215,431; 1905, 205,602.

LILLI-BURLERO, part of the refrain of a popular song ridiculing the Irish papists, 1688. The words are attributed to lord Wharton, the music to Henry Purcell.

LILYBÆUM, a strong maritime fortress of Sicily, besieged by Pyrrhus, king of Epirus, 276 B.C., and relieved by the Carthaginians 275 B.C. It was taken by the Romans, 241 B.C., after a siege of nine years, which led to the end of the second Punic war.

LIMA (Peru). In 1534, Pizarro, marching through Peru, was struck with the beauty of the valley of Rimac, and there he founded this city, and gave it the name of *Ciudad de los Reyes*, or city of the kings, 1535. Here he was assassinated, 26 June, 1541. Awful earthquakes occurred here, 1586, 1630, 1687, and 28 Oct. 1746. In 1854-5, thousands perished by yellow fever. Mr. Sullivan, the British

LIMBURG (Netherlands), a duchy in the 10th century; acquired by the dukes of Brabant about 1288; added to Burgundy about 1429; passed to the house of Austria in 1477; became one of the United Provinces, 1609; conquered and annexed to the French republic, 1795; restored to the Netherlands, 1814; divided between Holland and Belgium, 1830; completely separated from the German confederation by treaty, 11 May, 1867.

LIME or **LINDEN TREE**, probably introduced in the 16th century. The limes in St. James's park are said to have been planted at the suggestion of Evelyn, who recommended multiplying odoriferous trees, in his "Fumifugium" (1661). A lime-tree planted in Switzerland in 1410, existed in 1720, the trunk being thirty-six feet in circumference.

LIME-LIGHT, produced by the combustion of oxygen and hydrogen or carburetted hydrogen on a surface of lime. This light evolves little heat and does not vitiate the air. It is also called *Drummond Light*, after its inventor, lieut. Thomas Drummond, who successfully produced it as a first-class light in 1826, and employed it on the ordnance survey. It is said to have been seen at a distance of 112 miles. It was tried at the South Foreland lighthouse in 1861. Lieut. Drummond was born, 1797, died 15 April, 1840. To him is attributed the maxim that "property has its duties as well as its rights."

LIMERICK, anciently *Lumneach* (S. W. Ireland). About 550, St. Munchin is said to have founded a bishopric and built a church here, which latter was destroyed by the Danes in 853. Donald O'Brien, king of Limerick, founded the cathedral about 1200. Limerick obtained its charter in 1195, when John Stafford was made first provost; and its first mayor was Adam Servant, in 1198. It was taken by Ireton after six months' siege in 1651. In Aug. 1690 it was invested by the English and Dutch, and surrendered on most honourable terms, 3 Oct. 1691.* An awful explosion of 218 barrels of gunpowder greatly shattered the town, killing 100 persons, 1 Feb. 1691. * By the treaty it was agreed that all arms, property and estates should be restored; all attainders annulled, and all outlawries reversed; and that no oath but that of allegiance should be required of high or low; the freedom of the Catholic religion was secured; relief from pecuniary claims incurred by hostilities was guaranteed; permission to leave the kingdom was extended to all who desired it; and a general pardon proclaimed to all then in arms. *Burns*. This treaty was annulled by the Irish parliament, 1695. Limerick is still called "the city of the broken treaty."

On 31 May, 1864, "3830 joint stock companies had been formed and registered on the limited liability principle, and 933 had ceased to exist." Without Newport-gate upon Lincoln plain was fought the battle between the partisans of the empress Maud, commanded by the earl of Gloucester, and the army of Stephen, in which the king was defeated and taken prisoner, 2 Feb. 1141. Louis, dauphin of France, invited over by the discontented barons in the last year of king John's reign, was acknowledged by them as king of England here; but the nobility, summoned by the earl of Pembroke to Gloucester to crown Henry III., marched against Louis and the barons, and defeated them in a most sanguinary fight (called the Fair of Lincoln), 20 May, 1217; and Louis withdrew. The diocese is very large, although the dioceses of Ely (1109), Oxford, and Peterborough (1541) were formed from it, and

were further enlarged in 1837. The see was valued at the dissolution of monasteries at 2065l. per annum; and after many of its manors had been seized upon, it was rated in the king's books at 894l. 10s. 1d. Present income, 4500l. It has given three saints to the church of Rome, and to the civil state of England six lord chancellors. The great bell of the cathedral, called *Great Tom of Lincoln*, weighs four tons eight pounds.

LINCOLN'S-INN (London), derives its name from Henry de Lacy, earl of Lincoln, who erected a mansion on this spot in the reign of Edward I., which had been the bishop of Chichester's palace. It became an inn of court, 1310. The gardens of Lincoln's-inn-fields were laid out by Inigo Jones, about 1620, and erroneously said to occupy the same space as the largest pyramid of Egypt, which is 764 feet square; Lincoln's-inn square being 821 feet by 625 feet 6 inches. William lord Russell was beheaded in Lincoln's-inn-fields, 21 July, 1683. The square (formed in 1618) was enclosed with iron railings about 1737. The new hall and other buildings were opened, 30 Oct. 1845, and the square planted. The *theatre* in Lincoln's-inn-fields was built in 1695; rebuilt in 1714; made a barrack in 1756, and pulled down in 1848. The fields (enclosed in 1735) opened to the public (cost 12,000l.) by sir John Hutton, L.C.C., 23 Feb. 1895.

LINCOLN TOWER, Westminster Bridge Road, was erected, by the united subscriptions of Britons and Americans, as a memorial of the abolition of slavery, and of Abraham Lincoln, president. The foundation-stone was laid by general Schenk, then American minister here, 9 July, 1874; and the head stone was placed by the Rev. Newman Hall, minister of Surrey chapel, 28 Sept. 1875. The tower, which is 220 feet high, cost about 7000l. The church, named Christ church (to replace Surrey chapel), and schools adjoining (cost about 60,000l.), were dedicated, 4 July, *et seq.* 1876. The rev. Rowland Hill's body was removed from Surrey chapel and placed here, 14 April, 1881.

LINDISFARNE, or HOLY ISLAND, on the coast of Northumberland, became a bishop's see, 635. It was ravaged by the Danes under Regnar Lodbrok in 793, and the monastery destroyed by them in 875. The bones of the bishop, St. Cuthbert, who died in 687, were conveyed, among other places, to Chester-le-street, 883, and to Ripon, 995, and finally to Durham, *which see*.

LIPPE, a constitutional principality (N.W. Germany). Population, 1900, 140,000; 1910 (est.), 146,000. Prince Leopold, born 1 Sept. 1821; succeeded his father, Leopold, 1 Jan. 1851; died 8 Dec. 1875—his brother Waldemar, born 18 April, 1824, succeeded; died 20 March, 1895;

Charles Alexander (deranged), brother, born 1831, succeeded; disputed succession; count Ernst nominated regent and successor by a tribunal, July, 1897, died 26 Sept. 1904. Lippe became a member of the North German confederation, 18 Aug. 1866. The federal princes memorialised by the count regent on a difference with the emperor regarding a point of military etiquette, see *Bavaria*, 1898, *Times*, 12 Nov. 1898. Settlement of the controversy, disputed succession, &c. postponed, 5 Jan. 1899. Count Leopold of Lippe-Biesterfeld, the eldest son of count Ernest, assumes on his father's death the regency, 26 Sept. 1904. Emperor William of Germany intimates by telegram to the count that he refuses to recognise his assumption of the regency, and that he will not permit the military to take the oath of allegiance. Government of the Principality submits to the diet statement setting forth the situation respecting the regency in regard to the protest of the emperor and of the government of Schaumburg-Lippe, and affirming that no manifestations against count Leopold's succession can have any legal effect in view of the law passed by the diet in 1898. The proposals of the government referred to a special committee, 5 Oct. 1904. See *Times*, 6 Oct. 1904, and for history of the disputed succession, *Times*, 27 Sept. 1904. Prince Charles Alexander (see above) died at St. Gilgenberg, near Bayreuth, where he had been a patient with a mental disease, 13 Jan. 1905.

LISBON (Olisippo, and Felicitas Julia, of the ancients) was taken by the Arabs about 716, and became important under the Moorish kings, from whom it was captured by Alfonso I. of Portugal in 1147. It was made the capital of Portugal by Emanuel, 1506. Lisbon has suffered much by earthquakes, and was almost destroyed by one, 1 Nov. 1755; in Great Britain about 100,000*l.* was subscribed for the sufferers; see *Earthquakes*. The court fled to the Brazils, 10 Nov. 1807, and on 30 Nov. the French, under Junot, entered Lisbon, and held it until the battle of Vimeira, in which they were defeated by the British, under sir Arthur Wellesley, 21 Aug. 1808. A military insurrection at Lisbon, 21 Aug. 1831, was soon suppressed, and many soldiers were executed; see *Portugal*. Population in 1900, 357,000; 1910 (est.), 416,500.

LISMORE (S. Ireland). St. Carthagh, first bishop, 631, says: "Lismore is a famous and holy city, of which nearly one-half is an asylum where no woman dare enter." The castle (built by king John when earl of Moreton, 1185), burnt in 1645, was rebuilt with great magnificence by the duke of Devonshire. The cathedral, built 636, was repaired by Cormac, son of Muretus, king of Munster, about 1130. The bishopric was united to that of Waterford, about 1363; and both to Cashel in 1839.

LISSA (or Leuthen, Silesia). Here the king of Prussia vanquished Charles of Lorraine; 6000 Austrians were slain, 5 Dec. 1757.—**LISSA**, in Poland, was laid in ruins by the Russian army in the campaign of 1707.—**LISSA**, an island in the Adriatic. Near here the Italian fleet, commanded by Persano, was defeated with severe loss by the Austrian fleet, commanded by Tegethoff, 20 July, 1866. The Italians had 23 vessels, 11 of which were ironclads, and the Austrians had 23 vessels, 7 only being ironclads.

Persano, when in sight of the enemy, quitted his ship, the *Rè d'Italia*, and hoisted his flag on the *Affondatore*.

During the action, the ironclad *Palestro* took fire and exploded, and all on board perished (except 19 out of 200 men). The *Rè d'Italia* was surrounded and sunk by the Austrians. The *Rè di Portobello* disabled the Austrian line-of-battle ship *Kaiser*, and compelled her to run ashore.

LITANIES (Greek *litaneia*, supplication), were first used in processions, it is said, about 469; others say about 400. Litanyes to the Virgin Mary were first introduced by pope Gregory I. about 595. The first English litany was commanded to be used in the Reformed churches by Henry VIII. in 1544.

LITERARY AND ARTISTIC CONGRESS, International, met at Paris (Victor Hugo, president), 17 June; and founded "International Literary Association," 28 June, 1878; met in London, 9-14 June, 1879. Frequent meetings since.

LITERARY CLUB (at first called "The Club" and "Johnson's Club"), founded by Dr.

Johnson and sir Joshua Reynolds, in 1764. Hawkins, Topham Beauclerk, Goldsmith, Burke, and Bennet Langton, were among the first members. The opinion formed of a new work by the club was speedily known all over London, and had great influence. Many eminent men have been members of the Club, including Hallam, Macaulay, the marquis of Lansdowne, and bishop Blomfield; Dr. Milman, dean of St. Paul's, was in the chair at the centenary dinner, on 7 June, 1864.

LITERARY FUND, ROYAL, was founded in 1790, to relieve literary men of all nations, by David Williams* the friend of Benjamin Franklin, and incorporated in 1818. First anniversary dinner of the Institution, sir Joseph Andrews, Bart., in the chair, 1793; the king of the Belgians presided at the annual dinner, 8 May, 1872; the prince of Wales at the centenary dinner, 14 May, 1890; the duke of York, when chairman, 8 May, 1895, stated that among his predecessors were his great-grandfather, the duke of Kent, 1815, and his grandfather, the prince consort. LITHIUM, the lightest metal known (specific gravity 0.59: atomic weight 7), is obtained from an alkaline substance termed *lithia*; discovered by M. Arfwedson, a Swede, in 1817.

LITHOFRACTEUR, or "STONE-BREAKER," an explosive material, a modification of dynamite (composed of gun-cotton, nitro-glycerine, with the constituents of gunpowder, and other substances), invented by professor Engels of Cologne, and made by Krebs, in 1869. It was occasionally used by the Germans in the war 1870-1, and was tried and well reported of for power and safety at Nant Mawy quarries, near Shrewsbury, 9, 10 May, 1871, and again on 20 Feb. 1872, before the government explosive committee, with similar results.

LITHOGRAPHY (drawing on stone). The invention is ascribed to Alois Senefelder, about 1796; and shortly afterwards the art was announced in Germany, and was known as polyautography. It became partially known in England in 1801 *et seq.*, but its general introduction is referred to Mr. Ackermann, of London, about 1817. Senefelder died in 1841. Improvements have been made by

* Floyer Sydenham, an eminent Greek scholar, of Wadham college, Oxford, and translator of some of the works of Plato, was arrested and thrown into prison for a trifling debt due for his frugal meals, and there, in 1783, died of a broken heart in want and misery, when nearly eighty years of age. The sympathy excited gave rise to this institution, since well supported. Williams was in early life a dissenting minister, and wrote on education. He was consulted by the early revolutionary party in France as to the form of a constitution for that country; he, Dr. Priestley, sir James Mackintosh, and other distinguished Englishmen, having been previously declared French citizens. He died 29 June, 1816.

Engelmann and many others; see *Printing in Colours*. "Wharf-litho," Mr. G. R. Hildyard's new process, 1899.

LITHOSCOPE. An instrument for distinguishing precious stones, invented by sir David Brewster; described by him Jan. 1864.

LITHOTOMY. The surgical operation of cutting for the stone, it is said, was performed by Ammonius, about 240 B.C. The "small apparatus," so called from the few instruments used in the operation, was practised by Celsus, about A.D. 17. The "high apparatus" was practised (on a criminal at Paris) by Colot, 1475; by Franco, on a child, about 1566; and in England, by Dr. Douglass, about 1519. The "great apparatus" was invented by John de Romanis, and described by his pupil Marianus Sanctus, 1524. The "lateral operation," invented by Franco, much performed in Paris by Frère Jacques, in 1697, has been greatly improved.

LITHOTRITY (or bruising the stone). The apparatus produced by M. Leroy d'Etiolles in 1822 has since been improved.

Prizes of 6000 and 10,000 francs were awarded M. Jean Civiale for his method of operation, 1827 & 1829.

LITHUANIA, formerly a grand-duchy, N. E. of Prussia. The natives (belonging to the Slavonic race) long maintained their independence against the Russians and Poles. In 1386, their grand-duke Jagellon became king of Poland and was baptized: Lithuania was not incorporated with Poland till 1501, when another duke Casimir became king of that country. The countries were formally united in 1569. The larger part of Lithuania now belongs to Russia, the remainder to Prussia.

LITTLE ENGLANDISM, a term defined by sir Edward Grey as an *aimless antipathy to the British Empire*, 18 July, 1901.

LITURGIES (from the Greek *leitōs*, public, and *ergon*, work). The Greek and Roman liturgies are very ancient, having been committed to writing about the 4th and 5th centuries. The Romish church recognises four: the Roman or Gregorian, the Ambrosian, the Gallican, and the Spanish or Mosarabic. The Greek church has two principal liturgies: St. Chrysostom's and St. Basil's, and several smaller ones. Parts of these liturgies are attributed to the Apostles, to St. Ignatius, 250, to St. Ambrose (died 397), and to St. Jerome (died 420).

The present English Liturgy was first composed, and was approved and confirmed by parliament, in 1547-8. The offices for morning and evening prayer were then put into nearly the same form in which we now have them, and published 1549 and 1552.

At the solicitation of Calvin and others, the liturgy was reviewed and altered. 1551

It was first read in Ireland, in the English language, in 1550, and in Scotland, where it occasioned a tumult, in 1637, and was withdrawn. 1638

The liturgy was revised by Whitehead, formerly chaplain to Anne Boleyn, and by bishops Parker, Grindall, Cox, and Pilkington, dean May, and secretary Smith.

John Knox is said to have used a liturgy for several years. The rev. Robert Lee, of Edinburgh, introduced a form of prayer in public worship, but gave it up when ordered to discontinue it in May, 1859; he soon after resumed it, and the discussion on the subject ceased only at his death, 14 March, 1868

See *Common Prayer*.

LIVERIES OF THE CITY OF LONDON. The term is derived from the custom of the retainers of the lord mayor and sheriffs wearing

clothes of the form and colour displayed by those functionaries. Liveries were regulated by statute in 1392, and frequently since. The nobility gave liveries to their retainers. See *Companies*.

LIVERPOOL (W. Lancashire), is supposed to be noticed in Domesday-book under the name *Esmedune*, or *Smedune*.* Soon after the conquest, William granted that part of the country situated between the rivers Mersey and Ribble to Roger of Poitiers, who, according to Camden, built a castle here, about the year 1089. It afterwards was held by the earls of Chester and dukes of Lancaster. Liverpool is the second city of the Empire. The income of the estates of the Corporation 13l. in 1672, now over 12,500,000l., from renewal fines, &c. Changes in the leases, &c., proposed by the Corporation postponed, Jan. 1888. * In other ancient records its appellations are *Litherpool* and *Lyrrppl*, signifying probably in the ancient dialect, the lower pool; though some have deduced its etymology from a pool frequented by an aquatic fowl, called the "Liver," or from a sea-weed of that name; and others, from its having belonged to a family of the name of Liver, whose antiquity is not sufficiently established to justify their conclusion.

The first Lollard martyr in England was William Sawtree, parish priest of St. Osith, London, 12 Feb. 1401, when the Lollards were proscribed by parliament, and numbers of them were burnt alive. Sir John Cobham, lord Oldcastle, a follower of Wykliffe, was accused of treason and condemned, Sept. 1413. He escaped to Wales, where he was captured, and brought to London and burnt, 25 Dec. 1418. Lollards' tower, part of the bishop's prison, was near St. Paul's. *Dr. Maitland*.

LOMBARDISTS, disciples of Peter Lombard, the schoolman, bishop of Paris, author of the "Book of Sentences," who died in 1164.

LOMBARD MERCHANTS, in England, were understood to be composed of natives of some one of the four republics of Genoa, Lucca, Florence, or Venice. *Anderson*. Lombard usurers were sent to England by pope Gregory IX. to lend money to convents, communities, and private persons who were not able to pay down the tenths which were collected throughout the kingdom with great rigour that year, 13 Hen. III. 1229. They had offices in the street named after them to this day. Their usurious transactions caused their expulsion from the kingdom in the reign of Elizabeth.

LOMBARDY (N. Italy) derived its name from the Longobardi, a German tribe from Brandenburg, said (doubtfully) to have been invited into Italy by Justinian to serve against the Goths. Their chief, Alboin, established a kingdom which lasted from 568 to 774. The last king, Desiderius, was dethroned by Charlemagne. (For a list of the Lombard kings, see *Italy*.) About the end of the 9th century the chief towns of Lombardy fortified themselves, and became republics. The first *Lombard league*, consisting of Milan, Venice, Pavia, Modena, &c., was formed to restrain the power of the German emperors, in 1167. On 29 May, 1176, they defeated the emperor Frederick Barbarossa at Legnano, and eventually compelled him to sign the peace of Constance in 1183. In 1226 another *league* was formed against Frederick II., which was also successful. After this, petty tyrants rose in most of the cities, and foreign influence quickly followed. The Guelph and Ghibelline factions greatly distracted Lombardy; and from the 15th century to the present time, it has been contended for by the German and French sovereigns. The house of Austria obtained it in 1748, and held it till 1797, when it was conquered by the French, who incorporated it with the Cisalpine republic, and in 1805 with the kingdom of Italy. On the breaking up of the French empire in 1815, the **LOMBARDO-VENETIAN KINGDOM** was established by the allied sovereigns and given to Austria, who had lost her Flemish possessions. Lombardy and Venice revolted, and joined the king of Sardinia in March, 1848; but they did not support him well, and were again subjected to Austria after his defeat at Novara, 23 March, 1849. An amnesty for political offences was granted in 1856. Great jealousy of Sardinia was felt by Austria after 1849. In 1857 diplomatic relations were suspended; and in April, 1859, war broke out; the Austrians crossing the Ticino and entering Piedmont. The French emperor declared war against Austria, and immediately sent troops into Italy. The Austrians were defeated at Montebello, 20 May; Palestro, 30, 31 May; Magenta, 4 June; and Solferino, 24 June. By the peace of Villafranca (11 July), the largest

part of Lombardy was ceded to Louis Napoleon, who transferred it to the king of Sardinia. It now forms part of the kingdom of Italy, to which Venetia was also surrendered by the treaty of Vienna, 3 Oct. 1867. Population, 1901, 4,278,188; 1910 (est.), 4,600,350.

LONATO (Brescia, N. Italy). Here Napoleon Bonaparte defeated Wurmser and the Austrians, 3 Aug. 1796.

LONDON, the capital of the British empire.

The earliest history is traditional. The Celtic name is said to have been *Lyn-din*, lake-fort; Tacitus, in the first century, calls it *Londinium*, and describes it as a flourishing trading city; it was afterwards called *Augusta*, an appellation frequently given to great cities; several other forms of the name appear in documents, such as *Lundenbyrig*, *Lundonia*, and *London-wic*. In 1860, London and the suburbs were estimated to cover 121 square miles (11 miles each way, being three times as large as in 1800); in 1880, 122 square miles; in 1903, about 700 square miles. London was constituted an "administrative" county by the local government act, 1888, including as rateable value seven-eighths of Middlesex, about two-thirds of Surrey, and nearly one-third of Kent. The population of the "city" in 1801, 156,859; 1841, 125,008; 1881, 50,652; 1891, 37,702; 1901, 26,923; 1909 (est.), 27,000. For London and suburbs, 1801 *et seq.* see table in article *Population*. Census of 29 boroughs in the county of London, 4,536,541 (total, with *Outer Ring*, 6,578,784), 31 March, 1901. Estimated population to the middle of 1909, 4,833,938 (total, with *Outer Ring*, 7,429,750). The "port" of London extends from London Bridge to the North Foreland. Tonnage entering and leaving the port, 1871, 7,600,000; 1885, 12,000,000; registered tonnage of vessels entering and leaving the port for 1908, 19,681,914 tons, as against 25,689,400 in 1904. The "city" returns 2 instead of 4 members to parliament by act of 1885. "*London Statistics*," published by London county council, 1893-1908. See *Docks*, *Mayors*, *Metropolitan Board of Works*, *London County Council*, *Treaties*, and *City's Cost*.

The town appears to have prospered under British, Roman, and Saxon rules, and to have been much indebted to Alfred and his successors, but suffered greatly by the Danes; it was not attacked by William I., by whom the citizens were conciliated, and its corporate government was recognized by his son Henry I. The city received many favours from the

Plantagenet kings, but frequently resisted their exactions. London is governed by the lord mayor, the court of aldermen, the common council, and other offices. London was not included in the Municipal Corporations act, 1835. The London county council was constituted by the Local Government act passed in 1888.

William of Walworth lord mayor	1380

* It is still preserved in the city archives. This charter is written in beautiful Saxon characters, on a slip of parchment six inches long, and one broad, and is in English as follows:—"William the king greeteth William the bishop, and Gosfrith the portreeve, and all the burgesses within London, French and English, friendly. And I acquaint you, that I will that ye be all there law-worthy as ye were in king Edward's days. And I will that every child be his father's heir, after his father's days. And I will not suffer that any man do you any wrong. God preserve you."

† This terrible pestilence broke out in India, and spreading itself westward through every country on the globe, reached England. Its ravages in London were so great that the common cemeteries were not sufficient for the interment of the dead, and various pieces of ground without the walls were assigned for burial-places. Amongst these was the waste land now forming the precincts of the Charter-house, where upwards of 50,000 bodies were then deposited. This disorder did not subside till 1357. *Leigh*.

* This proclamation or decree was dated from None-such, 7 July, 1580, and it was forbidden to erect new buildings where none had before existed in the memory of man. The extension of the metropolis was deemed calculated to encourage the increase of the plague; create a trouble in governing such multitudes; a dearth of victuals; multiplying of beggars, and inability to relieve them; an increase of artisans more than could live together; impoverishing other cities for lack of inhabitants. The decree stated that lack of air, lack of room to walk and shoot, &c., arose out of too crowded a city. A proclamation to the same effect was also issued by James I.

LONDON BRIDGE. The first bridge said to have been built 994, was much injured by the Danes 1008 and destroyed by a flood 1091. Another bridge, erected by command of William II., was burnt in 1136. The late old bridge was commenced about 1176, by Peter of Colechurch, and completed in 1209, with houses on each side, connected together by large arches of timber which crossed the street.

A fire at the Southwark end brought crowds on the bridge; the houses at the north end caught fire likewise, and prevented their escape; and upwards of 3000 persons lost their lives, being either killed, burned, or drowned 7 July, 1212

The bridge restored in 1300, again destroyed by fire in 1471; 13 Feb. 1632, and 1 Sept. 1725

It was computed that on 17 March, 1859, there passed over London-bridge 20,498 vehicles (of which 4483 were cabs and 4286 omnibuses), and 167,910 persons (107,074 on foot, and 60,836 in vehicles). In April 1881 in one day (24 hours) passed over 79,943 passengers in 10,733 vehicles. Attempt to explode S.W. end, damage to property, not life; 500*l.* reward offered, 13 Dec. 1884

LONG ISLAND or **FLATBUSH** (N. America), Battle of, 27 Aug. 1776, between the British troops under sir William Howe, and the revolted Americans, who suffered a severe defeat, after a well-fought action, losing 2000 men killed and wounded and 1000 prisoners.

LONGITUDE, determined by Hipparchus, at Nire, who fixed the first degree in the Canaries, 162 B.C. Harrison made a time-keeper, in A.D. 1759, which in two voyages was found to correct the longitude within the limits required by the act of parliament 12 Anne, 1714; and obtained the reward; see *Harrison's Timepiece*. The chronometers of Arnold, Earnshaw, and Bréguet, are highly esteemed. Chronometers are now received on trial at Greenwich Observatory. The act relating to the discovery of the longitude at sea was repealed in 1828. The Bureau des Longitudes at Paris was established in 1795.

A title borne by a race of chiefs who ruled the western islands of Scotland, descended from Somerled, the lord of Argyll, on whom these islands were conferred by David I. of Scotland after he had expelled the Norwegians from Arran and Bute, 1135. John the 4th and last lord of the isles was deprived of his title and estates by the Scottish parliament of May, 1493.

LORDS.^{*} The nobility of England date their creation from 1066, when William Fitz-Osborn is said to have been made earl of Hereford by William I.; and afterwards Walter d'Evreux, earl of Salisbury; Copsi, earl of Northumberland; Henry de Ferrers, earl of Derby; and Gherbod (a Fleming) earl of Chester. Twenty-two other peers were made in this sovereign's reign. The first peer created by patent was lord Beauchamp of Holt Castle, by Richard II. in 1387. In Scotland, Gilchrist was created earl of Angus by Malcolm III. 1037. In Ireland, sir John de Courcy was created baron of Kingsale, &c., in 1181; the first peer after the obtaining of that kingdom by Henry II.

LORDS, HOUSE OF. The peers of England were summoned *ad consilium*, to consult, in early reigns, and by writ, 6 & 7 John, 1205; but the earliest writ extant is 49 Hen. III. 1265. The commons did not form a part of the great council of the nation until some ages after the conquest; see *Parliament*. The house of lords includes the spiritual as well as temporal peers of Great Britain. The bishops are supposed to hold certain ancient baronies under the king, in right whereof they have seats in this house. Some of the temporal lords sit by descent, and some by creation: others by election, since the union with Scotland in 1707, and with

Ireland, 1801. In 1719, with the king's consent, a bill for limiting the power of the sovereign of creating peers, was introduced into the lords and twice passed, but twice rejected by the commons.—Scotland elects 16 representative peers, and Ireland 28 temporal peers for life. The house of lords in June, 1910, consisted of 3 princes of the blood, 2 archbishops, 22 dukes, 23 marquises, 124 earls, 40 viscounts, 334 barons, 24 bishops, and 16 Scottish and 28 Irish representative peers; in all, 616.

^{*} Peers of England are free from all arrests of debts, as being the king's hereditary counsellors; therefore a peer cannot be outlawed in any civil action, and no attachment lies against his person; but execution may be taken upon his lands and goods. For the same reason, they are free from all attendance at courts leet or sheriffs' turns; or, in case of a riot, from attending the *posse comitatus*. He can act as a justice of the peace in any part of the kingdom. See *Baron, Earl*, &c.

^{*} *Peerage for life* only, with the title of lord Wensleydale of Wensleydale, was granted to baron sir James Parke, 10 Jan. 1856; the house of lords opposed his sitting and voting as a peer for life, and on 25 July, 1856, he was created a peer in the usual way, with the title of lord Wensleydale of Walton. He died in 1868. A bill for creating life peerages was read a second time in the lords, 27 April, 1869, but afterwards rejected.

LORETTO, near Ancona, Italy. Here is the *Casa Santa*, or Holy House, in which it is pretended the Virgin Mary lived at Nazareth, and said to have been carried by angels into Dalmatia from Galilee in 1291, and brought here a few years after. The lady of Loretto, gaudily dressed, stands upon an altar holding the infant Jesus in her arms, surrounded with gold lamps. Loretto was taken by the French in 1797; the holy image, which had been carried to France, was brought back with pomp, 5 Jan. 1803.

The loss of the French was severe: that of the British inconsiderable. — The French flag-ship, *L'ORIENT*, blew up during the battle of the Nile, 1 Aug. 1798. Admiral Brueys and about 900 men perished. Strike and riot, 4, 5 Aug. 1903.

LORRAINE (Lotharingia), formerly a French now a German province, became a kingdom under Lothaire (son of the emperor Lothaire I.) about 855, and was divided at his death, in 869, part of it being made a duchy. From the first hereditary duke, Gerard, nominated by the emperor Henry III. in 1048, descended the house of Lorraine, represented now by the emperor of Austria, whose ancestor, the empress Maria Theresa, married in 1736 Francis formerly duke of Lorraine, then of Tuscany. Lorraine, given to the dethroned king of Poland, Stanislaus I., for life, was, at his death in 1766, united to France; see *Nancy*. Lorraine was the seat of war in Aug. 1870, and about the fifth part, including Metz and Thionville, was annexed to Germany at the peace, 26 Feb. 1871.

LOTS. Casting lots, as an appeal to God, was sacred among the Jews, *Proverbs* xvi. 33. It was employed in the division of the land of Canaan, about 1444 B.C., by Joshua (xiv.), and in the election of Matthias the apostle, A.D. 33, *Acts* i. — Lots for life or death have been frequently cast. For an instance, see *Wales*, 1649, note.

LOTTERIES are said to have originated in Florence about 1530, and to have been legalised in France in 1539, and soon became common. They were prohibited by pope Benedict XIII. (1724-30), and sanctioned by Clement XII. (1730-40). See *Art Union* under *Arts and Paris* (exhibition 1889).

The first mentioned in English history took place, day and night, at the western door of St. Paul's cathedral. It contained 40,000 "lots" at 10s. each lot, the profits were for repairing the harbours, and the prizes were pieces of plate,

LOUVRE, in Paris, is said to have been a royal residence in the reign of Dagobert, 628. It was a prison-tower constructed by Philippe Augustus in 1204. It afterwards became a library, and Charles VI. made it his palace (about 1364). The new buildings, begun by Francis I. in 1528, were enlarged and adorned by successive kings, particularly Louis XIV.—Napoleon I. turned it into a museum, and

deposited in it the finest collection of paintings, statues, and treasures of art known in the world. The chief of those brought from Italy have since been restored to the rightful possessors. The magnificent buildings of the new Louvre, begun by Napoleon I. and completed by Napoleon III., were inaugurated by the latter in great state, 14 Aug. 1857. The library was destroyed and other buildings much injured by the communists, May, 1871. Baroness Nathaniel de Rothschild bequeaths Greuze's "Laitière," a fine collection of Botticellis and others to the Louvre, 1890. Five new rooms opened, 20 May, 1901; 111 pictures, 140 bronzes, given, Jan. 1902.

LOWESTOFT, a municipal borough, seaport, and popular watering-place on the coast of Suffolk, in proximity to the "Broads." The older part of the town, built on a cliff in front of the sea, is of considerable antiquity, and includes the parish church, 183 ft. in length, with a tower and spire, 120 ft. high, dating from the 14th century. Among its vicars were Whiston, the famous mathematician and translator of "Josephus," and Dr. Potter, primate of all England. In 1349, 1547, 1579 and 1603, Lowestoft was visited by plague. During the civil war Cromwell, in 1643, occupied the town. It was partially destroyed by a great fire, 1644. The Dutch were defeated in a naval engagement off the coast, losing 18 ships, 3 June, 1665. On 14th June, 1736, George II. landed at Lowestoft on his return from Hanover. It has a good harbour, adjoining which is a dock constructed 1883; large fish market, a town hall, a hospital, and Bellevue park, opened 1874. A handsome pavilion on the new south pier was erected in 1890. There are two lighthouses, erected respectively 1806 and 1874, one on the Ness, the most easterly point of land in England. In 1845, Schrötter of Vienna produced his amorphous phosphorus (by heating ordinary phosphorus in a gas which is cannot absorb), by the use of which lucifers are rendered less dangerous, and the manufacture less unhealthy. *Phosphoros* (Greek) and *lucifer* (Latin), both signify *light-bearer*.

Safety match first introduced 1 May, 1862. Mr. Lowe's proposed tax on lucifers (with "*ex luce lucellum*" on the box) much opposed, withdrawn, April, 1871. For their exertions, a drinking fountain at Bow was inaugurated as a memorial to Bryant & May, 5 Oct. 1872. The match manufacture was made a monopoly in France, Oct. 1873, for 750,000. LYDIA, or *Mæonia*, an ancient kingdom in Asia Minor; the early history wholly mythical. Of a long dynasty of kings, the last was Croesus, "the richest of mankind." The coinage of gold and silver money, and other useful inventions, are ascribed to the Lydians. Esop, the fabulist, Aleman, the early lyric poet, Thales of Miletus, Anaximenes, Xenophanes, Anacreon of Teos, Herac-litus of Ephesus, &c., flourished in Lydia and Greece, from the 7th century B.C.

LYING-IN HOSPITALS. The first, established in Dublin by Dr. Bartholomew Mosse, a physician, amid strong opposition, was opened March, 1745; see *Hospitals*.

LYMPHATICS (absorbent vessels connected with digestion), discovered about 1650 by Rudbek in Sweden, Bartholin in Denmark, and Jolyffe in England. Asellius discovered the lacteals in 1622. In 1654, Glisson ascribed to these vessels the function of absorption.

LYNCH LAW, punishment inflicted by private individuals, independently of the legal authorities. The origin of the term is doubtful; the practice has been attributed to James Lynch Fitz-

Stephen, warden of Galway, about 1526, to Lynch, a farmer in Virginia, and to Lynch, a person sent to America to suppress piracy, 1687-8. "Judge Lynch" is thought by some to be a mythical person. This mode of administering justice still exists in the outlying districts of the United States.

LYRE. Its invention is ascribed to the Grecian *Hermes* (in Latin *Mercury*), who, according to Homer, gave it to Apollo, the first that played upon it with method, and accompanied it with poetry. The invention of the primitive lyre, with three strings, is ascribed to the first Egyptian *Hermes*. It is said that Terpander added several strings to the lyre, making the number seven, 673 B.C., and that *Phrynis*, a musician of Mitylene, added two more, making nine, 438 B.C.

M.

MACADAMISING, a system of road-making invented by Mr. John Macadam, and published by him in an essay, in 1819, having practised it in Ayrshire. He prescribed stones to be broken to six ounces weight, and the use of clean flints and granite clippings. He received 10,000*l.* from parliament; was appointed surveyor-general of the metropolitan roads in 1827, and died in 1836; see *Roads*.

MACAO (in Quang-tong, S. China) was given to the Portuguese as a commercial station in 1586 (in return for their assistance against pirates), subject to an annual tribute, which was remitted in 1886. Here Camoens composed part of the "*Lusiad*." The abuses of the Coolie trade by the Portuguese led to its abolition here by the British and Chinese governments in 1873. Outbreak of plague reported, 23 April, 1895.

MACARONI. This name, given to a poem by Theophilus Polengo, 1509, continues to designate trifling performances, as buffoonery, puns, anagrams, "wit without wisdom, and humour without sense." His poem was so called from a nutritious preparation of wheat-flour in tubes and threads. These poems, in Italy and France, gave rise to *Macaroni academies*, and in England to *Macaroni clubs* (about 1772), when everything ridiculous in dress and manners was called "*Macaroni*."

MACCABEES, a name of the Asmoneans, who commenced their career during the persecution of Antiochus Epiphanes, 167 B.C. Mattathias, a priest, resisted the tyranny; and his son, Judas Maccabæus, defeated the Syrians in three battles, 166, 165 B.C.; but fell in an ambush, 161 B.C. His brother Jonathan made a league with the Romans and Lacedæmonians, and after an able administration was treacherously killed at Ptolemais by Tryphon, 143 B.C. His brother and successor, Simon, was also murdered, 135 B.C. John Hyrcanus, son of Simon, succeeded. His son Judas, called also Aristobulus, took the title of king, 107 B.C. The history of the Maccabees is contained in five books of that name, two of which are included in our Apocrypha. Four are accounted canonical by the Roman Catholic church; none by Protestant communions.

The magnificent Maccabees chapel at Geneva, founded in 1415, by the cardinal Jean de Brognier, president of the council of Constance and the place of his sepulchre. The building, much injured and desecrated at the time of the Reformation, was finely renovated in 1881 and fitted up as a museum.

MACE a weapon anciently used by the cavalry of most nations, was originally a spiked club, hung at the saddle-bow, and usually of metal. Maces were also early ensigns of authority borne before officers of state, the top being made in the form of

an open crown, and commonly of silver gilt. The lord chancellor and speaker of the house of commons have maces borne before them. Edward III. granted to London the privilege of having gold or silver maces carried before the lord mayor, sheriffs, aldermen, and corporation, 1354. It was with the mace usually carried before the lord mayor on state occasions, that Walworth, lord mayor of London, is said to have knocked the rebel Wat Tyler off his horse, for rudely approaching Richard II., a courtier afterwards despatching him with his dagger, 15 June, 1381. Cromwell, entering the house of commons to disperse its members and dissolve the parliament, ordered one of his soldiers to "take away that bauble," the mace, which was done, and the doors of the house locked, 20 April, 1653.
